PREFACE.

The year 1890 has been one of the most remarkable ones in the history of American politics. The legislation of congress has been unusually important. The tariff has been entirely remodeled; pension expenditures have been largely increased; new states have been admitted; provision has been made for the holding of the World's Columbian Exposition at Chicago; the eleventh census has been taken, and the currency system of the nation has been unsettled by silver legislation. Not for many years have so great changes been noted in the political sentiments of the people. For these reasons the political statistics of 1890 are of unusual interest and value, and every effort has been made to make the record accurate and complete. The reports of the eleventh census—only partially completed at this date—have been laid under contribution in so far as they are available.

The DAILY NEWS ALMANAC for 1891 is unusually replete with information in all departments—educational, political, financial and statistical—and will so equip the reader with accurate knowledge of the facts involved as to enable him to apply an intelligent judgment to the consideration of every important public question.

The DAILY NEWS ALMANAC for 1891 is nearly double the size of any preceding issue and is submitted to its patrons with the confident expectation that it will be found to still better meet the requirements of a comprehensive, accurate and concise American year-book. At the same time it is remembered that statistical works of this kind can never, in the nature of the case, be absolutely without error, and while every effort has been made to approximate perfection in this issue the editor renews his invitation to all friends of the work to be favored with their criticisms and suggestions for the still further improvement of the issue for 1892.

NOTE.—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For Example: To know on what day of the week July 4 will be in the year 1891, in the table of years look for 1891, and in a parallel line, under July, is figure 3, which directs to column 3, in which it will be seen that July 4 falls on Saturday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1780 (Sept. 3-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

IMPORTS OF MERCHANDISE, WITH RATE OF DUTY,

For the twelve months ending June 30, 1890, compared with the corresponding period of 1889.
(Corrected to July 30, 1890.)

Abbreviation: n. e. s., not elsewhere specified.

TARIFF HISTORY OF THE UNITED STATES.

Synopsis of all bills changing the tariff, from the 1st bill passed July 4, 1789, to the McKinley bill passed in September, 1890.

The tariff history of the United States is generally classified by economic writers under four grand divisions.

The first embraces a period of peace, from 1789 to 1811.

The second covers a period beginning with the war in 1812 and ending in 1832.

The third covers a second period of peace from 1832 to 1860.

The fourth begins with 1861 and ends with 1882.

From 1883 to the present time is known as the commission tariff era.

The passage of the McKinley bill may be said to open a new volume in the history of our tariff legislation which is as yet without an accurately descriptive title.

The first tariff act was signed by President Washington on July 4, 1789. The new government had just been established and the object of the law was to put money into the empty treasury of the republic. Alexander Hamilton was the author of the measure, which was modeled on the 5 per cent import duty that the congress of the confederation had tried in

vain to impose. This first law imposed specific duties on forty-seven articles and ad valorem rates of 7½, 10, 12½ and 15 per cent on four commodities or small groups. The unenumerated goods were compelled to pay 5 per cent. The second tariff act passed the house by a vote of 39 to 13, and passed the senate without a division. It was approved by the president on Aug. 10, 1790. This act was longer than its predecessor and the scale of duties was higher. Then followed the act of May 2, 1792, which became operative in the following July. It raised the duty on unenumerated merchandise to 7½ per cent and that on many articles paying 7½ to 10 per cent. Another tariff bill was passed on June 7, 1794, going into effect on July 1. It imposed numerous rates in addition to those already payable, some of them specific and others 2½ and 5 per cent ad valorem. Additional tariff measures were enacted on March 3 and July 8, 1797, and on May 13, 1800. These acts imposed additional rates, and there was a further increase of 2½ per cent on March 26, 1804, on all imports then paying ad valorem rates.

The whole industrial situation of the country was changed suddenly and radically in 1807-8. Napoleon's Berlin and Milan decrees were followed by the English orders in council, and Mr. Jefferson's administration retaliated for the outrages on our commerce by the celebrated embargo in December, 1807. This was followed by the non-intercourse act in 1809 and by a declaration of war against England in 1812. During the progress of hostilities all commercial intercourse with Great Britain was, of course, suspended and all import duties were doubled as a war measure.

This is known as the tariff of 1812. It passed the house of representatives by a vote of 76 to 45 and received the sanction of the senate by 20 votes in its favor to against it. Amendments to it were adopted on Feb. 25 and again on July 23, 1813. On Feb. 13, 1816, the additional duties imposed by the act of 1812 were repealed, and additional duties of 42 per cent to take effect on July 1, were substituted, but the law did not go into operation. From 1812 to 1816 the average rate on all imports was 32.73 per cent, the range being from 6.84 per cent in 1815 to 89.05 in 1816.

The next great tariff measure is known as the Lowndes-Calhoun bill of 1816. The desire to protect the industries that had sprung up during the period of restriction and war was very strong in the country and they were granted clear concessions in the measure bearing the name of the great South Carolinian. It was approved April 27, 1816, took effect the following July, and may be said to be the first of the protective tariffs. It was not wholly set aside until 1842, under the administration of Mr. Polk. The ad-valorem duties under it ranged from 7½ to 33 per cent. The unenumerated goods paid 15 per cent, the manufactures of iron and other metals generally 15 per cent, the majority of woolen goods 25 per cent, cotton goods 25 per cent, "with clauses establishing 'minimums'"—that is, in reckoning duties, 25 cents per square yard was to be deemed the minimum cost of cotton cloth; unbleached and uncolored yarn, 60 cents, and bleached or colored yarn, 75 cents a pound. These rates became practically prohibitory on the cheaper goods. The law was amended April 20, 1818, and again on March 3, 1820. It had the support of New England and the Middle states, but the south was opposed to it. From 1817 to 1820 the average rate on imports was 26.52 per cent; from 1821 to 1824, 35.02 per cent, and from 1825 to 1824, on dutiable goods only, 34.83 per cent. This general increase of duties was due to the necessity of providing for the interest on the heavy debt incurred by the second war with England.

The Clay tariff followed in 1824. The vote in the house was close—107 to 102—and there was a majority of only 4 in the senate—25 for to 21 against it. New England and the south voted against the measure, while on the other side were ranged the west and the middle states. It received the president's signature on May 22, 1824, and went into effect on July 1. It remained in force in almost its entirety until 1842. It raised the duty on woolen goods from 25 to 30 per cent for one year, and then to 33½ per cent. There was a "minimum" of 30 cents per square yard on cotton cloth. Wool over 10 cents a pound was rated at 20 per cent until June 1, 1825, then 25 per cent for one year and then 30 per cent. The average rates on all imports from 1825 to 1828 was 47.17 per cent and on dutiable goods 50.29 per cent.

The "Tariff of Abominations," as it is called by the democrats, was approved May 19, 1828, and went into operation part the following July and part in September. In the house 105 members voted for it and 94 members, mostly from New England and the south, against it. In the senate the vote was 25 to 21. It had special reference to iron, wool and manufactures of wool. The duty on wool was 4 cents per pound and 40 per cent for one year; then 4 cents and 40 per cent for a year; then 4 cents and 50 per cent. Somewhat lower duties were provided for in an act passed on May 24, 1828, again in May, 1830, and still again on July 13, 1832. The average duty on all goods from 1829 to 1832 was 47.51 per cent, and on all dutiable 51.56 per cent.

The modifying tariff of 1832 was intended "to correct the inequalities of that of 1828." It was passed by the whigs, or national republicans, and levied high duties on cotton and woolen goods and other articles to which protection was meant to be applied. The vote in the house was 132 to 65, and in the senate 32 to 16, the votes in favor of it coming from all sections of the country. The New England vote in the house was a tie. It was approved on July 14 and took effect on March 3, 1833. The existing duties were superseded by the act, some of them reduced and a few raised. In a separate act of the same date railroad iron was made free. Under its operation the average rate on imports in 1832-33, during the ten months it was in force, was 28.99 per cent and dutiable articles 38.25 per cent.

The compromise tariff of 1833 provided for taking off one-third of the duties each year until a uniform rate on all of 20 per cent should be reached. It passed the house by 119 to 85, and the senate by 29 to 16. New England then joined the middle states in voting for high protective duties. It was approved on March 2, 1833, the day before the tariff of 1832 went into operation, and took effect on Jan. 1, 1834. The terms of the compromise were that all duties which in the tariff of 1832 exceeded 20 per cent should have one-tenth of the excess over 20 per cent taken off on Jan. 1, 1834; one-tenth more on Jan. 1, 1836; again one-tenth in 1838, and another one-tenth in 1840; so that by 1840 four-tenths of the excess over 20 per cent would be disposed of. Then on Jan. 1, 1842, one-half of this remaining excess was to be taken off, and on July 1, 1842, the other half of the remaining excess was to go. There would, therefore, after July 1, 1842, have been a uniform rate of 20 per cent on all articles. The average duty on all imports from 1834 to 1842 was 19.25 per cent and on dutiable articles 34.73 per cent.

The tariff of 1842 was passed by the whigs as a party measure and was avowedly a protective measure. It took effect at once, on Aug. 30, 1842, changed all existing rates, was amended in March, 1843, and died Dec. 1, 1848. New England and the middle states gave it strong support. The south was earnest in op-

position and the west was a tie. The average rate on all imports under it was 26.92 per cent, and on dutiable articles 33.47 per cent.

The Polk-Walker tariff of 1846 is one of the most noteworthy acts in the fiscal history of the country. In his inaugural address President Polk said: "In the general proposition that no more money shall be collected than the necessities of an economical administration shall require all parties seem to acquiesce. I have heretofore declared to my fellow-citizens that in my judgment it is the duty of the government to extend, as far as it may be practicable to do so, by its revenue laws and all other means within its power, fair and just protection to all the great interests of the union, embracing agriculture, manufacture, the mechanic arts, commerce and navigation. I have also declared my opinion to be in favor of a tariff for revenue, and that, in adjusting the details of such a tariff, I have sanctioned such moderate discriminating duties as would produce the amount of revenue needed and at the same time afford reasonable protection to our home industries."

Robert J. Walker of Mississippi, who was Mr. Polk's secretary of the treasury, laid down these principles as a basis for revenue reform in his celebrated report of 1845:

"No more money shall be collected than is needed for economical administration.

"The duty on no article should exceed the lowest rate which will yield the largest revenue.

"Below such rate discrimination may be made, or for imperative reasons an article may be made free.

"Luxuries should be taxed at the minimum rate for revenue.

"Duties should be all ad valorem, and never specific.

"Duties should be so imposed as to operate as equally as possible throughout the union, without respect to class or section."

The bill framed on this basis was approved by Mr. Polk on July 30, 1846. It passed the house by 114 to 95, the east being in the opposition and the west and south in support. The vote in the senate on a third reading was a tie, and Vice-President Dallas gave the casting vote in the affirmative. The senate on the final passage stood 25 to 27. This act superseded the whig tariff and remained in force until 1857. It swept away specific and compound duties. It divided all dutiable merchandise into eight classes, which introduced greater simplicity into the whole system of customs regulations. The average duty on all imports was, from 1847 to 1857, 23.20 per cent and on dutiable articles 26.22 per cent.

The tariff of 1857, which was the next in order, made a still further reduction in duties. It was approved on March 3, 1857, took effect

on July 1, and remained in force until April 1, 1861. New England united with the south in giving it 123 votes to 72 in the house, and in the senate 33 to 12. The average duty on all goods from 1858 to 1861 was 15.66 per cent and on dutiable articles 20.12 per cent.

The Morrill tariff of 1861 differed from all its predecessors in that it provided for a general system of compound and differential duties, specific and ad valorem, and also made a distinction between goods imported from different parts of the world. It passed the house on May 11, 1860, by a vote of 105 to 64 and the senate on Feb. 20, 1861, by a vote of 25 to 14. From the first, through all the cumbersome legislation that has followed in its wake, it has been avowedly protective. It was frequently changed during the war of the rebellion, ostensibly for purposes of revenue. At an early period in its history the number of rates ran up to over two thousand. From 1861 to 1869 every year produced some enlargement of the original scheme. In 1870 there was some modification of rates, generally in the line of reduction. Tea and coffee, taxed since 1861, were then put on the free list and the duties on cotton and woolen goods, wool, iron, paper, glass and leather were lowered about 10 per cent. The free list was somewhat enlarged, but the reduction was rescinded in the act of March 3, 1875. The duty on quinine was abolished on July 1, 1879. The average duty on all imports from 1862 to 1883 was 34.16 per cent and on dutiable articles 42.74 per cent.

The commission tariff was passed by the house on March 3, 1883, by a vote of 152 to 116, and passed the senate on March 2, the vote being 32 to 31. This is the tariff which was in force until October, 1890. The average rate is put by Senator Carlisle at 45 1/2 per cent and by Senator Aldrich at 45.13 per cent.

The McKinley bill was passed by congress as a strictly republican measure. It passed the house and went to the senate, where it was considerably amended. A conference committee was appointed and the bill as we now have it was agreed upon. It passed the senate Sept. 30, 1890, by a vote of 33 to 27, three republicans—Plumb of Kansas, Paddock of Nebraska, and Pettigrew of South Dakota—voting with the democrats against the bill. It passed the house Sept. 27, 1890, by a vote of 152 to 81. There is some doubt as to the effect of the bill. Mr. Carlisle in a speech in the senate said it would make an average rate on imports of 60 per cent, while Mr. Morrill of Vermont puts the average rate at less than 50 per cent. While the law increases the free list considerably it raises the duties on wool and woolens, tin-plate and some other goods, as well as in almost all agricultural products. The law went into effect Oct. 6, 1890.

NUMBER OF VESSELS BUILT.

The following table gives the number and tonnage of vessels built in the world in 1888 and 1889:

The figures for the United States do not include the tonnage built on the lakes, which are as follows: For 1888, 59 vessels with a tonnage of 100,950, and for 1889, 56 vessels with a tonnage of 121,750 were built. This puts lake shipbuilding next to that of the United Kingdom almost doubling the tonnage of the German empire turned out during the past two years. The number of boats built in Germany during 1888 and 1889 was 116, and on the lakes 115, the same number but having nearly 80,000 more tons, showing that lake boats were on an average one-third larger. Of the 2,429,132 tons shown above 2,064,800 tons were steel, 181,846 iron, 178,824 wood and 3,681 composite.

THE NEW TARIFF BILL.

Comparison of New Rates with the Old.

AN ACT to reduce the revenue and equalize duties on imports, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on and after the sixth day of October, eighteen hundred and ninety, unless otherwise specially provided for in this act, there shall be levied, collected, and paid upon all articles imported from foreign countries, and mentioned in the schedules herein contained, the rates of duty which are, by the schedules and paragraphs, respectively prescribed, namely:

[All changes from the old law are indicated by foot-notes or by italics.]

SCHEDULE A.—CHEMICALS, OILS AND PAINTS.

ACIDS.

1. Acetic or pyroligneous acid, not exceeding the specific gravity of one and forty-seven one-thousandths, one and one-half cents per pound; exceeding the specific gravity of one and forty-seven one thousandths, four cents per pound. [Old law: Two cents and four cents.]

2. Boracic acid, five cents per pound. [Old law: Pure, five cents per pound; commercial, four cents.]

3. Chromic acid, six cents per pound. [Old law: Fifteen per centum.]

4. Citric acid, ten cents per pound.

[Old law: One and one-fourth cents per pound.]

138. Boiler, or other plate iron or steel, except saw-plates hereinafter provided for, not thinner than number ten wire gauge, sheared or unsheared, and skelp iron or steel sheared or rolled in grooves, valued at one cent per pound or less, five-tenths of one cent per pound; valued above one cent and not above one and four-tenths cents per pound, sixty-five-hundredths of one cent per pound; valued above one and four-tenths cents and not above two cents per pound, eight-tenths of one cent per pound; valued above two cents and not above three cents per pound, one and one-tenth cents per pound; valued above three cents and not above four cents per pound, one and five-tenths cents per pound; valued above four cents and not above five cents per pound, two cents per pound; valued above five cents and not above ten cents per pound, two and eight-tenths cents per pound; valued above ten cents and not above thirteen cents per pound, three and one-half cents per pound; valued above thirteen cents per pound, forty-five per centum ad valorem: *Provided*, That all plate iron or steel thinner than number ten wire gauge shall pay duty as iron or steel sheets. [Old law: Boiler or other plate iron, one and one-fourth cents per pound if iron; forty-five per centum if steel.]

139. Forgings of iron or steel, or forged iron and steel combined, of whatever shape, or in whatever stage of manufacture, not specially provided for in this act, two and three-tenths cents per pound; *Provided*, That no forgings of iron or steel, or forgings of iron and steel combined, by whatever process made, shall pay a less rate of duty than forty-five per centum ad valorem. [Old law: Forgings of iron and steel, or forged iron, of whatever shape, or in whatever stage of manufacture, not specially enumerated or provided for in this act, two and one-half cents per pound.]

140. Hoop, or band, or scroll, or other iron or steel, valued at three cents per pound or less, eight inches or less in width, and less than three-eighths of one inch thick and not thinner than number ten wire gauge, one cent per pound; thinner than number ten wire gauge and not thinner than number twenty wire gauge, one and one-tenth cents per pound; thinner than number twenty wire gauge, one and three-tenths cents per pound. *Provided*, That hoop or band iron, or hoop or band steel, cut to length, or wholly or partially manufactured into hoops or ties for baling purposes, barrel hoops of iron or steel, and hoop or band iron, or hoop or band steel flared, splayed, or punched, with or without buckles or fastenings, shall pay two-tenths of one cent per pound more duty than that imposed on the hoop or band iron or steel from which they are made. [Old law: Hoop, or band, or scroll, or other iron, eight inches or less in width, and not thinner than number ten wire gauge, one cent per pound; thinner than number ten wire gauge, and not thinner than number twenty wire gauge, one and two tenths of one cent per pound; thinner than number twenty wire gauge, one and four-tenths of one cent per pound; *Provided*, That all articles not specially enumerated or provided for in this act, whether wholly or partly manufactured, made from sheet, plate, hoop, band or scroll iron herein provided for, or of which such sheet, plate, hoop, band or scroll iron shall be the material of chief value, shall pay one-fourth of one cent per pound more duty than that imposed on the iron from which they are made, or which shall be such material of chief value. If steel, forty-five per centum: Iron and steel cotton-ties, or hoops for baling purposes, not thinner than number twenty wire gauge, thirty-five per centum ad valorem. If steel, forty-five per centum: Sheet iron, common or black, thinner than one inch and one-half and not thinner than number twenty wire gauge, one and one-tenth of one cent per pound; thinner than number twenty wire gauge and not thinner than number twenty-five wire gauge, one and two-tenths of one cent per pound; thinner than number twenty-five wire gauge and not thinner than number twenty-nine wire gauge, one and five-tenths of one cent per pound; thinner than number twenty-nine wire gauge, and all iron commercially known as common or black tappers iron, whether put up in boxes or bundles or not, thirty per centum ad valorem.]

141. Railway-bars, made of iron or steel, and railway-bars made in part of steel, T-rails, and punched iron or steel flat rails, six-tenths of one cent per pound. [Old law: Iron or steel tee rails, weighing not over twenty-five pounds to the yard, nine-tenths of one cent per pound; iron or steel flat rails, punched, eight-tenths of one cent per pound. Iron railway bars, weighing more than twenty-five pounds to the yard, seven-tenths of one cent per pound. Steel railway bars and railway bars made in part of steel, weighing more than twenty-five pounds to the yard, seventeen dollars per ton.]

142. Sheets of iron or steel, common or black, including all iron or steel commercially known as common or black tappers iron or steel, and skelp iron or steel, valued at three cents per pound or less: Thinner than number ten and not thinner than number twenty wire gauge, one cent per pound; thinner than number twenty wire gauge, and not thinner than number twenty-five wire gauge, one and one-tenth cents per pound; thinner than number twenty-five wire gauge, one and four-tenths cents per pound; corrugated or crimped, one and four-tenths cents per pound; *Provided*, That all common or black sheet iron, or sheet steel not thinner than number ten wire gauge shall pay duty as plate iron or plate steel. [Old law: Sheet iron, common or black, thinner than one inch and one half and not thinner than number twenty wire gauge, one and one-tenth of one cent per pound; thinner than number twenty wire gauge and not thinner than number twenty-five wire gauge, one and two-tenths of one cent per pound; thinner than number twenty-five wire gauge and not thinner than number twenty-nine wire gauge, one and five-tenths of one cent per pound; thinner than number twenty-nine wire gauge, and all iron commercially known as common or black tappers iron, whether put up in boxes or bundles or not, thirty per centum ad valorem.]

143. All iron or steel sheets or plates, and all hoop, band, or scroll iron or steel, excepting what are known commercially as tin plates, terne plates, and tappers tin, and hereinafter provided for, when galvanized or coated with zinc or spelter, or other metals, or any alloy of those metals, shall pay three-fourths of one cent per pound more duty than the rates imposed by the preceding paragraph upon the corresponding gauges, or forms, of common or black sheet or tappers iron or steel; and on and after July first, eighteen hundred and ninety one, all iron or steel sheets, or plates, or tappers iron coated with tin or lead or with a mixture of which these metals or either of them is a component part, by the dipping or any other process, and commercially known as tin plates, terne plates, and tappers tin, shall pay two and two-tenths cents per pound; *Provided*, That on and after July first, eighteen hundred and ninety one, manufactures of which tin, tin plates, terne plates, tappers tin, or either of them, are component materials of chief value, and all articles, vessels or wares manufactured, stamped or drawn from sheet iron or sheet steel, such material being the component of chief value, and coated wholly or in part with tin or lead or a mixture of which these metals or either of them is a component part, shall pay the duty of fifty-five per centum ad valorem; *Provided*, That on and after October first, eighteen hundred and ninety-seven, tin plates and terne plates lighter in weight than sixty-three pounds per hundred square feet shall be admitted free of duty, unless it shall be made to appear to the satisfaction of the President (who shall thereupon by proclamation make known the fact) that the aggregate quantity of such plates lighter than sixty-three pounds per hundred square feet produced in the United States during either of the six years next preceding June thirtieth, eighteen hundred and ninety-seven, has equalled one-third the amount of such plates imported and entered for consumption during any fiscal year after the passage of this act, and prior to said October first eighteen hundred and ninety-seven; *Provided*, That the amount of such plates manufactured into articles exported, and upon which a drawback shall be paid, shall not be included in ascertaining the amount of such importations; *And provided further*, That the amount or weight of sheet iron or sheet steel manufac-

tured in the United States and applied or wrought in the manufacture of articles or wares tinned or terne-plated in the United States, with weight allowance as sold to manufacturers or others, shall be considered as tin and terne plates produced in the United States within the meaning of this act. [Old law: *And provided*, That on all such iron and steel sheets or plates aforesaid, excepting on what are known commercially as tin-plates, terne-plates, and taggers' tin, and hereafter provided for, when galvanized or coated with zinc or spelter, or other metals, or any alloy of those metals, three-fourths of one cent per pound additional. Iron or steel sheets, or plates, or taggers' iron, coated with tin or lead, or with a mixture of which these metals is a component part, by the dipping or any other process, and commercially known as tin-plates, terne-plates, and taggers' tin, one cent per pound; corrugated or crimped sheet-iron or steel, one and four-tenths of one cent per pound. Manufactures of tin, forty-five per centum.]

14. Sheet-iron or sheet-steel polished, planished, or glanced, by whatever name designated, two and one-half cents per pound: *Provided*, That plate or sheet or taggers iron or steel, by whatever name designated, other than the polished, planished or glanced, herein provided for, which has been pickled or cleaned by acid, or by any other material or process, or which is cold-rolled, smoothed only, not polished, shall pay one-quarter of one cent per pound more duty than the corresponding gauges of common or black sheet or taggers iron or steel. [Old law: The words in italics in this paragraph are new matter.]

15. Sheets or plates of iron or steel, or taggers iron or steel, coated with tin or lead, or with a mixture of which these metals, or either of them, is a component part, by the dipping or any other process, and commercially known as tin plates, terne plates, and taggers tin, one cent per pound until July first, eighteen hundred and ninety-one.

16. Steel ingots, cogged ingots, blooms, and slabs, by whatever process made; die blocks or blanks; billets and bars and tapered or beveled bars; steamer, crank, and other shafts; *shafting*; wrist or crank pins; connecting-rods and piston-rods; pressed, sheared, or stamped shapes; saw-plates, wholly or partially manufactured; hammer-molds or swaged steel; gun-barrel molds not in bars; alloys used as substitutes for steel tools; all descriptions and shapes of dry sand, loam, or iron-molded steel castings; sheets and plates not specially provided for in this act; and steel in all forms and shapes not specially provided for in this act; all of the above valued at one cent per pound or less, four-tenths of one cent per pound; valued above one cent and not above one and four-tenths cents per pound, five-tenths of one cent per pound; valued above one and four-tenths cents and not above one and eight-tenths cents per pound, eight-tenths of one cent per pound; valued above one and eight-tenths cents and not above two and two-tenths cents per pound, nine-tenths of one cent per pound; valued above two and two-tenths cents, and not above three cents per pound, one and two-tenths cents per pound; valued above three cents and not above four cents per pound, one and six-tenths cents per pound; valued above four cents and not above seven cents per pound, two cents per pound; valued above seven cents and not above ten cents per pound, two and eight-tenths cents per pound; valued above ten cents and not above thirteen cents per pound, three and one-half cents per pound; valued above thirteen cents and not above sixteen cents per pound, four and two-tenths cents per pound;

valued above sixteen cents per pound, seven cents per pound. [Old law: Steel ingots, cogged ingots, blooms, and slabs, by whatever process made; die blocks or blanks; billets and bars and tapered or beveled bars; bands, hoops, strips, and sheets of all gauges and widths; plates of all thicknesses and widths; steamer, crank, and other shafts; wrist or crank pins; connecting-rods and piston-rods; pressed, sheared, or stamped shapes, or blanks of sheet or plate steel, or combination of steel and iron, punched or not punched; hammer-molds or swaged steel; gun-molds, not in bars; alloys used as substitutes for steel tools; all descriptions and shapes of dry sand, loam, or iron-molded steel castings, all of the above classes of steel not otherwise specially provided for in this act valued at four cents a pound or less, forty-five per centum ad valorem; above four cents a pound and not above seven cents per pound, two cents per pound; valued above seven cents and not above ten cents per pound, two and three-fourths cents per pound; valued at above ten cents per pound, three and one-fourth cents per pound.]

WIRE.

17. Wire rods: Rivet, screw, fence, and other iron or steel wire rods, and nail rods, whether round, oval, flat, square, or in any other shape, in coils or otherwise, not smaller than number six wire gauge, valued at three and half cents or less per pound, six-tenths of one cent per pound; and iron or steel, flat, with longitudinal ribs for the manufacture of fencing, valued at three cents or less per pound, six-tenths of one cent per pound: *Provided*, That all iron or steel rods, whether rolled or drawn through dies, smaller than number six wire gauge, shall be classed and dutiable as wire. [Old law: Iron or steel rivet, screw, nail, and fence, wire rods, round, in coils and loops, not lighter than number five wire gauge, valued at three and one-half cents or less per pound, six-tenths of one cent per pound. Iron or steel, flat, with longitudinal ribs, for the manufacture of fencing, six-tenths of a cent per pound.]

18. Wire: Wire made of iron or steel, not smaller than number ten wire gauge, one and one-fourth cents per pound; smaller than number ten, and not smaller than number sixteen wire gauge, one and three-fourths cents per pound; smaller than number sixteen and not smaller than number twenty-six wire gauge, two and one-fourth cents per pound; smaller than number twenty-six wire gauge, three cents per pound: *Provided*, That iron or steel wire covered with cotton, silk, or other material, and wires or strip steel, commonly known as crinoline wire, corset-wire, and hat-wire, shall pay a duty of five cents per pound: *And provided further*, That flat steel wire, or sheet steel in strips, whether drawn through dies or rolls, untempered or tempered, of whatsoever width, twenty-five one thousandths of an inch thick or thinner (ready for use or otherwise), shall pay a duty of fifty per centum ad valorem: *And provided further*, That no article made from iron or steel wire, or of which iron or steel wire is a component part of chief value, shall pay a less rate of duty than the iron or steel wire from which it is made either wholly or in part: *And provided further*, That iron or steel wire cloths, and iron or steel wire nettings made in meshes of any form, shall pay a duty equal in amount to that imposed on iron or steel wire used in the manufacture of iron or steel wire cloth, or iron or steel wire nettings, and two cents per pound in addition thereto. [Old law: Smaller than number ten gauge, one and one-half and two cents per pound; number ten to number sixteen gauge, two cents; number sixteen to number twenty-six

gauge, two and one-half cents; smaller, three cents. *Provided*, That iron or steel wire covered with cotton, silk, or other material, and wire commonly known as crinoline, corset, and hat-wire, shall pay four cents per pound in addition to the foregoing rates: *And provided further*, That no article made from iron or steel wire, or of which iron or steel wire is a component part of chief value, shall pay a less rate of duty than the iron or steel wire from which it is made, either wholly or in part: *And provided further*, That iron or steel wire-cloths, and iron or steel wire-nettings, made in meshes of any form, shall pay a duty equal in amount to that imposed on iron or steel wire of the same gauge, and two cents per pound in addition thereto. There shall be paid on galvanized iron or steel wire (except fence wire) one-half of one cent per pound in addition to the rate imposed on the wire of which it is made. On iron wire-ropes and wire-strand, one cent per pound in addition to the rates imposed on the wire of which it is made. On steel wire-ropes and wire-strand, two cents per pound in addition to the rates imposed on the wire of which it is made.]

There shall be paid on iron or steel wire coated with zinc or tin, or any other metal (except fence-wire and iron or steel, flat, with longitudinal ribs, for the manufacture of fencing), one-half of one cent per pound in addition to the rate imposed on the wire of which it is made; on iron wire-ropes and wire-strand, one cent per pound in addition to the rate imposed on the wire of which it is made; on steel wire ropes and wire-strand, two cents per pound in addition to the rate imposed on the wire of which they or either of them are made: *Provided further*, That all iron or steel wire valued at more than four cents per pound shall pay a duty of not less than forty-five per centum ad valorem, except that card-wire for the manufacture of card clothing shall pay a duty of thirty-five per centum ad valorem.

GENERAL PROVISIONS.

149. No allowance or reduction of duties for partial loss or damage in consequence of rust or of discoloration shall be made upon any description of iron or steel, or upon any article wholly or partly manufactured of iron or steel, or upon any manufacture of iron and steel.

150. All metal produced from iron or its ores, which is cast and malleable, of whatever description or form, without regard to the percentage of carbon contained therein whether produced by cementation, or converted, cast, or made from iron or its ores, by the crucible, Bessemer, Clapp-Griffiths, pneumatic, Thomas-Gilchrist, basic, Siemens-Martin, or open-hearth process, or by the equivalent of either, or by a combination of two or more of the processes, or their equivalents, or by any fusion or other process which produces from iron or its ores a metal either granular or fibrous in structure, which is cast and malleable, excepting what is known as malleable-iron castings, shall be classed and denominated as steel.

151. No article not specially provided for in this act, wholly or partly manufactured from tin plate,terne plate, or the sheet, plate, hoop, band, or scroll iron or steel herein provided for, or of which such tin plate,terne plate, sheet, plate, hoop, band, or scroll iron or steel shall be the material of chief value, shall pay a lower rate of duty than that imposed on the tin plate,terne plate, or sheet, plate, hoop, band, or scroll iron or steel from which it is made, or of which it shall be the component thereof of chief value. [Not in old law.]

152. On all iron or steel bars or rods of whatever shape or section, which are cold rolled, cold hammered, or polished in any way in addition to the ordinary process of hot rolling or hammering, there shall be paid one-fourth of one cent per pound in addition to the rates provided in this act; and on all strips, plates or sheets of iron or steel of whatever shape, other than the polished, planished or glanced sheet-iron or sheet-steel hereinbefore provided for, which are cold rolled, cold hammered, blued, brightened, tempered or polished by any process to such perfected surface finish, or polish better than the grade of cold rolled, smooth only, hereinbefore provided for, there shall be paid one and one-fourth cents per pound in addition to the rates provided in this act upon plates, strips, or sheets of iron or steel of common or black finish; and on steel circular saw plates there shall be paid one cent per pound in addition to the rate provided in this act for steel saw plates.

MANUFACTURES OF IRON AND STEEL.

153. Anchors, or parts thereof, of iron or steel, mill-irons and mill-cranks of wrought-iron, and wrought-iron for ships, and forgings of iron or steel, or of combined iron and steel, for vessels, steam-engines, and locomotives, or parts thereof, weighing each twenty-five pounds or more, one and eight-tenths cents per pound. [Old law: Two cents per pound.]

154. Axles, or parts thereof, axle-bars, axle-blanks, or forgings for axles, whether of iron or steel, without reference to the stage or state of manufacture, two cents per pound; *Provided*, that when iron or steel axles are imported fitted in wheels, or parts of wheels, of iron or steel, they shall be dutiable at the same rate as the wheels in which they are fitted. [Old law: Two and a half cents per pound.]

155. Anvils of iron or steel, or of iron and steel combined, by whatever process made, or in whatever stage of manufacture, two and one-half cents per pound. [New language. No change in rate.]

156. Blacksmiths' hammers and sledges, track tools, wedges, and crowbars, whether of iron or steel, two and one-fourth cents per pound. [Old law: Two and one-half cents per pound.]

157. Boiler or other tubes, pipes, flues, or stays of wrought-iron or steel, two and one-half cents per pound. [Old law: Two and one-fourth and three cents per pound.]

158. Bolts, with or without threads or nuts, or bolt-blanks, and finished hinges or hinge blanks, whether of iron or steel, two and one-fourth cents per pound. [Old law: Two and one-half cents per pound.]

159. Card-clothing, manufactured from tempered steel wire, fifty cents per square foot; all other, twenty-five cents per square foot. [Old law: Forty-five per centum and twenty-five per centum.]

160. Cast-iron pipe of every description, nine-tenths of one cent per pound. [Old law: One cent per pound.]

161. Cast-iron vessels, plates, stove-plates, andirons, sad-irons, tailors' irons, hatters' irons, and castings of iron, not specially provided for in this act, one and two-tenths cents per pound. [Old law: One and one-fourth cents per pound.]

162. Castings of malleable iron not specially provided for in this act, one and three-fourths cents per pound. [Old law: Two cents per pound.]

163. Cast hollow-ware, coated, glazed, or tinned, three cents per pound. [Old law: All hollow-ware, coated, glazed, or tinned, three cents per pound.]

164. Chain or chains of all kinds, made of iron or steel, not less than three-fourths of

one inch in diameter, one and six-tenths cents per pound; less than three-fourths of one inch and not less than three-eighths of one inch in diameter, one and eight-tenths cents per pound; less than three-eighths of one inch in diameter, two and one-half cents per pound, but no chain or chains of any description shall pay a lower rate of duty than forty-five per centum ad valorem. [Old law: One and three-fourths cents per pound; two cents per pound; two and one-half cents per pound.]

CUTLERY.

165. Pen-knives or pocket-knives of all kinds, or parts thereof, and erasers, or parts thereof, wholly or partly manufactured, valued at not more than fifty cents per dozen, twelve cents per dozen; valued at more than fifty cents per dozen and not exceeding one dollar and fifty cents per dozen, fifty cents per dozen; valued at more than one dollar and fifty cents per dozen and not exceeding three dollars per dozen, one dollar per dozen; valued at more than three dollars per dozen, two dollars per dozen; and in addition thereto on all the above, fifty per centum ad valorem. Razors and razor blades, finished or unfinished, valued at less than four dollars per dozen, one dollar per dozen; valued at four dollars or more per dozen, one dollar and seventy-five cents per dozen; and in addition thereto on all the above razors and razor-blades, thirty per centum ad valorem. [Old law: Pen-knives, pocket-knives, of all kinds, and razors, fifty per centum; cutlery not specially provided for, thirty-five per centum.]

166. Swords, sword-blades, and side-arms, thirty-five per centum ad valorem.

167. Table-knives, forks, steels, and all butchers', hunting, kitchen, bread, butter, vegetable, fruit, cheese, plumbers', painters', palette, and artists' knives of all sizes, finished or unfinished, valued at not more than one dollar per dozen pieces, ten cents per dozen, valued at more than one dollar and not more than two dollars, thirty-five cents per dozen; valued at more than two dollars and not more than three dollars, forty cents per dozen, valued at more than three dollars and not more than eight dollars, one dollar per dozen; valued at more than eight dollars, two dollars per dozen; and in addition upon all the above-named articles, thirty per centum ad valorem. All carving and cooks' knives and forks of all sizes finished or unfinished, valued at not more than four dollars per dozen pieces, one dollar per dozen; valued at more than four dollars and not more than eight dollars, two dollars per dozen pieces; valued at more than eight dollars and not more than twelve dollars, three dollars per dozen pieces; valued at more than twelve dollars, five dollars per dozen pieces; and in addition upon all the above-named articles, thirty per centum ad valorem. [Old law: Cutlery not specially provided for, thirty-five per centum.]

168. Files, file-blanks, rasps, and floats, of all cuts and kinds, four inches in length and under, thirty-five cents per dozen; over four inches in length and under nine inches, seventy-five cents per dozen; nine inches in length and under fourteen inches, one dollar and thirty cents per dozen; fourteen inches in length and over, two dollars per dozen. [Old law: Nine inches and under four inches, one dollar and fifty cents per dozen; fourteen inches and over, two dollars and fifty cents per dozen.]

FIRE-ARMS.

169. Muskets and sporting rifles, twenty-five per centum ad valorem. [Old law: Muskets, rifles, and other fire-arms, not specially provided for, twenty-five per centum.]

170. All double-barrelled, sporting, breech-

loading shot-guns valued at not more than six dollars each, one dollar and fifty cents each; valued at more than six dollars and not more than twelve dollars each, four dollars each; valued at more than twelve dollars each, six dollars each; and in addition thereto on all the above, thirty-five per centum ad valorem. Single-barrel, breech-loading shot-guns, one dollar each and thirty-five per centum ad valorem. Revolving pistols valued at not more than one dollar and fifty cents each, forty cents each; valued at more than one dollar and fifty cents, one dollar each; and in addition thereto on all the above pistols, thirty-five per centum ad valorem. [Old law: Thirty-five per centum.]

171. Iron or steel sheets, plates, wares, or articles, enameled or glazed with vitreous glasses, forty-five per centum ad valorem. [NOTE—Not in old law. Rates various.]

172. Iron or steel sheets, plates, wares, or articles, enameled or glazed as above with more than one color, or ornamented, fifty per centum ad valorem. [Not in old law. Rates various.]

NAILS, SPIKES, TACKS, AND NEEDLES.

173. Cut nails and cut spikes of iron or steel, one cent per pound. [Old law: One and one-fourth cents per pound.]

174. Horseshoe nails, hob nails, and all other wrought iron or steel nails not specially provided for in this act, four cents per pound.

175. Wire nails made of wrought iron or steel, two inches long and longer, not lighter than number twelve wire gauge, two cents per pound; from one inch to two inches in length, and lighter than number twelve and not lighter than number sixteen wire gauge, two and one-half cents per pound; shorter than one inch and lighter than number sixteen wire gauge, four cents per pound. [Old law: Four cents per pound.]

176. Spikes, nuts, and washers, and horse, mule, or ox shoes, of wrought iron or steel, one and eight-tenths cents per pound. [Old law: Two cents per pound.]

177. Cut tacks, brads, or sprigs, not exceeding sixteen ounces to the thousand, two and one-fourth cents per thousand; exceeding sixteen ounces to the thousand, two and three-fourths cents per thousand. [Old law: Two and one-half cents per pound; three cents per pound.]

178. Needles for knitting or sewing machines, crochet-needles, and tape-needles and bodkins of metal, thirty-five per centum ad valorem. [Old law: Twenty-five per centum and thirty-five per centum.]

179. Needles, knitting, and all others not specially provided for in this act, twenty-five per centum ad valorem.

PLATES.

180. Steel plates engraved, stereotype plates, *electrotype plates, and plates of other materials, engraved or lithographed, for printing*, twenty-five per centum ad valorem.

181. Railway fish-plates or splice-bars, made of iron or steel, one cent per pound. [Old law: One and one-fourth cents per pound.]

182. Rivets of iron or steel, two and one-half cents per pound.

183. Saws: Cross-cut saws, eight cents per linear foot; mill, pit, and drag-saws, not over nine inches wide, ten cents per linear foot; over nine inches wide, fifteen cents per linear foot; circular saws, thirty per centum ad valorem; hand, back, and all other saws, not especially provided for in this act, forty per centum ad valorem.

184. Screws, commonly called wood-screws, more than two inches in length, five cents per pound; over one inch and not more than two inches in length, seven cents per pound; over

one-half inch and not more than one inch in length, ten cents per pound; one-half inch and less in length, fourteen cents per pound. [Old law: Six cents per pound; eight cents per pound; ten cents per pound; fourteen cents per pound, respectively.]

185. Wheels, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured, two and one-half cents per pound; and ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, one and three-fourths cents per pound: *Provided*, That when wheels or parts thereof, of iron or steel, are imported with iron or steel axles fitted in them, the wheels and axles together shall be dutiable at the same rate as is provided for the wheels when imported separately. [Old law: Steel wheels and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, and other railway tires, or parts thereof, wholly or partly manufactured, two and one-half of one cent per pound; iron or steel ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, two cents per pound.]

MISCELLANEOUS METALS AND MANUFACTURES OF.

186. Aluminium or aluminum, in crude form, and alloys of any kind in which aluminum is the component material of chief value, fifteen cents per pound. [Old law: Free.]

187. Antimony, as regulus or metal, three-fourths of one cent per pound.

188. Argentine, albata, or German silver, unmanufactured, twenty-five per centum ad valorem.

189. Brass, in bars or pigs, old brass, clippings from brass or Dutch-metal, and old sheathing, or yellow metal, fit only for remanufacture, one and one-half cents per pound.

190. Bronze powder, twelve cents per pound; bronze or Dutch-metal, or aluminum, in leaf, eight cents per package of one hundred leaves. [Old law: Bronze Dutch metal in leaf, ten per centum; bronze powder, fifteen per centum.]

COPPER.

191. Copper imported in the form of ores, one-half of one cent per pound on each pound of fine copper contained therein. [Old law: Two and one-half cents per pound.]

192. Old copper, fit only for remanufacture, clippings from new copper, and all composition metal of which copper is a component material of chief value, not specially provided for in this act, one cent per pound. [Old law: Three cents per pound.]

193. Regulus of copper and black or coarse copper, and copper cement, one cent per pound on each pound of fine copper contained therein. [Old law: Three and one-half cents per pound.]

194. Copper in plates, bars, ingots, Chili or other pigs, and in other forms, not manufactured, not specially provided for in this act, one and one-fourth cents per pound. [Old law: Four cents per pound.]

195. Copper in rolled plates, called braziers' copper, sheets, rods, pipes, and copper bottoms, also sheathing or yellow metal of which copper is the component material of chief value, and not composed wholly or in part of iron ungalvanized, thirty-five per centum ad valorem. [In old law, and omitted: Sheathing, or yellow metal, not wholly of copper, nor wholly nor in part of iron, ungalvanized, in sheets, forty-eight inches long and fourteen inches wide, and weighing from fourteen to thirty-four ounces per square foot. thirty-five

per centum ad valorem; copper, when imported for the United States Mint, free.]

SCHEDULE E.—SUGAR.

231. That on and after July first, eighteen hundred and ninety-one, and until July first, nineteen hundred and five, there shall be paid, from any moneys in the Treasury not otherwise appropriated, under the provisions of section three thousand six hundred and eighty-nine of the Revised Statutes, to the producer of sugar testing not less than ninety degrees by the polariscope, from beets, sorghum, or sugar-cane grown within the United States, or from maple sap produced within the United States, a bounty of two cents per pound; and upon such sugar testing less than ninety degrees by the polariscope, and not less than eighty degrees, a bounty of one and three-fourths cents per pound, under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury shall prescribe.

232. The producer of said sugar to be entitled to said bounty shall have first filed prior to July first, of each year with the Commissioner of Internal Revenue a notice of the place of production, with a general description of the machinery and methods to be employed by him, with an estimate of the amount of sugar proposed to be produced in the current or next ensuing year, including the number of maple trees to be tapped, and an application for a license to so produce, to be accompanied by a bond in a penalty, and with sureties to be approved by the Commissioner of Internal Revenue, conditioned that he will faithfully observe all rules and regulations that shall be prescribed for such manufacture and production of sugar.

233. The Commissioner of Internal Revenue.

upon receiving the application and bond hereinbefore provided for, shall issue to the applicant a license to produce sugar from sorghum, beets, or sugar-cane grown within the United States, or from maple sap produced within the United States at the place and with the machinery and by the methods described in the application; but said license shall not extend beyond one year from the date thereof.

234. No bounty shall be paid to any person engaged in refining sugars which have been imported into the United States or produced in the United States, upon which the bounty herein provided for has already been paid or applied for, nor to any person unless he shall have first been licensed as herein provided, and only upon sugar produced by such person from sorghum, beets, or sugar-cane grown within the United States, or from maple sap produced within the United States. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall from time to time make all needful rules and regulations for the manufacture of sugar from sorghum, beets, or sugar-cane grown within the United States, or from maple sap produced within the United States, and shall, under the direction of the Secretary of the Treasury, exercise supervision and inspection of the manufacture thereof.

235. And for the payment of these bounties the Secretary of the Treasury is authorized to draw warrants on the Treasurer of the United States for such sums as shall be necessary, which sum shall be certified to him by the Commissioner of Internal Revenue, by whom the bounties shall be disbursed, and no bounty shall be allowed or paid to any person licensed as aforesaid in any one year upon any quantity of sugar less than five hundred pounds.

233. That any person who shall knowingly refine or aid in the refining of sugar imported into the United States or upon which the bounty herein provided for has already been paid or applied for, at the place described in the license issued by the Commissioner of Internal Revenue, and any person not entitled to the bounty herein provided for, who shall apply for or receive the same, shall be guilty of a misdemeanor, and, upon conviction thereof, shall pay a fine not exceeding five thousand dollars, or be imprisoned for a period not exceeding five years, or both, in the discretion of the court. SCHEDULE K.—WOOL AND MANUFACTURES OF WOOL.

375. All wools, hair of the camel, goat, alpaca, and other like animals shall be divided for the purpose of fixing the duties to be charged thereon into the three following classes:

376. Class one, that is to say, Merino, mestiza, metz, or metis wools, or other wools of Merino blood, immediate or remote, Down clothing wools, and wools of like character with any of the preceding, including such as have been heretofore usually imported into the United States from Buenos Ayres, New Zealand, Australia, Cape of Good Hope, Russia, Great Britain, Canada, and elsewhere, and also including all wools not hereinafter described or designated in classes two and three.

377. Class two, that is to say, Leicester, Cotswold, Lincolnshire, Down Combing wools, Canada long wools, or other like combing wools of English blood, and usually known by the terms herein used, and also hair of camel, goat, alpaca, and other like animals.

378. Class three, that is to say, Donskoi, native South American, Cordova, Valparaiso, native Smyrna, Russian camel's hair, and including all such wools of like character as have been heretofore usually imported into the United States from Turkey, Greece, Egypt, Syria, and elsewhere, excepting improved wools hereinafter provided for. [Old law: Class three, carpet wools and other similar wools.—Such as Donskoi, native South American, Cordova, Valparaiso, native Smyrna, and including all such wools of like character as have been heretofore usually imported into the United States from Turkey, Greece, Egypt, Syria, and elsewhere.]

379. The standard samples of all wools which are now or may be hereafter deposited in the principal custom houses of the United States, under the authority of the Secretary of the Treasury, shall be the standards for the classification of wools under this act, and the Secretary of the Treasury shall have the authority to renew these standards and to make such additions to them from time to time as may be required, and he shall cause to be deposited like standards in other custom houses of the United States when they may be needed. [New provision.]

380. Whenever wools of class three shall have been improved by the admixture of Merino or English blood from their present character as represented by the standard samples now or hereafter to be deposited in the principal custom-houses of the United States, such improved wools shall be classified for duty either as class one or as class two, as the case may be. [New provision.]

381. The duty on wools of the first class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on wools of the first and second classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed. [Old law: The duty on wools of the first class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on wools of all classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.]

382. Unwashed wools shall be considered such as shall have been shorn from the sheep without any cleansing; that is, in their natural condition. Washed wools shall be considered such as have been washed with water on the sheep's back. Wool washed in any other manner than on the sheep's back shall be considered as scoured wool. [New provision.]

383. The duty upon wool of the sheep or hair of the camel, goat, alpaca, and other like animals which shall be imported in any other than ordinary condition, or which shall be changed by its character or condition for the purpose of evading the duty, or which shall be reduced in value by the admixture of dirt, or any other foreign substance, or which has been sorted or increased in value by the rejection of any part of the original fleece, shall be twice the duty to which it would be otherwise subject: *Provided*, That skirted wools as now imported are hereby excepted. Wools on which a duty is assessed amounting to three times or more than that which would be assessed if said wool was imported unwashed, such duty shall not be doubled on account of its being sorted. If any bale or package of wool or hair specified in this act imported as of any specified class, or claimed by the importer to be dutiable as of any specified class, shall contain any wool or hair subject to a higher rate of duty than the class so specified, the whole bale or package shall be subject to the highest rate of duty chargeable on wool of the class subject to such higher rate of duty, and if any bale or package be claimed by the importer to be shoddy, mungo, flocks, wool, hair, or other material of any class specified in this act, and such bale contain any admixture of any one or more of said materials, or of any other material, the whole bale or package shall be subject to duty at the highest rate imposed upon any article in said bale or package. [Old law: The duty upon wool of the sheep, or hair of the alpaca, goat, and other like animals, which shall be imported in any other than ordinary condition, as now and heretofore practiced, or which shall be

changed in its character or condition for the purpose of evading the duty, or which shall be reduced in value by the admixture of dirt or any other foreign substance, shall be twice the duty to which it would be otherwise subject.)

[Old law: Works of art, painting, statuary, fountains, and other works of art, the production of American artists. But the fact of such production must be verified by the certificate of a consul or minister of the United States indorsed upon the written declaration of the artist; paintings, statuary, fountains, and other works of art, imported expressly for presentation to national institutions, or to any state, or to any municipal corporation or religious corporation or society.]

Works of art, drawings, engravings, photographic pictures and philosophical and scientific apparatus brought by professional artists, lecturers, or scientists arriving from abroad for use by them temporarily for exhibition and in illustration, promotion, and encouragement of art, science, or industry in the United States, and not for sale, and photographic pictures, paintings, and statuary, imported for exhibition by any association established in good faith and duly authorized under the laws of the United States, or of any state, expressly and solely for the promotion and encouragement of science, art or industry, and not intended for sale, shall be admitted free of duty, under such regulations as the Secretary of the Treasury shall prescribe; but bonds shall be given for the payment to the United States of such duties as may be imposed by law upon any and all of such articles as shall not be exported within six months after such importation: *Provided*, That the Secretary of the Treasury may, in his discretion, extend such period for further term of six months in cases where applications therefor shall be made.

Works of art, collections in illustration of the progress of the arts, science, or manufactures, photographs, works in terra cotta, parian, pottery, or porcelain and artistic copies of antiquities in metal or other material, hereafter imported in good faith for permanent exhibition at a fixed place by any society or institution established for the encouragement of the arts or of science, and all like articles imported in good faith by any society or association for the purpose of erecting a public monument, and not intended for sale, nor for any other purpose than herein expressed; but bonds shall be given under such rules and regulations as the Secretary of the Treasury may prescribe,

for the payment of lawful duties which may accrue should any of the articles aforesaid be sold, transferred, or used contrary to this provision, and such articles shall be subject, at any time, to examination and inspection by the proper officers of the customs: *Provided*, That the privileges of this and the preceding section shall not be allowed to associations or corporations engaged in or connected with business of a private or commercial character.

Yams.
Zaffer.

Sec. 3. That with a view to secure reciprocal trade with countries producing the following articles, and for this purpose, on and after the first day of January, eighteen hundred and ninety-two, whenever and so often as the President shall be satisfied that the government of any country producing and exporting sugars, molasses, coffees, teas, and hides, raw and un-cured, or any of such articles, imposes duties or other exactions upon the agricultural or other products of the United States, which in view of the free introduction of such sugar, molasses, coffee, tea, and hides into the United States he may deem to be reciprocally unequal and unreasonable, he shall have the power and it shall be his duty to suspend, by proclamation to that effect, the provisions of this act relating to the free introduction of such sugar, molasses, coffee, tea, and hides, the production of such country, for such time as he shall deem just, and in such case and during such suspension duties shall be levied, collected, and paid upon sugar, molasses, coffee, tea, and hides, the product of or exported from such designated country, as follows—namely:

All sugars not above number thirteen Dutch standard in color shall pay duty on their polariscopic tests as follows, namely:

All sugars not above number thirteen Dutch standard in color, all tank bottoms, sirups of cane juice or of beet juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above seventy-five degrees, seven-tenths of one cent per pound, and for every additional degree or fraction of a degree shown by the polariscopic test, two-hundredths of one cent per pound additional.

All sugars above number thirteen Dutch standard in color shall be classified by the Dutch standard of color and pay duty as follows—namely: All sugar above number thirteen and not above number sixteen Dutch standard of color, one and three-eighths cents per pound.

All sugar above number sixteen and not above number twenty Dutch standard of color, one and five-eighths cents per pound.

All sugar above number twenty Dutch standard of color, two cents per pound.

Molasses testing above fifty-six degrees, four cents per gallon.

Sugar drainings and sugar sweepings shall be subject to duty either as molasses or sugar, as the case may be, according to polariscopic test.

On coffee, three cents per pound.

On tea, ten cents per pound.

Hides, raw or un-cured, whether dry, salted or pickled, Angora goat-skins, raw, without the wool, unmanufactured, asses' skins, raw or unmanufactured, and skins, except sheep-skins, with the wool on, one and one-half cents per pound. [Section 3 is new matter.]

Sec. 4. That there shall be levied, collected and paid on the importation of all raw or unmanufactured articles, not enumerated or provided for in this act, a duty of ten per centum ad valorem; and on all articles manufactured, in whole or in part, not provided for in this act, a duty of twenty per centum ad valorem. [Old law: Ammonia, aqua or water of, twenty per centum. Ammonia, anhydrous, liquefied by

pressure, twenty per centum. Coal-tar, products of, such as naphtha, benzine, benzole, dead oil and pitch, twenty per centum ad valorem. All non-dutiable crude minerals, but which have been advanced in value or condition by refining or grinding, or by other process of manufacture, not specially enumerated or provided for in this act, ten per centum. Candles and tapers of all kinds, twenty per centum.]

Sec. 5. That each and every imported article, not enumerated in this act, which is similar, either in material, quality, texture, or the use to which it may be applied, to any article enumerated in this act as chargeable with duty shall pay the same rate of duty which is levied on the enumerated article which it most resembles in any of the particulars before mentioned; and if any non-enumerated article equally resembles two or more enumerated articles on which different rates of duty are chargeable there shall be levied on such non-enumerated article the same rate of duty as is chargeable on the article which it resembles paying the highest rate of duty; and on articles not enumerated, manufactured of two or more materials, the duty shall be assessed at the highest rate at which the same would be chargeable if composed wholly of the component material thereof of chief value; and the words "component material of chief value," wherever used in this act, shall be held to mean that component material which shall exceed in value any other single component material of the article; and the value of each component material shall be determined by the ascertained value of such material in its condition as found in the article. If two or more rates of duty shall be applicable to any imported article it shall pay duty at the highest of such rates. [Old law: Sec. 2, 4, 5. There shall be levied, collected, and paid on each and every non-enumerated article which bears a similitude, either in material, quality, texture, or the use to which it may be applied, to any article enumerated in this title as chargeable with duty, the same rate of duty which is levied and charged on the enumerated article which it most resembles in any of the particulars before mentioned; and if any non-enumerated article equally resembles two or more enumerated articles on which different rates are chargeable, there shall be levied, collected, and paid on such non-enumerated article the same rate of duty as is chargeable upon the article which it resembles paying the highest duty; and on all articles manufactured from two or more materials the duty shall be assessed at the highest rates at which the component material of chief value may be chargeable. If two or more rates of duty should be applicable to any imported article, it shall be classified for duty under the highest of such rates. *Provided*, That non-enumerated articles similar in material and quality and texture, and the use to which they may be applied, to articles on the free list, and in the manufacture of which no dutiable materials are used, shall be free.]

Sec. 6. That on and after the first day of March, eighteen hundred and ninety-one, all articles of foreign manufacture, such as are usually or ordinarily marked, stamped, branded, or labeled, and all packages containing such or other imported articles, shall, respectively, be plainly marked, stamped, branded, or labeled in legible English words, so as to indicate the country of their origin; and unless so marked, stamped, branded, or labeled they shall not be admitted to entry. [Section 6 is new matter.]

Sec. 7. That on and after March first, eighteen hundred and ninety-one, no article of imported merchandise which shall copy or simulate the name or trade-mark of any

domestic manufacture or manufacturer, shall be admitted to entry at any custom house of the United States. And in order to aid the officers of the customs in enforcing this prohibition any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the Department fac-similes of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs. [Old law: Sec. 2,496. No watches, watch-cases, watch-movements, or parts of watch-movements, or any other articles of foreign manufacture, which shall copy or simulate the name or trade-mark of any domestic manufacturer (manufacturer), shall be admitted to entry at the custom house of the United States, unless such domestic manufacturer is the importer of the same. And in order to aid the officers of the customs in enforcing this prohibition, any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury, under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the Department fac-similes of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs.]

Sec. 8. That all lumber, timber, hemp, manilla, wire rope and iron and steel rods, bars, spikes, nails, plates, tees, angles, beams and bolts and copper and composition metal which may be necessary for the construction and equipment of vessels built in the United States for foreign account and ownership or for the purpose of being employed in the foreign trade, including the trade between the Atlantic and Pacific ports of the United States, after the passage of this act, may be imported in bond, under such regulations as the Secretary of the Treasury may prescribe; and upon proof that such materials have been used for such purpose no duties shall be paid thereon. But vessels receiving the benefit of this section shall not be allowed to engage in the coastwise trade of the United States more than two months in any one year, except upon the payment to the United States of the duties on which a rebate is herein allowed: *Provided, That vessels built in the United States for foreign account and ownership shall not be allowed to engage in the coastwise trade of the United States.*

Sec. 9. That all articles of foreign production needed for the repair of American vessels engaged in foreign trade, including the trade between the Atlantic and Pacific ports of the United States, may be withdrawn from bonded warehouses free of duty, under such regulations as the Secretary of the Treasury may prescribe.

Sec. 10. That all medicines, preparations, compositions, perfumery, cosmetics, cordials and other liquors manufactured wholly or in part of domestic spirits, intended for exportation, as provided by law, in order to be manufactured and sold or removed, without being charged with duty and without having a stamp affixed thereto, shall, under such regulations as the Secretary of the Treasury may prescribe, be made and manufactured in warehouses similarly constructed to those known and designated in Treasury regulations as bonded warehouses, class two: *Provided,*

That such manufacturer shall first give satisfactory bonds to the collector of internal revenue for the faithful observance of all the provisions of law and the regulations as aforesaid, in amount not less than half of that required by the regulations of the Secretary of the Treasury from persons allowed bonded warehouses. Such goods, when manufactured in such warehouses, may be removed for exportation under the direction of the proper officer having charge thereof, who shall be designated by the Secretary of the Treasury, without being charged with duty, and without having a stamp affixed thereto. Any manufacturer of the articles aforesaid, or any of them, having such bonded warehouse as aforesaid, shall be at liberty, under such regulations as the Secretary of the Treasury may prescribe, to convey therein any materials to be used in such manufacture which are allowed by the provisions of law to be exported free from tax or duty, as well as the necessary materials, implements, packages, vessels, brands, and labels for the preparation, putting up, and export of the said manufactured articles; and every article so used shall be exempt from the payment of stamp and excise duty by such manufacturer. Articles and materials so to be used may be transferred from any bonded warehouse in which the same may be, under such regulation as the Secretary of the Treasury may prescribe, into any bonded warehouse in which such manufacture may be conducted, and may be used in such manufacture, and when so used shall be exempt from stamp and excise duty; and the receipt of the officer in charge as aforesaid shall be received as a voucher for the manufacture of such articles. Any materials imported into the United States may, under such rules as the Secretary of the Treasury may prescribe, and under the direction of the proper officer, be removed in original packages from on shipboard, or from the bonded warehouse in which the same may be, into the bonded warehouse in which such manufacture may be carried on, for the purpose of being used in such manufacture, without payment of duties thereon, and may there be used in such manufacture. No article so removed, nor any article manufactured in said bonded warehouse, shall be taken therefrom except for exportation, under the direction of the proper officer having charge thereof as aforesaid, whose certificate, describing the articles by their mark or otherwise, the quantity, the date of importation, and name of vessel, with such additional particulars as may from time to time be required, shall be received by the collector of customs in cancellation of the bond or return of the amount of foreign import duties. All labor performed and services rendered under these regulations shall be under the supervision of an officer of the customs, and at the expense of the manufacturer. [Some change in text.]

Sec. 11. All persons are prohibited from importing into the United States from any foreign country any obscene book, pamphlet, paper, writing, advertisement, circular, print, picture, drawing or other representation, figure or image on or of paper or other material, or any cast, instrument or other article of an immoral nature, or any drug or medicine, or any article whatever, for the prevention of conception, or for causing unlawful abortion. No such articles, whether imported separately or contained in packages with other goods entitled to entry, shall be admitted to entry; and all such articles shall be proceeded against, seized and forfeited by due course of law. All such prohibited articles and the package in which they are contained in the course of importation shall be detained by the officer of customs, and proceedings taken against the

same as prescribed in the following section, unless it appears to the satisfaction of the collector of customs that the obscene articles contained in the package were inclosed therein without the knowledge or consent of the importer, owner, agent or consignee: *Provided*, That the drugs hereinbefore mentioned, when imported in bulk and not put up for any of the purposes hereinbefore specified are excepted from the operation of this section. [Note—Changes text of sections 2,491, 2,492, 2,493, Revised Statutes.]

Sec. 12. That whoever, being an officer, agent or employe of the government of the United States, shall knowingly aid or abet any person engaged in any violation of any of the provisions of law prohibiting importing, advertising, dealing in, exhibiting or sending or receiving by mail obscene or indecent publications or representations, or means for preventing conception or procuring abortion, or other articles of indecent or immoral use or tendency, shall be deemed guilty of a misdemeanor, and shall for every offense be punishable by a fine of not more than five thousand dollars, or by imprisonment at hard labor for not more than ten years, or both.

Sec. 13. That any judge of any district or circuit court of the United States, within the proper district, before whom complaint in writing of any violation of the two preceding sections is made, to the satisfaction of such judge, and founded on knowledge or belief, and if upon belief, setting forth the grounds of such belief, and supported by oath or affirmation of the complainant, may issue, conformably to the constitution, a warrant directed to the marshal or any deputy marshal, in the proper district, directing him to search for, seize and take possession of any such article or thing mentioned in the two preceding sections, and to make due and immediate return thereof to the end that the same may be condemned and destroyed by proceedings, which shall be conducted in the same manner as other proceedings in the case of municipal seizure, and with the same right of appeal or writ of error.

Sec. 14. That machinery for repair may be imported into the United States without payment of duty, under bond, to be given in double the appraised value thereof, to be withdrawn and exported after said machinery shall have been repaired; and the Secretary of the Treasury is authorized and directed to prescribe such rules and regulations as may be necessary to protect the revenue against fraud, and secure the identity and character of all such importations when again withdrawn and exported, restricting and limiting the export and withdrawal to the same port of entry where imported, and also limiting all bonds to a period of time of not more than six months from the date of the importation.

Sec. 15. That the produce of the forests of the state of Maine upon the St. John river and its tributaries, owned by American citizens, and sawed or hewed in the Province of New Brunswick by American citizens, the same being unmanufactured in whole or in part, which is now admitted into the ports of the United States free of duty, shall continue to be so admitted under such regulations as the Secretary of the Treasury shall, from time to time, prescribe.

Sec. 16. That the produce of the forests of the state of Maine upon the St. Croix river and its tributaries, owned by American citizens, and sawed in the Province of New Brunswick by American citizens, the same being unmanufactured in whole or in part, shall be admitted into the ports of the United States free of duty, under such regulations as the Secretary of the Treasury shall, from time to time, prescribe.

Sec. 17. That a discriminating duty of ten per centum ad valorem, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States; but this discriminating duty shall not apply to goods, wares and merchandise which shall be imported in vessels not of the United States, entitled, by treaty or any act of congress, to be entered in the ports of the United States on payment of the same duties as shall then be paid on goods, wares and merchandise imported in vessels of the United States.

Sec. 18. That no goods, wares or merchandise, unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, together with her cargo, tackle, apparel and furniture, shall be forfeited to the United States; and such goods, wares or merchandise, ship or vessel and cargo shall be liable to be seized, prosecuted and condemned, in like manner, and under the same regulations, restrictions and provisions as have been heretofore established for the recovery, collection, distribution and remission of forfeitures under the United States by the several revenue laws.

Sec. 19. That the preceding section shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

Sec. 20. That the importation of neat cattle and the hides of neat cattle from any foreign country into the United States is prohibited: *Provided*, That the operation of this section shall be suspended as to any foreign country or countries, or any parts of such country or countries, whenever the Secretary of the Treasury shall officially determine, and give public notice thereof that such importation will not tend to the introduction or spread of contagious or infectious diseases among the cattle of the United States; and the Secretary of the Treasury is hereby authorized and empowered, and it shall be his duty, to make all necessary orders and regulations to carry this section into effect, or to suspend the same as therein provided, and to send copies thereof to the proper officers in the United States, and to such officers or agents of the United States in foreign countries as he shall judge necessary.

Sec. 21. That any person convicted of a willful violation of any of the provisions of the preceding section shall be fined not exceeding five hundred dollars, or imprisoned not exceeding one year, or both, in the discretion of the court.

Sec. 22. That upon the reimportation of articles once exported of the growth, product or manufacture of the United States, upon which no internal tax has been assessed, or paid, or upon which such tax has been paid and refunded by allowance or drawback, there shall be levied, collected and paid a duty equal to the tax imposed by the internal-revenue laws upon such articles, *except articles manufactured in bonded warehouses and exported pursuant to law, which shall be subject to the same rate of duty as if originally imported.*

Sec. 23. That whenever any vessel laden with merchandise in whole or in part subject to duty has been sunk in any river, harbor, bay or water subject to the jurisdiction of

the United States, and within its limits, for the period of two years, and is abandoned by the owner thereof, any person who may raise such vessel shall be permitted to bring any merchandise recovered therefrom into the port nearest to the place where such vessel was so raised, free from the payment of any duty thereon, and without being obliged to enter the same at the custom house; but under such regulations as the Secretary of the Treasury may prescribe.

Sec. 24. That the works of manufacturers engaged in smelting or refining metals in the United States may be designated as bonded warehouses under such regulations as the Secretary of the Treasury may prescribe: *Provided*, That such manufacturers shall first give satisfactory bonds to the Secretary of the Treasury. Metals in any crude form requiring smelting or refining to make them readily available in the arts, imported into the United States to be smelted or refined and intended to be exported in a refined but unmanufactured state, shall, under such rules as the Secretary of the Treasury may prescribe and under the direction of the proper officer, be removed in original packages or in bulk from the vessel or other vehicle on which it has been imported, or from the bonded warehouse in which the same may be, into the bonded warehouse in which such smelting and refining may be carried on, for the purpose of being smelted and refined without payment of duties thereon, and may there be smelted and refined together with other metals of home or foreign production: *Provided*, That each day a quantity of refined metal equal to the amount of imported metal refined that day shall be set aside, and such metal so set aside shall not be taken from said works except for exportation, under the direction of the proper officer having charge thereof as aforesaid, whose certificate, describing the articles by their marks or otherwise, the quantity, the date of importation and the name of vessel or other vehicle by which it was imported, with such additional particulars as may from time to time be re-

quired, shall be received by the collector of customs as sufficient evidence of the exportation of the metal, or it may be removed, under such regulations as the Secretary of the Treasury may prescribe, to any other bonded warehouse, or upon entry for, and payment of duties, for domestic consumption. All labor performed and services rendered under these regulations shall be under the supervision of an officer of the customs, to be appointed by the Secretary of the Treasury, and at the expense of the manufacturer. [Note—New provision.]

Sec. 25. That where imported materials on which duties have been paid, are used in the manufacture of articles manufactured or produced in the United States, there shall be allowed on the exportation of such articles a drawback equal in amount to the duties paid on the materials used, less one per centum of such duties: *Provided*, That when the articles exported are made in part from domestic materials, the imported materials, or the parts of the articles made from such materials shall so appear in the completed articles that the quantity or measure thereof may be ascertained. *And provided further*, That the drawback on any article allowed under existing law shall be continued at the rate herein provided. That the imported materials used in the manufacture or production of articles entitled to drawback of customs duties when exported shall in all cases where drawback of duties paid on such materials is claimed, be identified, the quantity of such materials used and the amount of duties paid thereon shall be ascertained, the facts of the manufacture or production of such articles in the United States and their exportation therefrom shall be determined, and the drawback due thereon shall be paid to the manufacturer, producer or exporter, to the agent of either or to the person to whom such manufacturer, producer, exporter or agent shall in writing order such drawback paid, under such regulations as the Secretary of the Treasury shall prescribe. [This is an enlargement of the provisions of sections 3, 019 and 3, 020 Revised Statutes.]

A DECADE OF WHEAT EXPORTS.

By the Department of Agriculture.

The fluctuations of exports of wheat are abrupt and wide and the causes of change are clear. The largest exportation, not only in the period but in the history of the trade, was in 1880-81, amounting to 186,321,514 bushels (wheat and flour), or three-eighths of one of the largest crops. In 1888-89 the exportation—the smallest of the decade—was only 88,600,743 bushels. The second year of the ten witnessed a drop of 64,000,000 bushels, while a

rise of 26,000,000 occurred the next year. Then a fall of 36,000,000 is noted, a rise of 21,000,000, another drop of 38,000,000, and a jump of 59,000,000, the seventh year of the series ranking in volume next to the first. In the following year the decline was 34,000,000 and in the next 31,000,000 more, the only instance of two successive seasons of decline.

The following table indicates the course of these changes:

The aggregate of production, as estimated for these ten years, is 4,496,953,586 bushels. It is 450,000,000 per annum, discarding fractions. Of this nearly 127,000,000 constitute the

annual exports. The average exportation has therefore been 28.2 per cent, though in the first year of the decade, 1880-81, the exports were 37.4 per cent of the product. These ex-

ports will continue to decline in proportion and even in volume as population increases and grain production is extended in competing countries which are not developing so rapidly in general industry.

Now, the reader may ask, is this fluctuation, which is a marked feature of this table, due more to variable foreign demand than to changes in home production? Is it due to the Liverpool demand or the home demand? To both, but in far larger proportion to the home demand, which must be met at whatever cost. There is wider annual fluctuation in the production of the United States than in the combined production of other countries. In 1880 there was a surplus over home requirements of at least 200,000,000 bushels; in 1888 the surplus from the crop, according to the estimate, was only 69,000,000 bushels, trenching on prior reserves 19,000,000 bushels to eke out the actual sum of exports, which were less than half those of 1880-81. The foreign trade was cut down inexorably by the requirements of home consumption. When our wheat shall all be required at home there will be no exports, as prices will be permanently higher here than at Liverpool, as they have been occasionally heretofore, temporarily checking, exportation.

Another peculiarity of the history of our wheat exportation is the changing proportion of wheat and flour. In twenty-five years, from 1825 to 1850, the sum of wheat exports in the form of grain was only 15,714,039 bushels, while the exports of flour were equivalent to 162,731,805 bushels of wheat. It was shipped as flour almost exclusively. In 1859-60 the wheat shipments were 4,155,153 bushels and the flour equal to 11,752,182, and in the ten previous years the wheat had been about 52,000,000 bushels and the flour 125,000,000 bushels.

At this date a great change occurred. It

was a day of revolution, industrial and commercial as well as political. For four years the average shipments of wheat exceeded 32,000,000 bushels and of wheat both as flour and grain over 51,000,000 bushels, grain largely predominating each year. A sudden decline occurred at the close of the war and for 1867-68 flour again predominated. During the decade following 1880 the extremes of annual exportation ranged from nearly 12,000,000 to over 59,000,000.

The extraordinary increase of foreign demand between 1870 and 1880 dazed and dumfounded both farmer and grain dealer and excited in both the craze to supply "the markets of the world" with wheat. In thirty-five years—1825 to 1860—there had been 373,340,302 bushels of wheat exported, and in two years, from the crops of 1879 and 1880, the exports were 366,625,694 bushels.

A partial failure of crops in western Europe for several successive years caused a large portion of this demand. Not only American growers but those of Australia and India and South America were aroused to competition for the great demand of which they vainly assumed the continuance. The acreage had been doubled in fifteen years in this country. In five years the record of the statistician was as follows: "The expected has arrived. The prediction has been fulfilled. Wheat was in 1885 at the lowest figure in England for 125 years." Following better yields in Europe the imports of wheat declined and have never since equaled the figures of those years of scarcity. The reduced product of the present year in this country and some others and diminished stocks of grain in the principal foreign markets have already advanced prices materially, which will continue fairly remunerative until a reduction is again compelled by increasing stocks and products.

* This tariff admitted nearly all the fine wools of South America and Cape of Good Hope and many of those grown in Australia free. Wool costing over 20 cents was taxed 24 per cent ad valorem. † Wool costing over 24 cents, 9 cents per pound. As under this clause only very high-cost scoured wools would be selected, the duty might be less than 20 per cent.

THE ILLINOIS SCHOOL LAW.

An act concerning the education of children. Section 1. Be it enacted by the people of the state of Illinois, represented in the general assembly: That every person having under his control a child between the ages of 7 and 14 years shall annually cause such child to attend for at least sixteen weeks, at least eight weeks of which attendance shall be consecutive, some public day school in the city, town or district in which he resides, which time shall commence with the beginning of the first term of the school year, or as soon thereafter as due notice shall be served upon the person having such control, of his duty under this act. For every neglect of such duty the person offending shall forfeit to the use of public schools of such city or district a sum not less than \$1 nor more than \$20, and shall stand committed until such fine and costs of suit are paid. But if the person so neglecting shall show to the satisfaction of the board of education or of directors that such child has attended for a like period of time a private day school approved by the board of education or directors of the city, town or district in which such child resides; or that instruction has otherwise been given for a like period of time to such child in the branches commonly taught in the public school; or that such child has already acquired the branches of learning taught in the public schools; or that his physical or mental condition, as declared by a competent physician, is such as to render such attendance inexpedient and impracticable, then such penalty shall not be incurred. Such fine shall be paid when collected to the school treasurer of such city or township, to be accounted for by him as other school money raised for school purposes. But no school shall be regarded as a school under this act unless there shall be taught therein, in the English language, reading, writing, arithmetic, history of the United States and geography.

Sec. 2. It shall be the duty of the board of education in every city and the board of

school directors in every school district to appoint one or more truant officers, whose duty it shall be carefully to inquire concerning all supposed violations of this act and to enter complaint against all persons who shall appear to be guilty of such violation. It shall also be the duty of said officer to arrest children of a school-going age who habitually haunt public places and have no lawful occupation, and also truant children who absent themselves from school without leave, and to place them in charge of the teacher having charge of the public school which the said children are by law entitled to attend. And it shall be the duty of said teacher to assign said children to the proper classes and to instruct them in such studies as they are fitted to pursue. Said truant officers shall have such compensation for services rendered under this act as shall be determined by the board of education or the board of directors appointing such officers, which compensation shall be paid from the distributable school fund.

Sec. 3. Any person having control of a child, who, with intent to evade the provisions of this act, shall make a willful false statement concerning the age of such child or the time such child has attended school shall for such offense forfeit a sum of not less than \$3 nor more than \$20 for the use of the public schools of such city or district.

Sec. 4. Prosecutions under this act shall be instituted and carried on by the authorities of such boards, and be brought in the name of the people of the state of Illinois for the use of the school fund of said city or township.

Sec. 5. Police, municipal courts, justices of the peace and judges of the County court shall have jurisdiction within their respective counties of the offense described in this act.

THE BENNETT LAW OF WISCONSIN.

An act concerning the education and employment of children. The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

Section 1. Every parent or other person having under his control a child between the ages of 7 and 14 years shall annually cause such child to attend some public or private day school in the city, town or district in which he resides, for a period not less than twelve weeks in each year, which number of weeks shall be fixed prior to the first day of September in each year by the board of education or board of directors of the city, town or district, and for a portion or portions thereof, to be so fixed by such boards, the attendance shall be consecutive, and such boards shall, at least ten days prior to the beginning of such period, publish the time or times of attendance, in such manner as such boards shall direct; provided that such boards shall not fix such compulsory period at more than twenty-four weeks in each year.

Sec. 2. For every neglect of such duty the person having such control and so offending shall forfeit to the use of the public schools of such city, town or district a sum not less than three dollars (\$3) nor more than twenty-dollars (\$20); and failure for each week or portion of a week on the part of any such person to comply with the provisions of this act shall constitute a distinct offense; provided, that any such child shall be excused from attendance at

school required by this act by the board of education or school directors of the city, town or district in which such child resides upon its being shown to their satisfaction that the person so neglecting is not able to send such child to school, or that instruction has otherwise been given for a like period of time to such child in the elementary branches commonly taught in the public schools, or that such child has already acquired such elementary branches of learning, or that his physical or mental condition is such as to render attendance inexpedient or impracticable, and in all cases where such child shall be so excused the penalty herein provided shall not be incurred.

Sec. 3. Any person having control of a child, who, with intent to evade the provisions of this act, shall make a willful false statement concerning the age of such child or the time such child has attended school shall, for such offense, forfeit a sum of not less than three dollars (\$3) nor more than twenty dollars (\$20) for the use of the public schools of such city, town or district.

Sec. 4. Five days prior to the beginning of any prosecution under this act such board shall cause a written notice to be personally served upon such person having control of any such child, of his duty under this act and of his default in failing to comply with the provisions hereof, and if, upon the hearing of such prosecution, it shall appear to the satisfaction of the court that before or after the receipt of

such notice such person has caused such child to attend a school as provided in this act in good faith and with intent to continue such attendance, then the penalty provided by this act shall not be incurred.

Sec. 5. No school shall be regarded as a school under this act unless there shall be taught therein, as part of the elementary education of children, reading, writing, arithmetic and United States history in the English language.

Sec. 6. Prosecutions under this act shall only be instituted and carried on by the authority of such boards, and shall be brought in the name of said boards, and all fines and penalties, when collected, shall be paid to the school treasurer of such city, town or district, or other officer entitled to receive school moneys, the same to be held and accounted for as other school moneys received for school purposes.

Sec. 7. Jurisdiction to enforce the penalties herein described in this act is hereby conferred on justices of the peace and police magistrates within their respective counties.

Sec. 8. Any child between the age of 9 and 14 years who, without leave and against the will of his parent, guardian or other person having the right to control such child, habitually absents himself from the school to which he is sent or directed to be sent, and is beyond the control of his parent or guardian or other person having the right to control such child in that regard, and wanders or loiters in streets, alleys or other public places, shall be deemed a truant child and on such truancy being alleged and proved such truant child shall be adjudged a dependent

child in like manner as is now provided by law for the adjudication of dependent children, and on being so adjudged dependent may be committed in like manner for such time, not exceeding two years, as the judge or court having the jurisdiction of the matter may determine. Any child so committed may, upon proof of amendment, or for sufficient cause shown upon a hearing of the case, be discharged by such judge or court at any time, but such child shall not be so confined after the age of 14 years, nor shall he be bound or apprenticed nor placed out of any school to which he shall be committed. Officers appointed by the board of education or board of school directors shall have power and authority to take a truant child found on the streets, alleys or other public places during school hours to such school conveniently located to the home of such child as may be designated and requested by such parent, guardian or other person having the right to control such child, and such officer shall ascertain from such parent, guardian or other person having the right to control such child the school which he desires such child shall attend; or in case of refusal to designate and request by the parent, guardian or other person having the right to control such child; or in case such child has no parent, guardian or other person in control, then to the public school situated in the district where such child lives, or to such public school as such board may direct.

This act was approved April 18, 1889. The remaining sections regulate the employment of children in factories, shops, mills, etc., and do not bear on the subject of education.

SALES OF BEER.

A Continued Increase in High License and Decrease in Prohibition States.

The following figures from the Brewers' Hand-Book, just issued for the current year, show the number of barrels of beer sold in each state of the union for the years ending

April 30, 1889 and 1890. The representative high-license states of Georgia, Illinois, Michigan, Missouri, Pennsylvania, continue to show large gains in the amount of beer sold. On the other hand, the prohibition states of Iowa and Kansas continue to show a corresponding decrease. The prohibition states of Maine and Vermont, it will be noticed, continue to record no sales of beer, as they have done for a number of years.

The World's Columbian Exposition.

ACT OF CONGRESS PROVIDING FOR THE FAIR.

An act to provide for celebrating the four hundredth anniversary of the discovery of America by Christopher Columbus by holding an international exhibition of arts, industries, manufactures and the products of the soil, mine and sea in the city of Chicago, in the state of Illinois.

Whereas, It is fit and appropriate that the four hundredth anniversary of the discovery of America be commemorated by an exhibition of the resources of the United States of America, their development, and of the progress of civilization in the new world; and

Whereas, Such an exhibition should be of a national and international character, so that not only the people of our union and this continent, but those of all nations as well, can participate, and should therefore have the sanction of the congress of the United States; Therefore,

Be it enacted by the senate and house of representatives of the United States of America, in congress assembled, That an exhibition of arts, industries, manufactures, and products of the soil, mine and sea shall be inaugurated in the year eighteen hundred and ninety-two in the city of Chicago, in the state of Illinois, as hereinafter provided.

Sec. 2. That a commission, to consist of two commissioners from each state and territory of the United States and from the District of Columbia and eight commissioners-at-large, is hereby constituted, to be designated as the World's Columbian Commission.

Sec. 3. That said commissioners, two from each state and territory, shall be appointed within thirty days from the passage of this act by the president of the United States, on the nomination of the governors of the states and territories, respectively, and by the president eight commissioners-at-large and two from the District of Columbia; and in the same manner and within the same time there shall be appointed two alternate commissioners from each state and territory of the United States and the District of Columbia and eight alternate commissioners-at-large, who shall assume and perform the duties of such commissioner or commissioners as may be unable to attend the meetings of the said commission; and in such nominations and appointments each of the two leading political parties shall be equally represented. Vacancies in the commission nominated by the governors of the several states and territories respectively, and also vacancies in the commission-at-large and from the District of Columbia, may be filled in the same manner and under the same conditions as provided herein for their original appointment.

Sec. 4. That the secretary of state of the United States shall, immediately after the passage of this act, notify the governors of the several states and territories respectively thereof and request such nominations to be made. The commissioners so appointed shall be called together by the secretary of state of the United States in the city of Chicago, by notice to the commissioners, as soon as convenient after the appointment of said commissioners and within thirty days thereafter. The said commissioners, at said first meeting, shall organize by the election of such officers and the appointment of such committees as they may deem expedient, and for this purpose the commissioners present at said meeting shall constitute a quorum.

Sec. 5. That said commission be empowered in its discretion to accept for the purposes of

the World's Columbian Exposition such site as may be selected and offered and such plans and specifications of buildings to be erected for such purpose at the expense of and tendered by the corporation organized under the laws of the state of Illinois, known as "The World's Exposition of Eighteen Hundred and Ninety-Two;" Provided, That said site so tendered and the buildings proposed to be erected thereon shall be deemed by said commission adequate to the purposes of said Exposition: And provided, That said commission shall be satisfied that the said corporation has an actual bona fide and valid subscription to its capital stock which will secure the payment of at least five millions of dollars, of which not less than five hundred thousand dollars shall have been paid in, and that the further sum of five million dollars, making in all ten million dollars, will be provided by said corporation in ample time for its needful use during the prosecution of the work for the complete preparation for said Exposition.

Sec. 6. That the said commission shall allot space for exhibitors, prepare a classification of exhibits, determine the plan and scope of the Exposition, and shall appoint all judges and examiners for the Exposition, award all premiums, if any, and generally have charge of all intercourse with the exhibitors and the representatives of foreign nations. And said commission is authorized and required to appoint a board of lady managers of such number and to perform such duties as may be prescribed by said commission. Said board may appoint one or more members of all committees authorized to award prizes for exhibits which may be produced in whole or in part by female labor.

Sec. 7. That after the plans for said Exposition shall be prepared by said corporation and approved by said commission, the rules and regulations of said corporation governing rates for entrance and admission fees, or otherwise affecting the rights, privileges or interests of the exhibitors or of the public, shall be fixed or established by said corporation, subject, however, to such modification, if any, as may be imposed by a majority of said commissioners.

Sec. 8. That the president is hereby empowered and directed to hold a naval review in New York harbor, in April, eighteen hundred and ninety-three, and to extend to foreign nations an invitation to send ships-of-war to join the United States navy in rendezvous at Hampton Roads and proceed thence to said review.

Sec. 9. That said commission shall provide for the dedication of the buildings of the World's Columbian Exposition in said city of Chicago on the twelfth day of October, eighteen hundred and ninety-two, with appropriate ceremonies; and said Exposition shall be open to visitors not later than the first day of May, eighteen hundred and ninety-three, and shall be closed at such time as the commission may determine, but not later than the thirtieth day of October thereafter.

Sec. 10. That whenever the president of the United States shall be notified by the commission that provision has been made for grounds and buildings for the uses herein provided for, and there has also been filed with him by the said corporation, known as "The World's Exposition of Eighteen Hundred and Ninety-Two," satisfactory proof that a sum not less than ten million dollars, to be used and ex-

pended for the purposes of the Exposition herein authorized, has in fact been raised or provided for by subscription or other legally binding means, he shall be authorized through the department of state, to make proclamation of the same, setting forth the time at which the Exposition will open and close and the place at which it will be held; and he shall communicate to the diplomatic representatives of foreign nations copies of the same, together with such regulations as may be adopted by the commission, for publication in their respective countries, and he shall, in behalf of the government and people, invite foreign nations to take part in the said Exposition and appoint representatives there-to.

Sec. 11. That all articles which shall be imported from foreign countries for the sole purpose of exhibition at said Exposition, upon which there shall be a tariff or customs duty, shall be admitted free of payment of duty, customs fees, or charges, under such regulations as the secretary of the treasury shall prescribe; but it shall be lawful at any time during the exhibition to sell for delivery at the close of the Exposition any goods or property imported for and actually on exhibition in the Exposition buildings or on its grounds, subject to such regulations for the security of the revenue and for the collection of the import duties as the secretary of the treasury shall prescribe. Provided, That all such articles when sold or withdrawn for consumption in the United States shall be subject to the duty, if any, imposed upon such articles by the revenue laws in force at the date of importation, and all penalties prescribed by law shall be applied and enforced against such articles and against the persons who may be guilty of any illegal sale or withdrawal.

Sec. 12. That the sum of twenty thousand dollars, or as much thereof as may be necessary, be, and the same is hereby appropriated, out of any moneys in the treasury not otherwise appropriated, for the remainder of the present fiscal year and for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, to be expended under the direction of the secretary of the treasury for purposes connected with the admission of foreign goods to said exhibition.

Sec. 13. That it shall be the duty of the commission to make report from time to time to the president of the United States of the progress of the work, and, in a final report, present a full exhibit of the results of the Exposition.

Sec. 14. That the commission hereby authorized shall exist no longer than until the first day of January, eighteen hundred and ninety-eight.

Sec. 15. That the United States shall not in any manner nor under any circumstances be liable for any of the acts, doings, proceedings or representations of the said corporation organized under the laws of the state of Illinois, its officers, agents, servants or employes, or any of them, or for the service, salaries, labor, or wages of said officers, agents, servants or employes, or any of them, or for any subscription to the capital stock, or for any certificates of stock, bonds, mortgages or obligations of any kind issued by said corporation, or for any debts, liabilities or expenses of any kind whatever attending such corporation or accruing by reason of the same.

Sec. 16. That there shall be exhibited at said Exposition, by the government of the United States, from its executive departments, the Smithsonian institution, the United States fish commission and the National museum, such articles and materials as illustrate the functions and administrative faculty of the government in time of peace and its

resources as a war power, tending to demonstrate the nature of our institutions and their adaptation to the wants of the people; and to secure a complete and harmonious arrangement of such a government exhibit a board shall be created to be charged with the selection, preparation, arrangement, safe-keeping and exhibition of such articles and materials as the heads of the several departments and the directors of the Smithsonian institution and National museum may respectively decide shall be embraced in said government exhibit. The president may also designate additional articles for exhibition. Such board shall be composed of one person to be named by the head of each executive department and one by the directors of the Smithsonian institution and National museum and one by the fish commission, such selections to be approved by the president of the United States. The president shall name the chairman of said board, and the board itself shall select such other officers as it may deem necessary.

That the secretary of the treasury is hereby authorized and directed to place on exhibition, upon such grounds as shall be allotted for the purpose, one of the life-saving stations authorized to be constructed on the coast of the United States by existing law, and to cause the same to be fully equipped with all apparatus, furniture and appliances now in use in all life-saving stations in the United States, said building and apparatus to be removed at the close of the exhibition and re-erected at the place now authorized by law.

Sec. 17. That the secretary of the treasury shall cause a suitable building or buildings to be erected on the site selected for the World's Columbian Exposition for the government exhibits, as provided in this act, and he is hereby authorized and directed to contract therefor, in the same manner and under the same regulations as for other public buildings of the United States; but the contracts for said building or buildings shall not exceed the sum of four hundred thousand dollars, and for the remainder of the fiscal year and for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, there is hereby appropriated for said building or buildings, out of any money in the treasury not otherwise appropriated, the sum of one hundred thousand dollars. The secretary of the treasury shall cause the said building or buildings to be constructed, as far as possible, of iron, steel and glass, or of such other material as may be taken out and sold to the best advantage; and he is authorized and required to dispose of such building or buildings, or the material composing the same, at the close of the Exposition, giving preference to the city of Chicago or to the said "World's Exposition of Eighteen Hundred and Ninety-Two," to purchase the same at an appraised value, to be ascertained in such manner as he may determine.

Sec. 18. That for the purpose of paying the expenses of transportation, care and custody of exhibits by the government, and the maintenance of the building or buildings hereinbefore provided for, and the safe return of articles belonging to the said government exhibit, and for the expenses of the commission created by this act, and other contingent expenses, to be approved by the secretary of the treasury upon itemized accounts and vouchers, there is hereby appropriated for the remainder of this fiscal year and for the fiscal year ending June thirtieth, eighteen hundred and ninety-one, out of any money in the treasury not otherwise appropriated, the sum of two hundred thousand dollars, or so much thereof as may be necessary: Provided, That the United States shall not be liable on account of the erection of buildings, expenses of

the commission or any of its officers or employes, or on account of any expenses incident to or growing out of said Exposition, for a sum exceeding in the aggregate one million five hundred thousand dollars.

Sec. 19. That the commissioners and alternate commissioners appointed under this act shall not be entitled to any compensation for their services out of the treasury of the United States, except their actual expenses for transportation and the sum of six dollars per day for subsistence for each day they are necessarily absent from their homes on the business of said commission. The officers of said commission shall receive such compensation as may be fixed by said commission, subject to the approval of the secretary of the treasury, which shall be paid out of the sum appropriated by congress in aid of such Exposition.

Sec. 20. That nothing in this act shall be so construed as to create any liability of the United States, direct or indirect, for any debt or obligation incurred, nor for any claim for aid or pecuniary assistance from congress or the treasury of the United States in support or liquidation of any debts or obligations created by said commission in excess of appropriations made by congress therefor.

Sec. 21. That nothing in this act shall be so construed as to override or interfere with the laws of any state, and all contracts made in any state for the purposes of the exhibition shall be subject to the laws thereof.

Sec. 22. That no member of said commission, whether an officer or otherwise, shall be personally liable for any debt or obligation which may be created or incurred by the said commission. [Approved, April 25, 1890.]

CONTESTING THE LOCATION.

The contesting cities for the location of the world's fair were Chicago, New York, Washington and St. Louis. Each of the cities was represented by committees and all made a strong and determined effort to win the prize. The matter was decided when the vote was taken on the insertion of the name of the city in the bill authorizing the fair. The contest was confined to the house of representatives, the senate being willing to accept any location chosen by the house. Upon location the vote stood for the various cities as follows:

Are We Paying Our Debts?

[From the "Philosophy of Price."]

Here is a table showing the debt of the United States on the 1st day of July, 1886 and 1885, including non-interest-bearing greenbacks, expressed in dollars, and also in the things working folks have to produce in order to get the dollars with which to pay debts and interest:

Debt in—	National Debt, 1886.	National Debt, 1885.
Dollars.....	2,773,000,000	1,830,000,000
Beef, barrels.....	129,000,000	135,000,000
Corn, bushels.....	2,000,000,000	3,000,000,000

Wheat, bushels.....	800,000,000	1,740,000,000
Oats, bushels.....	3,262,000,000	4,357,000,000
Pork, barrels.....	82,000,000	96,000,000
Coal, tons.....	213,000,000	400,000,000
Cotton, bales.....	12,000,000	34,000,000
Bar iron, tons.....	24,000,000	40,000,000

Almost every product of labor shows the same result. We paid from 1866 to 1884 on the public debt: Interest, \$1,870,000,000, and principal about \$1,200,000,000; yet we find that what there is left of it, when measured by labor or the product of labor, is 50 per cent greater than the original debt.

IMPORTANT LEGISLATION.

The following gives a synopsis of the most important laws passed at the first session of the present congress. The world's-fair law is given in full under another heading:

PENSION LEGISLATION.

The disability-pension act provides that in considering the claims of dependent parents the fact of a soldier's death by reason of any wound, injury, casualty or disease which under the conditions and limitations of existing laws would have entitled him to an invalid pension, and the fact that the soldier left no widow or minor children, having been shown as required by law, it shall be necessary only to show by competent and sufficient evidence that such parent or parents are without other means of support than their own manual labor or the contributions of others not legally bound for their support.

All persons who served ninety days or more in the military or naval service during the late war of the rebellion and who have been honorably discharged, and who are now or who may hereafter be suffering from a mental or physical disability of a permanent character, not the result of their own vicious habits, which incapacitates them from the performance of manual labor in such a degree as to render them unable to earn a support, shall, upon making due proof of the fact, be placed upon the list of invalid pensioners and be entitled to receive a pension not exceeding \$12 per month and not less than \$6 per month. Persons who are now receiving pensions under existing laws may receive the benefits of this act; but no person shall receive more than one pension for the same period, and rank in service shall not be considered in applications filed under the act.

If any officer or enlisted man who served ninety days or more in the army or navy of the United States during the war of the rebellion and who was honorably discharged has died or shall hereafter die, leaving a widow without other means of support than her daily labor, or minor children under the age of 16, such widow shall, without proving his death to be the result of his army service, be placed on the pension rolls at the rate of \$3 per month during her widowhood and shall also be paid \$2 per month for each child of such officer or enlisted man under 16 years of age; and in case of the death or remarriage of the widow, leaving such a child or children, the pension shall be paid to such child or children until the age of 16. In case a minor child is insane, idiotic or otherwise permanently helpless the pension shall continue during the life of this child or during the period of disability. This applies to all pensions heretofore granted or hereafter to be granted under this or any former pension laws. But to enable the widow to get the benefit of the act her marriage to the soldier must have been prior to its passage. The fee of any person presenting or prosecuting a pension claim under the act is limited to \$10. Pensions date from the time the application is filed.

An act in relation to oaths in pension cases requires that all affidavits and declarations made or used in pension or bounty cases or in claims against the government for back pay or arrears or increase of pension or for quarterly vouchers may be taken by any officer authorized to administer oaths for general purposes in the state, city or county where he resides. If such officer has a seal and uses it upon such papers no certificate of a county clerk or similar official shall be necessary. This has been amended and construed to mean that when declarations, affidavits and other papers are verified by justices of the peace and other officers duly authorized by

law to administer oaths for general purposes, but not required by law to have seals, the official character, signature and term of service of such justice or other officer shall be certified by the clerk of the county or court of record or other proper officer, under the seal of such county or court or public officer in the department or bureau in which such papers are to be used; and one such certificate duly filed in such department or bureau or with any pension agent shall be sufficient as to all verifications of such officer during his official term, and all papers heretofore or hereafter filed shall be subject to this rule.

The act for the relief of soldiers and sailors who enlisted or served under assumed names, by minors or otherwise, requires the secretary of war and the Secretary of the navy to issue certificates of discharge or orders of acceptance of resignation upon application and proof of identity in the true name of such persons as were honorably discharged. Applications for these certificates of discharge or amended orders of resignation may be made by or on behalf of persons entitled to them, but no such certificate or order shall be issued where a name was assumed to cover a crime or to avoid its consequences.

The act increasing the pensions of soldiers and sailors who are totally helpless from injuries received or diseases contracted while in the service provides that all soldiers, sailors and marines who have since June 16, 1880, or who may hereafter become so totally and permanently helpless from injuries received or disease contracted in the service and line of duty as to require the regular personal aid and attendance of another person, or who, if otherwise entitled, were excluded from the act of June 16, 1880, shall be entitled to a pension at the rate of \$72 per month from the passage of the act or of a certificate of the examining surgeon or board of surgeons showing such degree of disability made subsequent to the passage of the act. This law dates from March 4, 1860.

SILVER LEGISLATION.

The law for the purchase of silver bullion, and the issue of treasury notes thereon, directs the secretary of the treasury to purchase from time to time silver bullion to the aggregate amount of 4,500,000 ounces, or so much thereof as may be offered in each month, at the market price, not exceeding \$1 for 372.25 grains of pure silver, and to issue in payment for these purchases of silver bullion Treasury notes of the United States in denominations not less than \$1 nor more than \$1,000, in such form as the secretary may prescribe. These treasury notes are redeemable on demand in coin at the treasury of the United States or at the office of any assistant treasury clerk. When so redeemed they may be reissued, but no greater or less amounts of such notes shall be outstanding at any time than the cost of the silver bullion and the standard silver dollars coined therefrom then held in the treasury purchased by such notes. These treasury notes are a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract. They are receivable for customs, taxes and all public duty, and when so received may be reissued. Such notes, when held by any national banking association, may be counted as a part of its lawful reserve. Upon demand of the holder of any of these treasury notes the secretary of the treasury, under such regula-

tions as he may prescribe, is required to redeem such notes in gold or silver coin at his discretion. This provision is supplemented by the declaration that it is the established policy of the United States to maintain the two metals on a parity with each other upon the present legal ratio or such ratios as may be provided by law. The secretary of the treasury is required each month to coin 2,000,000 ounces of the silver bullion purchased under the provisions of the act into standard silver dollars until July 1, 1882. After that time he is to coin as much as may be necessary to provide for the redemption of these silver treasury notes, and any gain or seigniorage arising from such coinage is to be accounted for and paid into the treasury. The silver bullion purchased under this law is subject to the requirements of existing law and the regulations of the mint service governing the methods of determining the amount of pure silver contained and the amount of charges or deductions, if any, to be made.

So much of the act of Feb. 28, 1878, which is known as the Bland act, as requires the monthly purchase and coinage of not less than \$2,000,000 nor more than \$4,000,000 worth of silver bullion is repealed. Upon the passage of the act the balances standing with the treasurer of the United States to the respective credits of national banks for deposits made to redeem the circulating notes of such banks and all deposits thereafter received for like purpose are required to be covered into the treasury as a miscellaneous receipt. The treasury redeems from its general cash the circulating notes of these banks which may come into the treasurer's possession subject to redemption. Upon the certificate of the comptroller of the currency that such notes have been received by him and that they have been destroyed and that no new notes will be issued in their place reimbursement of their amount is made to the treasurer from an appropriation specially created, to be known as "National bank notes redemption account." The provisions of the act do not apply to deposits received under Sec. 3 of the act of June 20, 1874, which requires every national bank to keep in lawful money of the treasury of the United States a sum equal to 5 per cent of its circulation, to be held and used for the redemption of its circulating notes. The balance remaining of the deposit so covered at the close of each month is to be reported on the monthly public-debt statement as debt of the United States bearing no interest. This silver legislation went into effect Aug. 13, 1880.

THE ANTI-TRUST LAW.

The act to protect trade and commerce against unlawful restraints and monopolies declares every contract, combination in the form of a trust or otherwise, or conspiracy, a restraint of trade or commerce among the several states or with foreign nations, to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy is to be deemed guilty of a misdemeanor, and, on conviction, to be punished by fine not exceeding \$5,000, or by imprisonment not exceeding one year, or by both in the discretion of the court. Every person who shall monopolize or attempt to monopolize or combine or conspire with any other person or persons to monopolize any part of the trade or commerce among the several states, or with foreign nations, is also to be deemed guilty of a misdemeanor and subject to the same penalty.

Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce in any territory, or of the District of Columbia, or between such territory and another, or such territory and any

state or states, or with foreign nations, is declared illegal, the penalty being the same.

The Circuit courts of the United States are invested with jurisdiction to prevent and restrain violations of the act, and it is made the duty of the federal district attorneys, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. These proceedings may be by way of petition, setting forth the case and praying that such violations shall be enjoined or otherwise prohibited. When the parties complained of have been duly notified of the petition the court shall proceed to the hearing and determination of the case. Pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises. Whenever it shall appear to the court before which such proceeding may be pending that the ends of justice require that other parties should be brought before the court the court may cause them to be summoned, and subpoenas may be served in any district by the marshal thereof.

Any property owned under any contract or by any combination or pursuant to any conspiracy set forth at the outset of the act, and being in course of transportation from one state to another or to a foreign country, shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by the act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover three-fold the damages by him sustained and the costs of the suit, including a reasonable attorney's fee. The word "person or persons," wherever used in the act, includes corporations and associations existing under or authorized by the laws of the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

ORIGINAL PACKAGES.

What is known as the original-package act is designed to cure the anti-prohibition decision of the Supreme court. It provides that all fermented, distilled or other intoxicating liquors or liquids transported into any state or territory or remaining therein for use, consumption, sale or storage therein shall upon arrival in such state or territory be subject to the operation and effect of the laws of such state or territory enacted in the exercise of its police powers to the same extent and in the same manner as though such liquors or liquors had been produced in such state or territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise.

MEAT INSPECTION AND RETALIATION.

The meat-inspection law empowers the secretary of agriculture to make an inspection of salted pork and bacon intended for exportation, with a view to determine whether it is wholesome, sound and fit for human food, whenever the laws or regulations of the foreign government to which such pork or bacon is to be exported requires the inspection of such meats preliminary to importation; also whenever any buyer, seller or exporter of such meats requests the inspection. This inspection is to be made at the place where the meats are packed or boxed, and each package is to bear the marks for identi-

fication which are provided in the regulations of the secretary.

An inspection will also be had at the place of exportation. Three copies of the inspector's certificate are to be issued—one for the department of agriculture, another to be attached to the invoice of each separate shipment and a third to be delivered to the consignor or shipper. Counterfeiting, defacing, altering or destroying any of the marks provided for is made a misdemeanor.

It is made unlawful to import into the United States any adulterated or unwholesome food or drug or any vinous, spirituous or malt liquors adulterated. This offense is also a misdemeanor. Any article of the classes mentioned imported into the United States contrary to the provisions of the law will be forfeited. The retaliatory feature is the provision that whenever the president is satisfied adulterated importations are being made he may issue his proclamation suspending these importations for such time as he may think necessary. Whenever the president is satisfied that unjust discriminations are made by foreign governments against the importation of any product of the United States he may direct such products of the foreign government so discriminating as he may deem proper to be excluded from importation into the United States. This is to be done by proclamation.

The importation of meat, cattle, sheep and other ruminants and swine which are diseased or affected or which have been exposed to infection within sixty days next before their exportation is prohibited. The secretary of agriculture is authorized to place and retain in quarantine all such animals at ports to be designated by him and under such conditions as he may prescribe. Whenever in the opinion of the president it is necessary for the protection of animals in the United States against infectious or contagious diseases he may by proclamation suspend the importation of all or any class of animals for a limited time.

The secretary of agriculture is to cause an inspection to be made of all imported animals prescribed in the act to ascertain whether they are infected with contagious diseases or have been exposed to infection. Such animals shall then either be placed in quarantine or dealt with according to the regulations of the secretary. The secretary of agriculture may also cause inspection to be made of animals intended for exportation and may provide for the disinfection of vessels engaged in their transportation. If upon such inspection any animals are adjudged to be infected or to have been exposed to infection they shall not be allowed to be placed on any vessel for exportation.

NEW STATES ADMITTED.

At the last session congress made provision for the admission of two new states. These were Idaho and Wyoming. In the case of Idaho the territorial constitutional convention of July 4, 1889, was formally approved by ratifying the constitution then adopted. This enabled Idaho to elect a governor and other state officers, to choose a legislature, which has elected two United States senators, and to elect a representative in the house this session. In the case of Wyoming the constitution of Sept. 30, 1889, was ratified and confirmed. Congress did not interfere with the provision in the constitution which allows woman suffrage. Under the admission act Wyoming has already chosen its state officers—a representative in the house. Two United States senators have been chosen by the legislature.

MAKING OKLAHOMA A TERRITORY.

The law creating Oklahoma a territory specifies that it includes all that portion of the United States now known as the Indian territory, except so much of the same as is actually occupied by the five civilized tribes and the Indian tribes within the Qua-Paw Indian agency and except the unoccupied part of the Cherokee outlet, together with that portion of the United States known as the Public Land strip. Congress may at any time hereafter change the boundaries of the territory or attach any portion of it to any other state or territory without the consent of the inhabitants of Oklahoma. The rights of the Indians are carefully guarded. The usual territorial government is created, the executive power being vested in a governor, whose term of office is four years. As is customary in the territories, the legislative assembly consists of a council and a house of representatives. The provisions of the Nebraska statutes so far as locally applicable and not in conflict with the laws of the United States were extended over Oklahoma until after the first session of the legislative assembly. The temporary capital is designated as Guthrie. A delegate to the house of representatives will be elected this fall.

The Oklahoma town-site law limits to 1,280 acres in each case the public lands which may be entered as town sites. The secretary of the interior appoints two trustees to supervise the entry. The secretary may, when practicable, cause more than one town site to be entered. Nothing in the act is to be construed so as to make valid any claim now invalid of those who entered upon and occupied the lands in violation of the laws of the United States or the proclamation of the president. All entries of town sites pending when the law was passed have preference at the local land office of the ordinary business of the office and are to be determined as speedily as possible. When an appeal is taken from the decision of the local office to the commissioner of the general land office it is made special, and so if an appeal should be taken from him to the secretary of the interior. All applications filed previously to the passage of the act in the proper land office have the same force and effect as if made under its provisions. This law became effective May 14.

LAND-GRANT FORFEITURES.

The land-grant forfeiture act forfeits to the United States, which resumes title, all lands heretofore granted to any state or to any corporation to aid in the construction of a railroad opposite to and coterminous with the portion of any such railroad not now completed and in operation, for the construction or benefit of which such lands were granted. These forfeited lands are declared to be part of the public domain, but the right of way for station grounds of the railroads is not included in the forfeiture.

All persons who at the date of the passage of the act were active settlers in good faith on any of the lands forfeited and were otherwise qualified, on making due claim under the homestead law, within six months from the date of passage, shall be entitled to a preferential right to enter the same under the provisions of the homestead law and of the act, and shall be regarded as such settlers from the date of actual settlement or occupation. Any person who has not heretofore had the benefit of the homestead or pre-emption law, or who has failed from any cause to perfect the title to a tract of land heretofore entered by him under either of these laws, may make a second homestead entry under the provisions of the act.

The secretary of the Interior is to make such rules as will secure to such actual settlers these rights. In all cases where citizens of the United States or those who have declared their intention to become such are in possession of any of the lands restored to the public domain under deed, written contract with or license from the state or corporation to which such grant was made, executed prior to Jan. 1, 1888, or where persons may have settled on the land with bona fide intent to settle, they shall be entitled to purchase the same from the United States in quantities not exceeding 320 acres to any one such person at the rate of \$1.25 per acre at any time within two years from the passage of the act.

Where any such person in actual possession of the lands and having improved them prior to Jan. 1, 1880, under the conditions noted above has made partial or full payments, upon proof of the amount of such payments he shall be entitled to have the same to the extent and amount of \$1.25 per acre, if such amount has been paid, credited to him as part of the purchase price to be paid to the United States. Where parties have made improvements upon the lands and are not entitled to enter them under the provisions of the act they shall have six months in which to remove any growing crop, as well as all buildings and other movable improvements. This provision, however, does not apply to any lands situated in the state of Iowa on which any person in good faith has made or asserted the right to make a pre-emption or homestead settlement. It is estimated that between 7,500,000 and 10,000,000 acres will be restored to the public domain, mostly along the line of the Northern Pacific.

THE ANTI-LOTTERY LAW.

The anti-lottery law is of the most stringent kind. It forbids carrying through the mails letters, postal cards or circulars regarding lottery enterprises; also lottery tickets, checks, drafts, bills, money, postal notes, or money orders for the purchase of lottery tickets. Deliveries are also forbidden. No newspaper or printed publication of any kind containing lottery advertisements or lists of prizes awarded can be carried through the mails or delivered. Would-be-purchasers of lottery tickets are also brought within the scope of the law by the provision that any person who shall knowingly deposit or send any of the forbidden documents noted above shall be considered guilty of a misdemeanor and subject to fine and imprisonment or both. Any person violating these provisions may be proceeded against by information or indictment. The trial may be either in the district at which the unlawful publication is mailed or to which it is carried by mail for delivery, according to the direction.

The postmaster-general upon evidence satisfactory to him that any person or company is engaged in conducting any lottery enterprise may instruct postmasters at any post-office at which registered letters arrive directed to such person or company, or to an agent or representative, whether such agent or representative is acting as an individual or as a firm, bank, corporation or association, to return all such registered letters to the postmaster at the office at which they were originally mailed, with the word "fraudulent" written or stamped upon the outside. But the postal authorities have no power to open any letter not addressed to themselves. The public advertisements by any person or company conducting a lottery enterprise that remittances for it may be made by registered letter to any other person, firm, bank, corporation or association is to be prima-facie evidence of the

existence of such agency by all the parties named therein.

This provision is aimed especially at the national banks and the express companies through which the lottery seeks to conduct its business. The postmaster-general, upon satisfactory evidence of any person or company being engaged in the lottery business through the mails, may forbid the payment by any postmaster of any postal money orders drawn to the order of such person or company, or to its agent. But this does not authorize any person to open letters not addressed to himself. The public advertisement by any person or company conducting a lottery enterprise that remittances may be made by postal money order to any other person, firm, etc., named therein, is held to be prima-facie evidence of the existence of the agency.

APPROPRIATIONS FOR THE HENNEPIN CANAL.

The river and harbor bill appropriates \$500,000 to begin the construction of the Illinois and Mississippi canal. This canal is to connect the Illinois river at a point near Hennepin with the Mississippi river at the mouth of the Rock river, together with a branch canal or feeder from Rock river to the main line of the canal. The route of the canal and feeder is to be the one located by the secretary of war under the provisions of the last river and harbor act, and is known as the Rock Island route. The canal and feeder are to be 80 feet wide at the water line and 7 feet deep, the locks 170 feet long and 30 feet wide. The capacity must be for vessels of at least 200 tons burden, with guard gates, locks, basins, bridges, etc., that may be considered necessary for safe and convenient navigation, constructed on plans approved by the secretary of war. The secretary, in his discretion, may change or alter the dimensions of the locks if, in his opinion, the cost of improvement is not thereby increased.

It is made the secretary's duty, in order to secure the right of way for the canal and feeder, to acquire the title to such lands as may be necessary by agreement, purchase or voluntary conveyance from the owners if it can be done on reasonable terms. But if that be found impracticable then the secretary is to apply at any term of the federal Circuit or District court for the northern district of Illinois, in the name of the United States, to institute proceedings to condemn such lands as may be necessary for the right of way. In such proceedings the federal court shall be governed by the laws of Illinois, so far as they may be applicable to the subject of condemning private property for public use. The secretary of war is to cause work on the canal to commence as soon as practicable by the construction of one of the locks and dams on the Rock river at such point as he may deem most advisable.

Something is also done toward the national drainage water-way by the provision appropriating \$25,000 for surveys of the Illinois river from LaSalle to the Mississippi, as recommended by Capt. Marshall, with a view to ascertaining what lands would be subject to overflow by the construction of a navigable water-way between Lake Michigan and the Mississippi.

NAVAL PROGRESS.

An increase in the naval establishment is authorized as follows: Three sea-going, coast-line battle ships, designed to carry the heaviest armor and most powerful ordnance upon a displacement of 8,500 tons, with coal endurance of 5,000 knots; to cost, exclusive of armament and of any premium that may be paid for increased speed, not exceeding \$1,000,000

each; one protected cruiser of 7,300 tons displacement, at a cost, exclusive of armament, not to exceed \$2,750,000, to have a maximum speed of not less than twenty-one knots; one swift torpedo cruiser of 750 tons displacement, exclusive of armament, \$350,000, the maximum speed to be not less than twenty-five knots; one torpedo boat not to exceed \$125,000. One of the vessels is to be built on the Pacific coast, one on the Gulf of Mexico and two on the Atlantic coast; but if it appears to the president when the contracts are opened that the construction on the Pacific coast or Gulf of Mexico is not practicable at a reasonable cost he shall authorize their construction elsewhere in the United States. If the secretary of the navy is unable to contract at reasonable prices for the construction of any of the vessels provided for he may build them in the government navy-yards. The sum of \$1,000,000 is appropriated to enable the navy depart-

ment to buy nickel to be used in making armor plates.

A special act reimburses the survivors of the officers and crews of the Trenton and Vandalia, which were wrecked in the harbor of Apia, Samoan islands, March 16, 1889, and also the survivors of the Nipsic, which was stranded at the same time.

The act providing certificates of honorable service to those who have served in a navy or marine corps who have lost their certificates of discharge authorizes the secretary of the navy to furnish to commissioned officers, regularly volunteered, appointed or enlisted men a certificate of discharge upon satisfactory proof of the loss or destruction of the original certificate, but such certificate shall not be accepted as a voucher for the payment of any claim against the United States for pay, bounty or any other allowance, or as evidence in any other case.

THE PAN-AMERICAN CONFERENCE.

Held in Washington, D. C., 1889 and 1890.

The international American conference was the culmination of a movement inaugurated in 1826 by Gen. Simon Bolivar, the leader of South American independence and the greatest statesman and most successful soldier the southern continent has produced. His purpose, as explained in his so-called "prophetic letter," written in 1815 and addressed to an intimate friend, was the political and commercial unification of the American people against the domination and encroachment of European power and influence; or, as the object has been tersely expressed, "to secure America for the Americans."

Bolivar's conference of 1826 was unsuccessful, and several subsequent attempts—in 1847, 1854, 1881 and 1882—to carry out his idea failed for various reasons; but on the 2d of October, 1889, the eighteen independent nations of the hemisphere (including Hayti) met at the diplomatic chamber of the department of state in Washington to confer, by authorized delegates, concerning certain propositions involving their common welfare and prosperity. The European colonies were not invited to participate. Spain indicated a desire to have Cuba and Porto Rico included in the invitation, but no formal overtures were made. Late in the session of the conference the Hawaiian kingdom, by a unanimous vote of the congress of the United States, was asked to send a delegate; but, although the invitation was promptly accepted, his credentials did not arrive in time for presentation. The republic of San Domingo declined the invitation because certain treaties negotiated some time before were not ratified by the senate of the United States.

The sessions of the conference continued until the 19th of April, 1890, every topic presented for consideration having been discussed and formally disposed of. These topics were twenty-five in number, and upon nineteen of them the action of the conference was unanimous.

THE RESULTS OF THE CONFERENCE.

1. A plan of arbitration was adopted for the settlement of differences between the American nations. The delegates from Chili, under instructions, declined to participate in the discussion because the proposition was contrary to the policy of their government. The delegates from Mexico accepted the plan as a whole but dissented from certain details.

2. The policy of arbitration was formally recommended for the adoption of the European powers, Chili alone declining to concur.

3. The right of conquest was declared to be inadmissible under American public law, Chili alone declining to concur.

4. The establishment of an international American monetary union and the issue of an international coin or coins, to be uniform in weight and fineness, was recommended. The United States government was requested to issue invitations for the first meeting of the union, to be held at Washington in January, 1891, at which the details are to be arranged.

5. The negotiation of reciprocity treaties for the free interchange of certain commodities by the American nations was recommended. To this Chili and the Argentine Republic dissented, for the reason, as alleged, that the United States delegates could give no assurance that their products, chiefly wool, would be admitted free into this country.

6. The appointment of an international commission to superintend a survey for an intercontinental railway was recommended, each nation to contribute its share of the expense.

7. The metric system of weights and measures was recommended for the adoption of all the American republics.

8. The adoption of a uniform system of quarantine regulations was recommended.

9. The establishment of an international American bank to facilitate exchange, and the extension of the credit system in commerce between the American nations was recommended, the headquarters of such bank to be in the United States, with branches in the several other countries.

10. A uniform system of customs regulations for the classification and valuation of merchandise was prepared for the adoption of the several governments.

11. A uniform code of nomenclature to designate articles of import and export was directed to be prepared for the adoption of the several governments.

12. The establishment at Washington of an international bureau of information was recommended.

13. A uniform system of consular invoices and consular fees was prepared and recommended for adoption by the several governments.

14. A uniform system of port charges and tonnage dues was prepared and recommended for adoption.

15. The free navigation of all American rivers was recommended, the delegations from Nicaragua and the United States dissenting.

16. Resolutions were adopted recommending the adoption, as a principle of American

international law, of the proposition that foreigners are entitled to all the civil rights and are subject to all the obligations and responsibilities of natives. To this the United States delegates declined to assent and the delegation from Hayti abstained from voting.

17. A code of civil and commercial law, the rules of procedure and rules for the legalization of documents adopted by the South American conference at Montevideo in 1888, was recommended to the acceptance of all the American nations.

18. A plan for the establishment of rapid and regular steamship communication and the improvement of cable and postal facilities on the Atlantic ocean, under joint subsidies by the various governments interested, was proposed and recommended for adoption.

19. A similar plan for improved communication between the countries bordering on the Pacific was proposed and recommended for adoption.

20. A similar plan for improved communication between the countries bordering on the Gulf of Mexico and the Caribbean sea was proposed and recommended for adoption.

21. A plan for a uniform system of extradition treaties was presented and recommended for adoption.

22. The adoption of a treaty prepared by the South American congress at Montevideo in 1888 for the protection of patents, trade-marks and copyrights in the several American republics was recommended.

23. A resolution was adopted pledging the co-operation of the eighteen American republics to make the proposed celebration at Chicago of the four hundredth anniversary of the discovery of America worthy of the event it is intended to commemorate.

24. A resolution was adopted to place in the diplomatic chamber of the department of state a tablet of bronze, to commemorate the meeting of the conference.

25. It was decided to further commemorate the meeting of the conference by the establishment in Washington of a Latin-American memorial library, to contain all published works concerning America.

SUBSEQUENT ACTION OF THE NATIONS INTERESTED.

The conference was a deliberative body, without final powers. The delegates were authorized to discuss such propositions as were presented for their consideration and make such recommendations, jointly or individually, to their respective governments as they thought proper; but the ratification of their governments is required to make their recommendations effective.

1. Immediately after the adjournment the delegates of eleven of the nations represented having plenipotentiary powers formally accepted the plan of arbitration proposed, and in the name and by the authority of their governments signed a treaty at the department of state. The remaining seven governments have one year from the 21st of April, 1890, to accept and sign the same, when the treaty will be submitted for the ratification of the United States senate. The governments which have not signed are Chili, Mexico, the Argentine Republic, Paraguay, Peru and Hayti.

2. The president of the United States, in obedience to the will of the conference, has transmitted to the several powers of Europe the recommendations of the conference concerning the adoption of the principle of arbitration by them.

3. The congress of the United States has adopted the recommendations of the conference as to the survey for an intercontinental railroad, has appropriated \$65,000 as the share

of the United States of the expense of such survey for the current year, and the president has appointed Alexander J. Cassatt of Pennsylvania, George M. Pullman of Illinois and Henry G. Davis of West Virginia as commissioners on the part of this government. Similar action has been taken by the governments of Mexico, Colombia, Venezuela, Ecuador, Peru, Bolivia, Paraguay, Brazil and the Argentine Republic.

4. The congress of the United States has also accepted the recommendations of the conference as to the establishment of an international monetary union, and the president has issued invitations for a meeting of the delegates at Washington on the first Wednesday in January, 1891 (Jan. 7).

5. The recommendations for the establishment at Washington of a bureau of information have also been adopted, and such a bureau has been organized under the direction of the secretary of state.

6. The preparation of a code of nomenclature of articles of merchandise exported and imported has already been commenced, and such a code will be submitted to the several nations during the present year.

7. The congress of the United States has adopted the recommendations of the conference concerning reciprocity treaties, and has authorized the president to enter into negotiations for the free interchange of certain products with the several countries of Latin America.

Diplomatic negotiations are also in progress for carrying out other recommendations of the conference, and important results will be communicated to congress at its next session.

THE COMMERCE OF THE AMERICAN NATIONS.

The total foreign commerce of the American nations, including the European colonies south of the Gulf of Mexico and the Rio Grande, amounts in round numbers to the value of \$1,200,000,000 annually. This is about equally divided between exports and imports, and the share of each of the independent nations in round numbers is as follows:

The trade of the Central and South American nations is:

COUNTRIES.	Exports.	Imports.	Total.
Mexico.....	\$45,000,000	\$35,000,000	\$80,000,000

INSPECTION OF LIVE STOCK.

In 1888 an urgent appeal was made to this board to establish an inspection of cattle at the Union Stock Yards, Chicago, under the laws of this state, for the purpose of preventing the slaughter for human food of cattle affected with contagious diseases, the reputation of that market—the greatest live-stock

market in the world—being at that time imperiled by the published allegations that cattle affected with diseases liable to be conveyed to human beings were slaughtered and sold for human food. The desired inspection was then established and has been since maintained.

The following table shows the result of the inspection as regards cattle affected with actinomycosis, a contagious disease capable of being conveyed from animals to other animals and to man, from Jan. 1, 1890, to Oct. 31, 1890, giving the states from which the cattle are shipped to market, the number of cattle condemned, slaughtered and the carcasses rendered into fertilizer and the percentage from each state:

Military Societies of the United States.

SOCIETY OF THE CINCINNATI.

The Order of Cincinnati was instituted at the cantonments of the continental army on the Hudson river, May 10, 1783. Membership is restricted to the eldest male descendant of an original member, or to the eldest male descendant of any continental or French officer of the revolution who was qualified by his service to become an original member. There are seven state societies, there having been originally thirteen. Gen. Washington was the first president-general and Alexander Hamilton was the second. Ex-Secretary of State Fish is the ninth.

GRAIN MEASURE.

The standard United States bushel is the "Winchester bushel," which is in cylinder form, 18 3/4 inches in diameter and 8 inches deep, and contains 2,150.4 cubic inches.

TO FIND THE QUANTITY OF GRAIN ANY BIN WILL HOLD.

RULE—Multiply the height, length and breadth together, in inches, and divide by 2,150.4; the quotient will be the number of bushels.

Short but accurate rule for same. Multiply length, breadth and height, in feet, together. Multiply this by 45 and divide product by 56; or to simplify, multiply by 4 and divide by 5.

EXAMPLE—A bin 16 feet long, 8 feet wide, 14 feet high, will hold how many bushels?

$$16 \times 8 \times 14 = 1,792.$$

$$1,792 \times 45 = 80,640.$$

$$80,640 \div 56 = 1,440.$$

TO FIND THE QUANTITY OF GRAIN WHEN HEAPED ON THE FLOOR IN THE FORM OF A CONE.

RULE—Square the depth and square the slant height, in inches. Take their difference and multiply by depth, and this product by .005. The result will be the contents, in bushels.

TO FIND THE QUANTITY OF GRAIN WHEN HEAPED AGAINST A STRAIGHT WALL.

RULE—Square one-half the depth, and proceed as in the previous rule.

TO FIND HOW MANY BUSHELS ANY PYRAMIDAL HOPPER WILL CONTAIN.

RULE—Multiply length by width, in feet, and then multiply this by 1/2 the perpendicular (not slant) height. This product being cubic feet, change to bushels.

EXAMPLE—A hopper is 3 feet square and 2 1/2 feet high, how many bushels will it hold?

$$3 \times 3 \times 2\frac{1}{2} = 21\frac{1}{2} = 21.5$$

$$21.5 \times 5.6 = 120.8$$

NOTE—The above rule is based on the supposition that the hopper is in the form of a pyramid.

A small allowance must be made for that part cut off for the opening, which is of itself a pyramid, and when desirable to estimate the exact capacity of the finished hopper, the capacity of the part cut off may be estimated as per the above rule and deducted from the total capacity obtained by first figuring.

WAGES.

The following are given as reasons why by the day wages in the textile industries are high in America and low in Europe.

Number of looms run by one weaver in cotton mills:

In America.....	6 to 8
In England.....	3 to 4
In Switzerland.....	2 to 3

Number of yards turned out by one weaver of same quality and width of cloth:

In America.....	1,350 yards
In England.....	857 yards
In Switzerland.....	460 yards

Number of spindles in throstle spinning by one spinner (girls):

In America.....	960
In England.....	576

Wages by the yard are lowest in America. Rate per 100 yards of print cloth:

In Fall River.....	40 cents
In Lancashire.....	51 cents
In Switzerland.....	60 cents

WOOLEN MILLS.

Number of looms run in dress goods mills by one weaver:

In America.....	2 looms
In England.....	1 loom

Number of yards turned out per week by one weaver:

In America.....	300 yards
In England.....	105 yards

Number of yards turned out by one weaver on one loom in chevrolet cloth:

In America.....	120 yards
In England.....	80 yards
In Ireland.....	54 yards

INGRAIN CARPET.

Number of yards turned out by one weaver on power looms:

In America.....	180 to 240 yards
In England.....	72 to 120 yards

Rates paid per yard:

In America.....	4 to 5 1/2 cents
In England (power loom).....	4 1/2 cents
In England (hand loom).....	10 cents

To Find the Day.

The following is a simple rule for telling the day of the week for any date. Take the last two figures of the year, add a quarter of this, disregarding the fraction; add the date of the month, and to this add the figure in the following list, one figure standing for each month: 3-6-6-2-4-0-2-5-1-3-6-1. Divide the sum by 7, and the remainder will give the number of the day in the week, and when there is no remainder the day will be Saturday.

As an example, take March 19, 1890. Take 90, add 22, add 19, add 6. This gives 137, which divided by 7 leaves a remainder of 4, which is the number of the day, or Wednesday.

UTTERANCES OF NATIONAL CONVENTIONS, 1890.

Republican League of the United States.

Adopted at Nashville, Tenn., March 5, 1890.

The Republican League of the United States, in convention assembled, heartily congratulates the country upon the success and marvelous prosperity that has attended the first year of republican resumption of power in the federal government. It congratulates President Harrison upon his eminently wise, loyal and courageous administration; declares its absolute confidence in his integrity, ability and patriotism, and pledges him its cordial support in the discharge of the duties devolving upon him as the chief magistrate of the nation. We rejoice in the restoration of dignity, vigor and statesmanship to the conduct of our foreign affairs, as illustrated by the Samoan treaty and the Pan-American congress; in the prudent management of the treasury department, by which the national debt is being extinguished with significant ability and the money market protected against speculative combinations; in the great improvements that have been made in the postal service; in the opening up of new territory to our people; in the progressive policy of the secretary of the navy, and in the faithfulness and practical wisdom that have characterized the present management of the other departments of the government.

We demand the maintenance of the American system of protection to American industry and labor, the policy that has been identified with every period of our national prosperity. But we pledge our support to a thorough and equitable revision of the tariff so as to adapt the protection it affords to changed business conditions, and we arraign the democratic party for the manner in which for years it has prevented the accomplishment of this purpose.

We denounce the practice of the democratic party in its systematic, persistent and outrageous efforts to deprive republicans of the south of the right of franchise; we reassert the expressed determination of the republican party to maintain this right to its fullest extent and to give to all citizens the amplest protection to which they are entitled by the constitution. Any theory of state rights which shall be held to prevent the government from protecting all its citizens in the enjoyment of all their civil, religious and political rights and privileges, is condemned by this convention.

The government of the United States having the unquestioned right to demand of every one of her citizens his best services in her defense in time of peril, whether from within or from without, is bound, therefore, by every principle of honor, consistency and good faith to protect its citizens in the full and free enjoyment of each and every right conferred upon them by the constitution. And this convention protests against the seating in the American congress of any applicant, no matter of which party, who presents himself for admission, unless his election is untainted either by fraud, violence or assassination, and we indorse the present action of congress in carrying out this policy.

We are heartily in favor of the general provisions of the interstate-commerce act and we demand the regulation of all railway and transportation lines in such a manner as to insure fair and reasonable rates to the producers and consumers of the country.

We favor such legislation as will prevent all illegal combinations and unjust exactions by aggregated capital and corporate powers. We insist upon the suppression of all trusts, combines and schemes designed to artificially increase the price of the necessaries of life. At the same time we favor the protection of all

American business interests from destructive and unfair attack.

We emphasize our approval of liberal and equitable pension laws. No soldier, whether disabled in the service or elsewhere, should be permitted to end his days in the poor-house nor should his family be allowed to suffer want. That discriminating preference of union veterans in appointments to public office which is one of the features of this administration is a just and liberal policy toward the soldiers and sailors who defended the government which meets our warmest approval.

We recognize the dignity of labor and the necessity of proper legislation to protect its interests. We shall unwaveringly oppose every attempt to lessen the fruits of toil or to place honest workmen in competition with paupers and convicts, domestic or foreign. The rigid enforcement by this administration of the alien labor contract law commands our approbation. The request of wage-workers for reasonable hours of labor demands and should receive legislative consideration.

We approve the action of the various republican legislatures in adopting a system of ballot reform whereby fraud at the polls is prevented and every elector is enabled to vote independently and intelligently.

We believe the education of the masses to be the best preventive of bad government and we therefore favor federal assistance, where needed, in the work of eliminating illiteracy among our population.

The republican party has always been distinguished for its courage and always has been prompt in recognizing any display of this quality by its leaders. In the line of this policy this convention expresses its approbation of Speaker Reed's action in standing boldly for the principle of majority rule against the democratic power in and out of congress.

National Reform

Adopted at St. Louis Sept. 3, 1890.

We recognize the Almighty Law-Giver who decreed the universal brotherhood of man and gave the rule of life which is the foundation of all true reform: "Whatsoever ye would that men should do unto you, even so do ye also unto them." Using this sentiment as our high ideal, we urgently demand such reforms as shall bring justice and equality of rights, duties and privileges to our people.

We demand the abolition of national banks and the substitution of legal-tender paper money in lieu of national bank notes, said legal tenders to be issued in sufficient volume to do the business of the country on a cash system, regulating the amount needed on a per capita basis as the business interests of the country demand, and that all the money issued by the government shall be a legal tender in payment of all debts, both public and private, regardless of the materials of which it is made, and that it be loaned to all citizens in amounts limited to their actual needs, at a rate of interest to cover the cost of issuing and handling, upon the borrower giving proper security, and that provision be made to loan to the homeless to provide homes. We demand the immediate payment of the bonded debt and condemn the further issue of interest-bearing bonds either by states, territories or municipalities. We demand the free and unlimited coinage of silver. We demand that the words "promise to pay" be omitted from our paper money.

We demand the abolition of the liquor traffic and the prohibition by constitutional amend-

ments, state and national, of the importation, transportation, manufacture and sale of all intoxicating liquors for beverage purposes.

We demand the passage of laws prohibiting the alien ownership of land, and that congress take early action to devise some plan to obtain all lands now held by syndicates, and that all lands held by railroad and other corporations in excess of such as are actually needed by them for the transaction of their business be reclaimed by the government and held for actual settlers, to be limited in quantity to actual occupancy and use.

We demand that the means of communication and transportation shall be controlled by and operated in the interest of the people, as is the United States postal system.

We declare the modern trust and all other combinations which are operated to depress the wages of labor, to lessen the profits of the producer or to enhance prices to the consumer of any article of commerce, or of any lands or stocks, to be a conspiracy against the public welfare; and when such conspiracy is entered into by corporations chartered by the state we demand that the state immediately proceed to annul their charters and wind up their business.

We demand the establishment of a postal telegraph and telephone system under the direct control of the government in connection with the postal department.

We declare that the right to vote is inherent in citizenship irrespective of sex, and is properly within the province of state legislation.

Tariff tax upon the necessities of life has too long oppressed consumers. We therefore demand a revision of the tariff and that the law be so amended as to place it absolutely upon the luxuries rather than the necessities of life.

All corporations being creatures of law, we demand that they be held strictly subject to law. We demand that congress enact a general law regulating the issuing of all charters to incorporated companies which do business across state lines; that every corporation doing business in more than one state be required to procure a charter from the United States government; that the national laws shall definitely specify the duties of all corporations chartered by the nation, requiring justice to employes in treatment, pay and tenure of employment; also limiting stock issues and transfers, official salaries and dividends. We demand that the several states shall enact the same law to apply to local corporations, and in all cases the charters be forfeited for disobedience of law.

Whereas, The soldiers were promised coin payments for services, and whereas the bondholders were promised payment in greenbacks, which last promise was unjustly changed to coin, and whereas the soldier was paid in a depreciated currency, therefore we demand that the soldier shall be paid an amount that will make his payments equivalent to coin at the time said payments were made.

We deprecate war and favor arbitration as the best method of settling all international disputes.

Whereas, our present method of getting the will of the people enacted into statute law is uncertain and often futile; we therefore, to the end that we may have a republic in fact as well as in name, favor the enactment of a law under which the people may vote periodically upon doctrines and policies, without the intervention of parties or candidates, the results of these elections to be considered as instructions to our legislative servants, and to be enforced by impeachment when such instructions are disregarded.

We favor the election of president, vice-president and United States senators by direct vote of the people, and also the election by direct vote of all officials now appointive—except military, diplomatic and consular—where such of-

ficials receive a salary of \$2,000 per annum or upward, and that such voting be done under the Australian system.

We demand that the government provide such arbitration as will prevent strikes and other injurious methods of settling labor troubles, and such as will provide that equal pay be received for equal work by both sexes; that labor, agricultural and co-operative associations be fostered by law, and that the wages of the laborer be secured so far as possible by giving him the first lien on the values he creates.

We favor uniform marriage and divorce laws throughout the United States.

We demand a reform system of voting which will destroy the possibilities of bribery or intimidation.

We demand that all official salaries be reduced in proportion to the reduction of wages and the price of products, and that all fees be covered into the treasury.

We desire the enactment of more stringent immigration laws, and therefore favor such laws as will exclude from landing all paupers, idiots and criminals—excepting those criminals charged with political offenses—and we protest against the importation of laborers previously contracted for by individuals or corporations, and that no person shall be allowed to land as an immigrant except upon the presentation of a duly authenticated certificate, issued in the country from which he or she comes, setting forth the good moral character of the person and indorsed by the United States consul.

We demand the immediate payment at par of that class of United States bonds which were by the law under which they were issued made payable at par at any time when "United States notes shall be convertible into coin at the option of the holder, or unless at such time bonds of the United States bearing a lower rate of interest than the bonds to be redeemed can be sold at par in coin." The above conditions named in the law have existed for years, and we denounce as malfeasance in office the acts of the secretary of the treasury in paying from 24 to 27 cents on the dollar in premiums for bonds which are now legally due and payable at par.

National Congress of Farmers.

Adopted at Council Bluffs, Iowa, Aug. 28, 1890.

Resolved, That the Farmers' congress demands that national taxation be limited to the wants of the government economically administered.

Resolved, That we demand of congress the passage of such laws as will effectually prevent the buying and selling of agricultural and mechanical products with the sole view of settling the difference between the market value of such products at the time of purchase and the time of contract delivery.

Resolved, That the general government be requested to instruct our consuls and agents abroad to take such measures as may be necessary to present the merits of maize in its various forms as an article of food to the people of the country to which they are accredited.

Resolved, That our representatives be requested to provide such appropriations as may be necessary to carry such resolutions into effect.

Resolved, That the National Farmers' congress requests congress to pass a bill giving free transmission through the mails to the reports of state boards of agriculture and state boards of horticulture.

Believing in the doctrine of equal rights to all and special privileges to none, we demand that our national legislation shall be so framed as not in the future to foster and build up one industry at the expense of another, and we

further demand a removal of the heavy tariff tax from the necessaries of life that the poor of our land must have, and placing the same upon the luxuries of life that the wealthy can do without and not suffer.

Whereas, Water-route competition is a most important factor in the regulation and cheapening of transportation charges upon our products from distant markets and the least liable to the control of combines and pools; therefore

Resolved, That we demand of congress most liberal appropriations for the improvement by all practical means of our interior waterways, which shall make them, instead of sources of disaster and destruction to large sections of the country, useful as great highways for the uninterrupted commerce and trade of our people.

Resolved, That we favor the election of United States senators by a vote of the people.

Resolved, That we favor the unlimited coinage of silver.

Resolved, That this congress demands the amendment of the patent law so that the exclusive use of an invention be limited to ten years.

Resolved, That a vote of thanks be tendered to the department of agriculture for the complete eradication of the last vestige of pleuropneumonia from the United States.

Resolved, That at the Columbian exhibition, to be held in Chicago in 1893, the agricultural and horticultural interests of the United States should be most prominently and grandly represented, and to that end it is recommended that the various state legislatures make liberal appropriations for the creditable exhibition of the agricultural and horticultural resources and possibilities of their respective states.

National Greenback.

Adopted at Indianapolis Aug. 28, 1890.

The national greenback party of the United States appeals to the people for support upon

STATE ELECTIONS OF 1890.

Illinois Republicans.

Adopted at Springfield June 24, 1890.

The republican party of Illinois, in delegate convention assembled, declares that we hereby renew our oft-repeated declaration in favor of a free and honest ballot and a fair and honest count of such ballot. We believe that a radical remedy is demanded for all fraudulent practices at elections, and recommend our representatives in the next general assembly to enact the Australian ballot system, with such improvements and safeguards as the experience of other states where it has been adopted and tested may suggest. We further recommend the adoption of the bill now before congress for the protection of all the electors of the United States in the exercise of their blood-bought political rights at the polls.

The republican party has ever been the champion of the American workingman against the oppressions or exactions of corporate monopoly, as various enactments on the Illinois statute books originating with republicans and passed by the vote of republican majorities testify. We favor the amendment of those laws or the enactment of new ones wherever and whenever experience suggests that amendment or enactment is required so as to secure the protection of the workingman in life or limb, or which may guarantee to him reasonable working hours and fair compensation and its prompt collection.

It is the sense of this convention that the demands of the times are imperative that the whole energies of the government of the United States and of the several states, legislative, judicial and executive, should be applied

the following declaration of its principles and policies, because it is a real and truly national party, having no past prejudices, sectional hatreds nor dead issues to distract its councils. It is the only party that dares nominate candidates for president and vice-president regardless of the side on which they fought during the late civil war. It holds that all honest debts owed by the government should be promptly paid to citizens, regardless of the section in which they live. Therefore,

Resolved, That all the current expenses of the government be hereafter paid in full legal-tender notes, greenbacks, until their volume in circulation amounts to \$50 per capita of population.

Resolved, 1. That the money coming into the treasury from tariff and internal-revenue taxation shall be appropriated to the payment of the public debt until the volume of money in circulation amounts to \$50 per capita.

2. That such money preserved the union and saved the life of the government; that it is constitutional money; that congress can authorize its issue in time of peace as well as during war, and the present great demand for money should compel public officials and all business of the government should now be carried on by their issue as it was during the war.

3. That the national greenback party acknowledges the importance of the transportation, tariff and labor questions, but it also holds that all these subjects are subordinate to restored nationality and civilized money.

4. It recommends united action with all third parties that agree with it on the fundamental principles of the National Greenback party regarding restored union, fraternity, harmony and loyalty among the people and the issue of legal-tender paper money.

5. It offers these policies as a speedy and practical way for providing good money to meet its present great requirements, and it expects all who want more money to vote for them.

to overcome all unnatural and illegal combination of capital whereby the price of any of the necessaries of life are unjustly and wickedly enhanced, and all combinations of common carriers whereby the expenses of carrying the products of the farm are placed at such extortionate figures as to amount to confiscation of both farm and labor. We maintain that no corporation or company should be permitted to get more than a reasonable per cent on actual capital invested and reasonable wages for its officers and employes; that dividends on watered stock is robbery.

We recognize the wisdom of past republican legislatures as demonstrated by the fact shown by the recent decision of the courts in the gas-trust case that corporations take only such powers as are expressly conferred by law and that corporations cannot be formed for the purpose of promoting or controlling other corporations; that trusts cannot find a home in our state; and we demand of the general assembly the same vigilance in the future as in the past on this vital subject.

We reaffirm the declaration of the national republican convention with reference to civil-service reform, and we commend the efforts of the national administration to secure the best result of the wise provision of the existing law on this subject.

We endorse the national platform of 1888 and favor the use of both gold and silver as money.

We believe in the long-tried and successful protective policy of the republican party.

While we know that the services of our brave union soldiers who served the nation can never be repaid in money, yet we heartily approve of the disability pension bill passed by both

houses of congress and the liberality of the appropriations for pensions.

We recognize the American public-school system as the chief agency in securing intelligent citizenship and the chief bulwark of popular liberties, and we declare in favor of a compulsory education law which will guarantee to all the children of the state ample opportunity of acquiring such an elementary education as will fit them for the intelligent performance of civic and political duties when they reach the age of manhood, but we are at the same time opposed to any arbitrary interference with the right of parents or guardians to educate their children at private schools, no matter where located; and we favor the amendment of the existing compulsory education law so as to conform to the declarations heretofore set forth, and also the repeal of so much of said law as provides for public supervision over private schools.

We recognize the importance of the temperance question and favor all proper and practical methods for abating the evils of the liquor traffic.

Every effort should be made by the national and state governments to legislate for the safety of railroad employes and miners, as recommended by President Harrison in his message of 1889.

We cordially indorse and approve the wise, conservative and patriotic administrations of President Harrison and Gov. Fifer.

We approve the record of the present republican congress in its efforts to legislate in the interest of the American people, and we approve of the rule enforced by Speaker Reed by which the rule of the majority in congress is made effective notwithstanding the filibustering tactics of a democratic minority whose only purpose seems to be to prevent and obstruct wise legislation.

Illinois Democrats.

Adopted at Springfield June 4, 1890.

The democracy of Illinois, in convention assembled, reaffirm the principles of the party as laid down in the platform adopted by the national convention in St. Louis in 1888. Realizing that a tariff is a tax, we insist now, as heretofore, that such revenue as is required to honestly and economically administer the government should be raised from internal-revenue taxes and duties on articles of luxury, thus exempting and making cheaper all articles used by the masses of the people.

The admission of the fraudulent senators from Montana and the unseating of representatives duly elected in order to add greater strength to the republican majority are precedents alike dangerous to the safety and perpetuity of the government.

For over a quarter of a century the finances of the people of the state of Illinois have been in the hands of the republican party. Every year more taxes are levied than are called for by the laws passed by the legislature. It is time for a change in order that there may be an overhauling of the books.

We denounce the republican party of Illinois for its broken promises and pledges made to the farmers and laborers of the state in not so equalizing the taxes as to compel the large corporations and trusts to pay their equal proportion of our state, county and municipal taxes, as a crime against the farmers and laborers that calls loudly for redress.

We demand of the state board of equalization an honest enforcement of the law as interpreted by the Supreme court, in order that the various corporations of the state shall no longer escape the payment of their just proportion of taxes.

The imposition of over 75 per cent. of the taxes upon the lands of the state is a wrong which calls loudly for redress and is a just cause

for complaint by the already overburdened farmers of the state.

Knowing that there is no calling in the state so hazardous as that of the coal-miner, we demand the enactment of a law abolishing forever the system of truck stores; the enactment of a law for the examination of mine bosses; the enactment of a law providing for the examination of stationary engineers; the enactment of a law providing for the weighing of coal before screening; the amendment of the mining laws so as to provide for the inspectors of the respective inspection districts or some other competent person to act as sealer of weights and measures for the adjustment of scales upon which coal is weighed at the mine.

We are in favor of the eight-hour work day. We cannot find language strong enough to condemn the McKinley tariff-tax bill, considering it as a crime and conspiracy against the toilers of America, which is intended to impoverish the masses and benefit a very small class that are already millionaires. We recognize in it the consummation of an unjust agreement between the republican party and manufacturers and others profiting by the protective tariffs, which agreement we suspected at the time of the last republican national convention and charged in the last campaign.

We demand absolute economy in all the various departments of the state and national governments and the discharge of all unnecessary employes who are kept upon the pay-roll merely because they are partisan favorites. We favor the adoption of the Australian ballot system, so as to provide a fair and secret ballot.

Ever since the republican party has had control of the office of state treasurer public moneys of Illinois have been deposited in banks outside this state without profit to this state or its people. The democratic party pledges itself that all deposits of state funds shall be in Illinois banks and that the interest thereon shall be paid into the state treasury, and that such legislation as is necessary shall be enacted to carry this resolution into effect.

We favor the election of United States senators by direct vote of the people. We demand that all unnecessary restrictions be removed from the coinage of silver. We are in favor of the election of the railroad and warehouse commissioners by direct vote of the people. We are opposed to class legislation in every particular. We denounce the bill now pending in congress as the ship subsidy bill as a species of vicious and unjust class legislation, and we deny the right of congress to tax the whole people to raise money to pay a subsidy or bounty to this or any other private enterprise.

Whereas, There has long been a combination between the publishers of school-books to avoid competition and extort exorbitant prices; therefore, we favor the preparation and publication of a series of school-books, and furnishing the same to the school-children of this state at actual cost.

Resolved, That the democratic party, in convention assembled, heartily indorses the public-school system of the state of Illinois, and it declares that the parental right to direct and control the education of the child should forever remain inviolate, and that the provisions of the law of 1883, commonly known as the compulsory-education statute, impairing that inalienable right should be at once repealed. Respecting this subject we adopt the following propositions and hold them to be self-evident truths:

1. To determine and direct the education of the child is a natural right of the parent.
2. There arises out of this parental right the duty to provide education.
3. When one who by natural or humane law owes a duty to another fails to perform that duty the state can—

(a) Enjoin or compel performance.

(b) Punish for non-performance.

(c) Supply the lack where to the injury of society non-performance is wrongfully persisted in.

4. Wise statesmanship encourages general popular education, but this does not mean or require unjust or unnecessary interference with those who are educating their children according to the best of their ability and conformably to the condition in life of parent and child.

5. Compulsory education in the sense that parents who violate or neglect their parental duty may be compelled to its performance or punished for non-performance is *licit*.

6. Compulsory education in the sense of controlling or seeking to control or dislodging from their rightful place those parents who are discharging their parental duties commensurately with the state of life of parent and child is not allowable even to the state.

7. For the education of his children one parent may select the public, another may select the private or denominational school, still another furnish proper education without the aid of any school, and each of the three in so doing exercises a right protected by the law of the land as well as by the law of nature, and for doing which he need offer neither excuse nor apology.

8. The public and private or denominational schools are in law neither related, nor are they subordinate one to the other, nor need they be antagonistic.

We favor and pledge ourselves to the enactment of statutes—

1. To require parents who are not performing their duty in respect to educating their children to do so.

2. To correct incorrigible truants by providing means for their amendment and to minimize the evils of truancy by sending truant children to such schools as the parents may designate.

3. To prohibit child labor with all its debasing consequences.

Illinois Prohibitionists.

Adopted at Bloomington, May 27, 1890.

The prohibition party, in state convention assembled, acknowledging Almighty God as the source of all just power in government, does hereby declare:

1. That the legalized traffic in intoxicating liquor as a beverage is the most enormous and dangerous political outrage of the age, and the suppression of this entire traffic as a beverage by local, state and national authority the most important question of political economy before the American people, and invites all who are opposed to this destructive and anarchistic traffic to unite with the prohibition party in agitation, education and legislation on this question until prohibition shall become a part of the constitution of the state and nation.

2. That sex distinction as an elective franchise qualification should be abolished.

3. That, since prohibition must ultimately rest upon conviction and conviction upon knowledge, we urge the enforcement of the scientific temperance instruction law and its strengthening by the addition of adequate penalties by our next legislature.

4. That we are in favor of such a tariff as will raise a revenue sufficient to carry on the affairs of government as administered on an economic basis, and no more, and that such tariff should be levied on such articles of importation as will make the tax the least burdensome to the laboring classes.

5. That all money should be issued by the general government directly to the people, the same to be a full legal tender for all debts, and

to that end we favor the free and unlimited coinage of silver.

6. For a service pension for all honorably discharged union soldiers, based on a monthly allowance of one cent for every day of actual service rendered; provided,

7. That the minimum monthly pension shall be 15.

8. For the limitation of individual as well as corporate ownership of land.

9. For the speedy adoption of the Australian ballot system or its equivalent.

10. For the selection of United States senators by direct vote of the people.

11. For the control of railroad and telegraph lines by the government, so as to limit the earnings to a reasonable return on the cash value of the property.

12. For the suppression of all trusts and combinations which are designed to enrich the few at the expense of the many.

13. For the reduction of the legal rate of interest in this state to 6 per cent.

14. For a sabbath law and its enforcement securing to the laborer one day in seven for rest.

Indiana Republicans.

Adopted at Indianapolis Sept. 10, 1890.

The republicans of Indiana congratulate the people of the state upon the fact that since we were last assembled on a like occasion the state has been honored for the first time in its history by the elevation of one of its citizens to the position of chief executive of the nation.

We endorse the administration of Benjamin Harrison and the able statesmen selected as his co-laborers and advisers as being wise, vigorous and patriotic. It has kept the pledges made to the people, has carefully guarded and zealously promoted their welfare and elevated the condition of the public service.

We heartily approve the action of the republicans in congress. Under the brilliant and fearless leadership of Thomas B. Reed they have again proved that the republican party can be relied upon to meet and solve great public questions and have once more demonstrated its capacity for intelligent and patriotic government. Important treaties concluded and pending, liberal pension laws, the revision of the system of import duties, provision for the impartial collection thereof, laws authorizing states to deal with articles deemed harmful, legislation to secure pure food for our people and remove all objection to the products of our farms in foreign markets, provision for increasing the volume of a sound currency, laws designed to make elections fair and pure, legislation for the protection of railroad employees, laws against trusts and monopolies, to suppress lotteries, to prohibit convict labor on public works, to prohibit importation of foreign laborers under contract, for the protection of miners, to endow colleges of agriculture and the mechanic arts, and statutes adding six stars to the flag of the union, each representing a commonwealth already great and populous, constitute work completed or well advanced which in character and value has rarely been equaled by any single session of congress.

Familiar with the history of the last thirty years, the people need scarcely be reminded that all this useful legislation has met democratic opposition, prolonged, bitter and determined. With singular persistence the representatives of that party have flung themselves under the wheels of the car of progress and filled the ears of the people with their outcries. Charged with high public duties, they have vehemently insisted that they were not present in the halls of legislation except for the purpose of receiving their salaries and obstructing the public business. We condemn their conduct as unworthy of the representatives of a people whose government is founded on the right of

the majority to rule and as hostile to the welfare of the laborer, the mechanic, the soldier, the farmer and the manufacturer, all of whose interests are directly involved in the legislation they have so violently opposed.

We reaffirm our belief in the republican doctrine of protection to American industries. Home markets with millions of consumers engaged in varied industries are the best in the world, and for many perishable articles the only ones accessible. American markets should be first for our own citizens, and to this end we favor levying import duties upon the products of other nations, often the result of degraded labor, selecting such articles as we can produce profitably and as will bring revenue to the government and impose the least burden upon our people.

We condemn the democratic doctrine of free trade, under the operation of which thousands now engaged in manufacturing, mining and like industries must be driven to agricultural pursuits, at once increasing our farm products and destroying the best and most reliable market for them; and commend the policy of reciprocity proposed in connection with pending tariff legislation, to the end that when our markets are opened more freely to the products of other countries we should obtain as a consideration therefor more favorable trade privileges with countries so benefited. We will thus secure, especially in Mexico, the Central and South American states and adjacent islands, such a market for our agricultural and manufactured products as will enable us to pay for our sugar and coffee with the product of our mills and farms.

We heartily approve the action of republicans in congress in making generous provision for him who has borne the battle, and his widow, and his orphans. A wise liberally, far surpassing any similar action by other nations, gives to the defenders of the union an those dependent upon them at least \$150,000,000 annually. Of this vast amount over \$15,000,000 will be disbursed in the state of Indiana each year, bringing needed relief to thousands of patriotic homes and stimulating business by largely increasing the volume of money circulating among our people. As against all democratic promises and pretenses we proudly recall the fact that all important pension legislation has been placed on the statute books by republicans, and against constant democratic opposition they have steadily maintained a revenue system adequate to meet its demands. Nor has it been the habit of republican presidents to sneer at or veto laws adding to the comfort of those who maintained the integrity of the union and gave to the nation one flag of honor and authority.

In justice to the union soldiers and sailors we urge the passage of a service pension bill.

We cordially commend the action of republicans in congress on the subject of silver coinage. Every democratic congressman who is recorded as voting, including the last candidate of that party for vice-president, at the time of the demonetization of silver, voted in favor of that measure. Ex-President Cleveland by messages to congress strongly opposed all legislation favorable to silver coinage, and the law recently enacted was passed in spite of persistent democratic opposition. Under its beneficent influence silver has rapidly approached the gold standard of values, farm products are advancing in price and commerce is feeling the impulse of increased prosperity. It will add more than \$50,000,000 annually of sound currency to the amount in circulation among the people, and is a long yet prudent step toward free coinage.

Prosperous and dignified labor is essential to a free state. It should be well paid, and the hours of employment should be such as to leave leisure for recreation and mental and moral

culture. We favor protection against every form of convict or servile labor; prohibition of the employment of young children in factories and mines; protection of railroad employes by requiring the adoption of a uniform coupler; protection of employes engaged in factories and mines and other hazardous occupations from every danger that can be removed or diminished; the adjustment of differences between employer and employe by arbitration, and such legislation as may be needed to facilitate and protect organizations of farmers and wage-laborers for the proper and lawful promotion of their mutual interests.

And we condemn the conduct of the representatives of the democratic party both in congress and the legislature of Indiana who, while professing abundant regard for the welfare of the workingman, have failed to enact valid and efficient laws on these subjects.

We repeat our demand for elections that shall be free, equal and honest in every part of the union. Upon such elections depend the political equity and just representation of the people of every state. Our national government is founded upon the idea that there shall be such elections, and we urge the congress of the United States to enact such laws as will accomplish this result and make ample provisions for forcting the discontinuance of intimidation, corruption and fraud.

We believe that the soil of the United States should be reserved for its own citizens and for such as may become citizens, and favor such legislation as will prevent aliens becoming the owners of the land needed for homes for independent American farmers.

Believing that the food supply of the people should be kept as pure as possible and that all articles should be sold under such names as will indicate their true character, we favor such legislation by congress and the state legislature as will best accomplish these purposes.

We denounce all trusts and combinations tending to hurtfully affect the price of commodities as opposed to the welfare of the people at large, and favor such state legislation as will supplement the action of a republican congress looking to their suppression.

To cheapen transportation and improve the market for the products of our farms and mills we favor improvement of our rivers and harbors where a reasonable expenditure will increase facilities for carrying freight.

[On state topics the platform indorses Gov. Hovey's administration; demands that benevolent institutions be placed on a non-partisan basis; favors local option; demands the election of senators and state officers by popular vote; demands non-partisan boards to control public improvements in cities; condemns the legislature for creating offices and filling them with partisans; denounces the democracy for attacking the state and federal courts; recommends that elections for state officers be for four years, without right of re-election; demands free school-books; denounces the democratic party for increasing the state debt, and denounces the legislative gerrymander.]

Indiana Democrats.

Adopted at Indianapolis Aug. 28. 1890.

We, the democracy of Indiana, in convention assembled for the first time since the memorable contest in 1838, when we went down in defeat but not in dishonor, overcome by the shameless methods of Dudleyism and the "blocks of five," do solemnly declare:

That the electoral vote of Indiana was obtained for HARRISON and MORTON by the most flagrant crimes against the ballot-box ever perpetrated in an American commonwealth; that these crimes were committed under the direct auspices of William Wade Dudley, then and

now treasurer of the national republican committee, and by the procurement and connivance of republican leaders in this state and in the nation; that the administration of Benjamin Harrison has made itself an accessory after the fact to these crimes by shielding the criminals from punishment and even by rewarding them for their knavery; and that the brazen prostitution of the machinery of the federal court for the district of Indiana, by its judge and attorney, to the protection of these conspirators against the suffrage constitutes the most infamous chapter in the judicial annals of the republic. The federal court of Indiana has decided that advising and organizing bribery is not a crime. We appeal from this decision to the people of Indiana, and we demand a verdict against William A. Woods and the miscreants whom he saved from legal punishment.

We denounce the administration of Benjamin Harrison for its deliberate abandonment of civil-service reform; for its use of cabinet positions and other high stations in payment of financial campaign debts; for treating the public patronage as a family appendage, instead of a public trust, and quartering a host of relatives, by blood and by marriage, upon the national treasury; for dismissing honest and competent public servants, in violation of solemn pledges, because of their political opinions, and filling their places with men devoid of character or capacity, and whose only title to preferment rested upon disreputable partisan work; for its dalliance with questionable gift enterprises; for its complete subservience to Wall street and the money power and its undisguised hostility or indifference to the rights and interests of the producing and laboring masses.

We denounce the tariff monopolists for their efforts to perpetuate themselves in power by measures inconsistent with free institutions and contrary to good morals. We find in the force election bill, the bills creating rotten borough states and the McKinley tariff bill the open manifestations of a gigantic conspiracy of the minority to oppress a groaning people with additional burdens of taxation for private benefits and to fasten it on the country in such a way that the people cannot free themselves from the galling load.

We condemn the republican party for the deliberate theft of two seats in the senate of the United States from the people of Montana; for degrading the house of representatives from a deliberative body into a one-man despotism under the false and hypocritical pretense of expediting the public business; for unseating legally elected representatives of the people in order to strengthen a partisan majority which was originally the product of fraud; for trampling upon the rights of the minority in disregard as well of justice and decency as of parliamentary usage and the plain requirements of the constitution, and for reckless prodigality in appropriations, which has converted the surplus accumulated under the wise, frugal and statesmanlike administration of Grover Cleveland into a deficit of alarming dimensions, involving in the near future, a further heavy increase of the people's burdens.

We denounce the force election bill, which has passed the house and has the active support of the administration, as revolutionary and unconstitutional. It strikes down home rule and local self-government; suggests and encourages fraudulent elections and provides the machinery to accomplish dishonest returns and false certificates of elections; fosters sectionalism and bayonet rule where every interest of the people invites to peace, fraternity and unity; outrages the traditions and customs of a century by giving life tenure to partisan returning boards; makes the legislative and executive branches dependent upon the judiciary

and converts the judiciary into an instrument of oppression and corruption; involves the unnecessary expenditure of millions of the people's money, and in Indiana nullifies the Andrews election law, passed by the last legislature over the determined opposition of the republicans. We declare that interference of any kind by the federal government with state elections is a dangerous menace to the form of government bequeathed us by the framers of the constitution, and that the intelligence and patriotism of the American people may safely be trusted to remedy any evils that may exist in our elections.

We denounce the McKinley tariff bill as the most outrageous measure of taxation ever proposed in the American congress. It will increase taxes upon the necessities of life and reduce taxes upon the luxuries. It will make life harder for every farmer and wage-earner in the land in order that the profits of monopolies and trusts may be swelled. It affords no relief whatever to the agricultural interests of the country, already staggering under the heavy burdens of protection; in the words of James G. Blaine, "it will not open a market for a single bushel of wheat nor a single barrel of pork." We are opposed to legislation which compels Indiana farmers to pay bounties to the sugar-planters and silk-growers of other states. We are opposed to class legislation of every kind; to subsidies and bounties of every description and in every disguise. We are in favor of that wide measure of commercial freedom proposed by Grover Cleveland, which would benefit the farmers and laborers of the entire country, instead of that limited measure of so called reciprocity offered by Mr. Blaine, which would benefit only a few eastern manufacturers. So long as the government depends for support in any degree upon a tariff we demand that it be levied for revenue only, and, so far as possible, upon the luxuries of the rich, instead of the necessities of the masses.

We denounce the silver bill, so-called, recently enacted, as an ignominious surrender to the money power. It perpetuates the demonetization of silver and the single gold standard, whereas the interests of the people require the complete remonetization of silver and its restoration to perfect equality with gold in our coinage. We demand the free and unrestricted coinage of silver upon the basis existing prior to 1873.

We are in favor, as we always have been, of a just and liberal pension system. We denounce the republican party for making pledges to the veterans in 1888 which have not been redeemed, and even not intended to be redeemed, and we warn them against further attempts at deception from the same quarter.

We are rejoiced at the evidences of an awakening of the farmers of the country to the necessity for organized efforts to better their own condition and protect themselves against unjust legislation and oppressive administration. We invite attention to the fact that the farmers are demanding, in substance, the same measures of relief which the democratic party has been advocating for years, but has not had the power to enact, and that the surest and speediest way of obtaining this relief is to restore the democracy to power in every department of the government.

We demand legislation prohibiting aliens from acquiring lands in America and for the forfeiture of titles to the 20,742,000 acres of our public land now held by them.

We favor the election of United States senators by the people.

We endorse most heartily the legislation of the general assembly of 1889. We applaud the election-reform laws and pledge ourselves to their support and full enforcement. We applaud the school text-book laws, by which the

people are given school-books at one-half their former price. We favor such additional legislation as will give full effect to the objects of this act and will extend its scope as far as practicable. We pledge ourselves to resist every attempt of the school-book trust to regain its old control over our township trustees and county superintendents, and favor such simplification of the several laws in regard to the public-school system as will increase their efficiency and decrease their expenses.

We applaud the bill for county farmers' institutes and pledge ourselves to countenance and extend that valuable means of universal instruction in agricultural science.

We applaud the state board of charities law, and commend the excellent work done by that board in improving the condition and methods of our benevolent reformatory institutions. The creation of our splendid system of public charities, and their honest and efficient management constitute one of the strongest titles of the Indiana democracy to popular confidence and support.

We applaud the law for funding the school debt, by which the state is saved annually \$120,000 in interest, and nearly \$4,000,000 have been distributed to the counties to be loaned to the people at 6 per cent. interest.

We denounce the conspiracy of certain republican state officials and newspapers to destroy the state's credit for partisan purposes by disseminating false statements as to her financial condition and resources. Indiana is not bankrupt. Her taxes are low and her debt is not oppressive, and for every dollar of it she has more than value received in great public institutions — a fact which speaks volumes for democratic integrity, economy and efficiency.

The state debt obligations should not be hawked over the country, but should be made a popular domestic security, issued direct to the people of the state in bonds of small denominations, drawing a low rate of interest and non-taxable, that the interest paid may remain at home and the securities may be a safe investment for trust funds and the people's savings.

We demand the adoption of a system of equalizing the appraisement of real and personal property in this state, to the end that an equal and proper uniformity in such assessments shall be secured, for the reason that under existing regulations many counties are compelled to pay an unjust proportion of the state's expenses which others as unjustly escape.

We applaud the eight-hour law, the law to prevent "black-listing," the law prohibiting "pluck-me" stores, the laws for the protection of coal miners, the law preventing the importation of Pinkerton detectives and the repeal of the republican intimidation law of 1881 as manifestations of the steadfast friendship of the democratic party to the workmen. We point to these laws as evidence that our friendship to American labor is not confined to words alone.

We denounce the employment of the Pinkertons by a railroad corporation in New York in the pending contest with its employes and hold it to be the duty of state and local officials everywhere to prevent such a usurpation by capital of the police powers of the state. We are in favor of arbitration as the only just and fair method of settling labor controversies, and we demand of the next legislature the passage of a law creating a permanent tribunal of arbitration for that purpose. We insist that labor has as good a right to organize in self-protection as capital, and that labor organizations should be placed on a perfect equality before the law with organizations of capital, known as corporations.

We favor the just and equitable apportionment of the school revenues of the state.

We favor the total abandonment of the system of fees and perquisites in the payment of state and county officers, and we demand the enactment of a law by the next legislature fixing fair salaries for all public officials, the same to go into effect as soon as practicable.

Judges Coffee, Berkshire and Olds, republican members of the Supreme bench, deserve the contempt of the people of Indiana for their action in overturning the settled construction of the constitution, reversing all legal precedents and contradicting their own rulings for the sake of a few petty offices and at the dictation of unscrupulous political tricksters.

While we heartily indorse, and shall always uphold, maintain and foster, at any cost, our system of public schools for the free instruction of all who choose to make use of them, we are unalterably opposed to all attempts to regulate, by law, the course of study in any private or parochial school, and we deprecate and denounce any interference on the part of the state in the management of schools maintained by citizens at their own expense, as an arbitrary, despotic and intolerable encroachment upon private rights.

We favor legislation for establishing and preserving the township libraries of the state of Indiana as invaluable adjuncts of our common school system.

We heartily indorse the course of Daniel W. Voorhees and David Turpie in the United States senate and commend them for their able and brilliant advocacy of democratic principles and their vigilant defense of the public interests against the assaults of plutocracy and monopoly. We also indorse the course of Indiana's ten democratic representatives in congress.

Indiana Prohibitionists.

Adopted at Indianapolis, Feb. 20, 1890.

Whereas, The question as to what legislation is demanded in regard to the manufacture, importation and sale of intoxicating liquors is an issue now pending before the people of the country; and

Whereas, The two dominant political parties have, by their declarations and by their acts, placed themselves on the side of perpetuating the traffic under license, thus entailing on the country a legacy of vice, pauperism and crime; Therefore, we, the prohibitionists of Indiana, in state convention assembled, declare the law:

1. The legal prohibition of the manufacture, and importation of intoxicating beverages by national and state authority is a fundamental position on which we tolerate no compromise and make no concessions.

2. Whereas, The National Protective Association of Liquor Dealers has declared in favor of local option and high license; therefore the advocacy of these measures by the republican and democratic parties proves their complete domination by this association.

3. That local option being unconstitutional in Indiana, any attempt by these parties to make this an issue is to assail precedent and to give the rum power further lease of life, delaying state and national prohibition.

4. That license, high or low, or taxation is wrong in principle, therefore wrong in results, and that revenue should be raised from property values but not from vice and crime.

5. The national revenue derived from the manufacture and sale of alcoholic liquor for use as a beverage should be abolished by prohibiting its manufacture.

6. Governments derive their just power from the consent of the governed; therefore citizenship carries with it logically the right of suf-

frage, nor should this right be abridged on account of race, sex or nationality.

7. If the national revenue is to be raised by import duties such revenue should be reduced so as not to exceed the necessary expenses of the government economically administered, but food, clothing and other necessities of life should be exempt from taxation.

8. We join in grateful acknowledgment of the nation's gratitude to the union soldiers and sailors of the late war and favor the passage of a general service pension bill in lieu of the present complicated and expensive service, granting pensions to all honorably discharged union soldiers, their widows, and army nurses.

9. Public offices should be conferred only on account of honesty and capacity and never as a reward for partisan services.

10. That we favor the settlement of international disputes by arbitration.

11. All trusts or combinations of capital for the purpose of controlling the price of articles of necessity or consumption are unjust and oppressive and should be prohibited by law.

12. We favor the apportionment of the public-school revenue upon the basis of the number of pupils of school age enrolled in attendance at the term last preceding the apportionment for the following year, instead of upon the basis of the whole number of children of school age.

13. We favor a reduction of the salaries of county officers, adjusted in times of high prices, to conform to the present financial condition of the country.

14. That the public printing should be let to the lowest responsible bidder in both county and state.

15. That we hail with pleasure the organizations of wage-workers and farmers, and the intelligent and just demands they make for the abolition of class and monopoly legislation in the interest of the honest toiler and wealth-producer.

16. That the corruption of the dominant political parties in elections degrades our citizenship and public service and endangers the purity of the ballot. We condemn such methods and invite all who desire good government, pure elections and a free ballot that shall be honestly counted, to vote with the prohibition party.

Indiana People's Party.

Adopted at Indianapolis Sept. 23, 1890.

1. The name shall be "The People's Party."
2. The emblem and device shall be the plow and hammer.

3. We also agree to the adoption of the compact of the St. Louis meeting of Dec. 6, 1889.

Whereas, Under the present industrial and financial system wealth accumulates with frightful rapidity in the hands of a few, while the mass of the people is becoming poorer all the time; and

Whereas, The land is getting more and more in the hands of the wealthy individuals, corporations and syndicates and the small farmers are hardly able any longer to make a living upon their farms in consequence of the influence of the money power and the power of corporations; and

Whereas, The products of labor are so unequally distributed that the laborer, the producer of all wealth, scarcely gets enough of the products of his hands to keep body and soul together; and

Whereas, In this unequal distribution of the products of labor, in the growing poverty on one side and the amassing of immense fortunes upon the other, and in the tendency of political powers always falling in the hands of the few who control the wealth of the nation there is great danger, inasmuch as such a condition creates classes and may ultimately become the de-

stroyer of our free republican institutions; therefore be it

Resolved, That we favor the repeal of the law now in force in this state allowing counties, townships and cities to vote taxes on the people for building railroads for corporations.

Resolved, That we are opposed to the competition of the present prison contract labor now practiced.

Resolved, That we are in favor of placing the charitable and penal institutions of the state in the hands of men competent to manage them and not in the hands of mere partisans, and that the management should not be changed when a change of party occurs.

Resolved, That we believe some check should be placed upon the power of the county commissioners and township trustees to heap debt upon the corporation under their control.

Resolved, That we are in favor of the state furnishing school-books at cost to the townships, to be given free to all pupils.

Resolved, We are opposed to child labor first, last and all the time.

Resolved, That we are in favor of changing the law exempting property from levy and sale upon execution so that when the judgment is for unpaid wages no property shall be exempt.

That we view with alarm the fact that, notwithstanding the heavy burdens of the taxpayer, the debt of the state is steadily increasing from year to year.

That we demand more economy in the administration of the state government and the reduction of fees and salaries to a point commensurate with the earnings of industrial labor.

We are in favor of a per-diem service pension law.

We are in favor of the passage of the union ex-prisoners of war pension bill.

We are in favor of the repeal of the act limiting the payment of arrears of pensions, and declare that pensions to the veterans of the late war should be paid from the date of their disability and not from the date of their application.

We favor the issuing of a full legal-tender paper money to meet the disbursements under these bills, thereby enabling the government to maintain its honor and pay its debts and at the same time aid the people by giving them a sufficient volume of money to meet the demands of the legitimate trade interests of the country. Our government paid the soldiers in paper money during the war and the veterans will now gladly accept it in payment of their just demands.

We favor a mine-inspector who shall be a practical miner.

We demand just and equitable redistricting of the state so as to secure to the people a fair representation in the legislative halls of the state and nation and thus correct the flagrant infringement on the expressed will of the people in the previous state elections.

We demand the passage of the Stanford land loan bill.

We indorse the farmers' convention which met at the state capital in June, 1890.

Iowa Republicans.

Adopted at Sioux City June 25, 1890.

The platform declares for the principles of the national republican party and indorses President Harrison's administration. It says further:

We do specifically declare our adherence to the principle of protection to American industry, applied wisely in view of the interest of all conditions of our people and administered in view of the equal interest of all our industries. We agree that discriminations may be

wisely made, but never in behalf of the strong against the weak—never against the masses.

We are in favor of such an expansion of the currency as will meet the growing demands of the increase in population and trade and offset the contraction resulting from the continual withdrawal of the national-bank circulation; that to this end we favor such legislation as will utilize as money the entire silver product of our mines, and we favor such laws as will aid in the ultimate unrestricted use of both precious metals as money. We congratulate the people of this state, irrespective of party relationship, upon the measure of success attained in the contest in this state in behalf of just legal control of the railway corporations doing business in this state, and we appeal to the people to see to it that there be no recession in the just policy of the state in this regard. We believe that effort to nullify the interstate-commerce law should be resisted, to the end that national protection and state protection may alike be equal to all communities and among all classes.

The republicans of Iowa offer their sympathy to the producers of the south who seek now for disenfranchisement from the industrial bondage of the grinding monopolies of that section, protected and promoted by all the power of the organized democratic party of those states. Recognizing that the revolt in the south is in behalf of liberty and justice, popular government and popular rights, it is a matter of minor concern in what name the battles are fought and won.

We cordially approve the purpose of republicans in congress so to amend and improve the pension laws as to make further and more generous provision for the union soldiers, their widows, parents and children, and we gladly believe the day is not distant when a general service pension law should and will be passed.

We express our abhorrence of all trusts and trade conspiracies of every kind intended to destroy competition and create and perpetuate monopolies, and we call for the enactment and enforcement of both federal and state laws to completely exterminate such iniquitous and dangerous combinations and to prevent their further organization.

We declare against compromise with the saloon and stand by the people of this state in their hostility to its existence, spread and power. We favor such legislation on the part of congress as shall protect the police power of the states in their efforts to regulate, confine or prohibit the public bar.

Iowa Democrats.

Adopted at Cedar Rapids, Aug. 6, 1890.

We congratulate the people of Iowa on the election of Gov. Botes and heartily approve the wisdom, justice and courage with which he has administered the high office; and we commend the action of the democratic members of the XXIIIrd general assembly for their faithful efforts to redeem their pledges for the enactment of the Australian ballot law, a pharmacy law, and other measures demanded for the public welfare.

We denounce the republicans in congress for their submission to and support of Speaker Reed in his arbitrary suppression of free speech and absolute control of the course of legislation.

We reaffirm the policy respecting the control of the traffic in intoxicating liquors set forth in the democratic platform of 1889 and approved by the people at the election of that year, and we are in favor of such legislation, state and national, as may be necessary to carry that policy into effect.

We declare our continued adherence to the principle of railroad control as expressed in

the laws of the state and the general government, and we favor such changes as experience may show to be necessary to maintain just and equitable relations between the carriers and the shippers.

We again acknowledge the great debt of gratitude the nation owes to the soldiers and sailors of the union, and we declare in favor of just, liberal and equitable pension laws for all invalid and dependent soldiers and sailors.

We are in favor of a tariff for revenue only—a tariff reduced to the lowest rate consistent with the needs of an economical administration of government. Liquors, tobacco and all luxuries should be made to bear as far as possible the burdens of taxation, and the necessaries of life should so far as possible be relieved.

We oppose the McKinley bill as an abuse of the taxing power in favor of the wealthy corporations, pools and trusts by which our manufacturing interests are so largely controlled. It especially discriminates against the agricultural interests of the country by compelling the farmer to buy what he needs and sell what he produces in a monopolized market.

We are in favor of reciprocity, not alone with the Spanish states of South America, but as well with all other countries whose markets are open to our products.

We demand the free coinage of silver and that it be made a legal tender for all debts, public and private, and denounce as unjust and dishonest the provision of the law recently enacted allowing parties to stipulate against payment in silver and silver certificates, thus setting up one standard of value for the creditor and another for the debtor—one for the poor man and the other for the rich man.

The election bill passed by the lower house of congress is a menace to the freedom and purity of our elections. It places the treasury of the United States at the disposal of the party in power. It enables the managers of that party to employ as large a force as it deems necessary to carry on the work of a campaign, and to do this under pretense of supervising elections. It destroys all responsibility of the government to the people by vesting its enormous powers in officers holding their places by appointment and for life. We believe that the people of the various localities can be safely trusted to conduct their own elections, and that the power of congress to determine the qualification, election and return of its members is sufficient for protection against local abuses.

Iowa Prohibitionists.

Adopted at Des Moines Sept. 5, 1890.

1. The prohibition party of Iowa recognizing God as the source of all power in human government; and

2. Whereas, Our oft repeated declaration, that the abolition of the drink traffic as a national issue has been confirmed by the decision of the Supreme court, as well as by the acts of both houses of congress, therefore we present to the people of the state the following declaration of principles:

3. We reaffirm our unswerving devotion to the principles laid down in the prohibition national platform of 1888.

4. Realizing more clearly than ever before that the liquor interest has its gigantic feet upon the neck of the democratic party, while its mighty hand clutches the throat of the republican party, we will give our allegiance only to a political party whose corner-stone is laid on national prohibition, and where every member is the deadly enemy of the saloon.

5. Believing that the annihilation of the drink curse which devours the earnings of the

producers and laboring classes will go a long way toward the settlement of the differences between labor and capital, we invite all the farmers and laborers who are with us agreed that the drink traffic is the dominant issue in politics, to join us in the great crusade of the home against the saloon.

6. We demand the enactment by congress of a law declaring that intoxicating liquors as a beverage shall cease to be an article of commerce anywhere in the United States.

7. Believing that it is wrong to raise a revenue on that which pauperizes the people and increases crime, we demand the repeal of the internal revenue system, so far as it applies to the sale of liquors and tobacco.

8. We believe the true doctrine now is, of tariff for revenue adjusted, so far as possible, so as to enable American industry to compete with foreign industry.

9. We demand that the voter shall be protected in the utmost secrecy in casting his ballot, and that the ballot shall be printed and distributed at the expense of the state.

10. We favor equal suffrage without distinction of sex.

11. We favor the governmental control of transportation and communication.

12. We favor the postal savings-bank system.

13. We believe there is no more reason for the withdrawal of the so-called non-partisan Woman's Christian Temperance union of Iowa from the National union than there was for the secession of South Carolina from the union in 1860, and we extend our sympathies to the women who remain loyal to the Woman's Christian Temperance union.

Iowa Industrial Union Labor.

Adopted at Des Moines Aug. 14, 1890.

1. We heartily indorse the demands and declarations of the principles adopted by the Laborers' Industrial Union of America at their meeting in St. Louis, on the 9th of December last, and we favor government loans to be made directly to the people at a rate interest not to exceed 2 per cent. per annum.

2. We denounce the McKinley tariff bill as grossly unjust to tax-payers and producers; the Lodge bill as designed to deprive the people everywhere of their lawful right to control the election of their officers; and we denounce the usurpation of Speaker Reed as a bold attempt to destroy the independence of our representatives in congress and to arrogate to himself the control of federal legislation in utter violation of the constitution and the established usage of a century.

3. We denounce the present congress and particularly the Iowa members thereof for defending the free coinage of silver.

4. We favor the Australian ballot system and demand its adoption in this state, and we denounce the late general assembly for withholding it from the people.

5. We demand the immediate passage of a service pension law.

We demand the election of United States senators by a direct vote of the people, and until the constitution can be amended properly in this behalf we favor the nomination of United States senators in state conventions, pledging all representatives elected by the party to vote for the nominee at the meeting of the legislature.

Michigan Republicans.

Adopted at Detroit Aug. 23, 1890.

The republicans of Michigan in convention assembled, do hereby adopt the following platform:

1. The republicans of Michigan heartily com-

mend president Harrison for the dignity, wisdom and faithfulness displayed by him and his cabinet in administering the affairs of the nation both at home and abroad.

2. We applaud the patriotic course of Speaker Reed and the republicans in congress for so amending the rules that legislation can proceed in spite of an obstructive minority, and we heartily indorse the course of our senators and representatives in congress.

3. We believe in the purity of the ballot-box, and that any abridgement of the right of suffrage is perilous to the safety of the nation, and we urge the speedy enactment by congress of such laws as shall protect every American citizen in the exercise of this sacred right.

4. We are in favor of such a revision of our national tariff laws as will protect producers, laborers and farmers against the ruinous competitions of foreign productions and cheaper labor, and especially commend those features of the McKinley bill which provide for the protection of farm products as well as manufactured articles.

5. We indorse the action of congress in its legislation upon the silver question, and favor the unlimited use of gold and silver bullion as a basis for legal tender paper currency interchangeable with coin.

6. We indorse and commend the action of the republican party in carrying out its pledges in relation to pension legislation.

7. We commend the able, economical and business-like administration of Gov. Luce.

8. We favor such changes in our state tax laws as shall provide for a more equal and just assessment of real, personal and corporate property, to the end that all property in the state not exempted shall contribute its equal share in maintaining the public burdens.

9. We favor such a change in our tax laws as will compel no person to pay taxes on a greater interest in the property than he owns.

10. We reaffirm the position of the republican party heretofore expressed in its state platforms of 1886 and 1888 upon the temperance question.

11. We oppose the further issue of free passes to members of the legislature and all other public officers, and urge the passage of laws that will inflict heavy penalties upon such officers for accepting such passes, and upon any individual or corporation who shall give or offer to give them to such officers.

12. We favor the most rigid economy in the management of our state government and state institutions, and demand shorter and less expensive sessions of the legislature.

Michigan Democrats.

Adopted at Grand Rapids Sept. 10, 1890.

We, the democrats of Michigan, in convention assembled, claiming for ourselves motives and purposes of the highest patriotism, and without reflecting upon the motives and purposes of the great mass of those who have heretofore voted with our opponents, invite such comparison and solicit the support of all good citizens of Michigan in the coming election.

1. We reaffirm the declaration of principles in the platform adopted by the party in its last national convention.

2. With a just pride we point to the prudent, wise and statesmanlike administration of Grover Cleveland.

3. We condemn the administration of Benjamin Harrison for the utter disregard of its solemn pledges made to the public before election. We denounce it for its unparalleled extravagance, which has in the first eighteen months of its life dissipated the greater part of the vast surplus left in the treasury by the

preceding frugal democratic administration and brought the country to confront the possibility of an early deficiency and higher taxation as the result of such extravagance. We condemn it for its deliberate abandonment of civil-service reform; for its use of cabinet positions and other high stations in payment of financial campaign debts; for using the public patronage as a family appendage instead of a public trust; for its complete subserviency to Wall street and the money power, and its undisguised hostility or indifference to the rights and interests of the producing and laboring classes.

4. We reaffirm the obligation of the people to the soldiers and sailors of the war for the preservation of the union and favor a policy of liberal pensions to their disabled survivors and dependent families.

5. The power to tax is the highest prerogative of sovereignty and it has been delegated to congress by the people for these purposes only: to pay the public debt, to provide for the common defense and to provide for the general welfare. The enactment of a system of taxation avowedly for different ends, and under which the national treasury may be congested by an enormous surplus collected from the people in taxes on the necessities of life, but also under which the prerogative to tax is actually redelegated by congress to favored classes, who for their own enrichment may levy a tariff upon such necessities in addition to fair cost and fair profits, would be a radical perversion of the power to tax conferred upon congress by the people.

6. We denounce and condemn the high-tariff policy of the present administration and demand that our tariff and internal-revenue taxes shall not be higher than required to maintain the government economically administered. We especially condemn the McKinley tariff bill, which still further restricts the market for American products while it increases the burden of taxation. We denounce it because it has not a section or a line that will open a new market for a single bushel of wheat or a single barrel of pork, and also because it still further restricts our markets and limits our trade with the world—a policy that must more and more depress American agriculture, lessen the value of American farms and increase the cost of living to the American people.

7. We believe in the free and unlimited coinage of gold and silver, unhampered by conditions as to the legal-tender qualities of either, and unhampered by the proviso suspending coinage of silver after July 1, 1891. We condemn the republican policy because it demonetized silver and still refuses the demand of the people for a restoration of silver to a complete equality with gold. We condemn the republican members of congress from the state of Michigan who voted against the complete remonetization of silver.

8. We demand that henceforth the issuing of all circulating medium be made under acts of congress through the national treasury, in such amounts as the business wants of the country require.

9. We denounce the Lodge force bill, which has passed the house and has the active support of the administration, as revolutionary and unconstitutional. It strikes down home rule and local self-government; provides the machinery to accomplish dishonest returns and false certificates of election; fosters sectionalism and bayonet rule where every interest of the people invites to peace, fraternity and unity; outrages the traditions and customs of a century by giving life tenure to partisan returning boards; makes the legislative and executive branches dependent upon the judiciary and converts the judiciary into an

instrument of oppression and corruption; involves the unnecessary expenditure of millions of the people's money. We declare that interference of any kind by the federal government with state elections is a dangerous menace to the form of government bequeathed to us by the framers of the constitution, and that the intelligence and patriotism of the American people may safely be trusted to remedy any evils that may exist in our elections.

10. The public domain should be reserved for homesteads for actual settlers. Lands granted as subsidies to corporations which were not earned in strict conformity with the terms of the grants should be declared forfeited and settlers upon them should be protected. We denounce the repeated acts of the republican senate in refusing to pass the bills of the democratic house declaring forfeited more than fifty-four million acres of unearned lands, and we denounce the action of the republican legislature of Michigan, when, after the poor act of meager justice to the homesteaders of Michigan had been wrested from the senate of the United States (changed and mangled from an act of full justice to the settlers as it came from the house), that legislature refused to put the construction upon the act that the state of Michigan accepted it for the benefit of those who had settled upon the land in good faith, and not for the benefit of subsidizing corporations.

11. We condemn the policy of giving bounties to promote commercial relations with other countries until closer commercial relations with those countries can be maintained. We believe in the creation of a merchant marine, which can be best brought about by unrestricted commerce. Until the freedom of commerce permits the reciprocal return in profitable exchange for American products sold abroad we condemn the system of subsidies, which only maintains a line so long as the subsidy lasts.

12. We believe that in all the departments of our state government there are extravagance and waste, which can be corrected by prudent administration and proper legislation; that offices and employments have been unduly multiplied; that our state institutions ought to be more vigilantly supervised and the tendency to their multiplication checked.

We condemn the last legislature for its manifest incompetency and its humiliation of the state by numerous ill-considered, impracticable and unconstitutional acts, and for the useless expenses entailed by an unnecessarily protracted session.

We are in favor of a secret ballot and of such legislation as shall be adequate to effectually preserve the purity of elections while securing to each voter the exercise of his right of suffrage.

Michigan Prohibitionists.

Adopted at Lansing July 30, 1890.

The prohibition party of Michigan, in state convention assembled, acknowledging Almighty God as the source of all moral power in government, and recognizing in the political and industrial affairs of the nation a crying demand for reform, proposes to assert now, as always, its determination to advocate such reforms as will relieve the people from the gross burdens imposed upon them. Foremost in these reforms to which we pledge ourselves are the following:

1. The prohibition of the manufacture, importation, transportation and sale of intoxicating beverages in state and nation.

2. The recent decision of the United States Supreme court declaring that a state cannot prohibit the importation of intoxicating

liquors in original packages, because the United States constitution vests in congress alone the power to regulate interstate commerce, forces the prohibition question into national politics and emphasizes the necessity of a national prohibition party.

3. All money to be issued by the general government direct to the people in sufficient quantities to meet the business demands of the country, the same to be full legal tender; the free and unlimited coinage of silver and the establishment by the national government of postal savings banks.

4. A readjustment of the tariff so as to tax luxuries and exempt the necessities of life. The increase of specific taxes so that the corporate wealth of the state shall bear as high a rate of taxation as that of the private citizen.

5. A service per-diem pension to all honorably discharged union soldiers.

6. The adoption throughout Michigan of the Australian ballot system.

7. "That the government should control, in the public interest, railroad, telegraph and telephone lines, to the end that the public be guaranteed rates covering actual cost of operation and fair interest to capital actually invested."

8. A perfected and enforced system of civil-service laws.

9. Equal suffrage, without distinction to sex, but with an educational qualification.

10. Speculations in margins, the cornering of markets, the formation of trusts and combinations for the purpose of arbitrarily forcing up prices are an outrage upon the people and should be prohibited.

11. The relation of capital and labor is a pressing political issue, to be solved only by a party which regards politics as "morals applied to public offices." We favor legislation that will insure to the laborer a just return for his labor and will check the tendency to divert the wealth of the country from the hands of the many into the hands of the few.

12. The prohibition of alien land-ownership by domestic corporations and by individuals; that all unearned land grants be declared forfeited, and that all government lands be held for actual settlers only.

With full faith in our cause, as embodied in the foregoing platform, we invite the co-operation of all voters of this state in securing such reforms, especially the farming and laboring classes, whose financial, moral and social interests will be greatly advanced by the success of the prohibition party and its principles.

Michigan Union Labor.

Adopted at Lansing July 31, 1890.

Whereas, The democratic and republican parties have been in control of the municipal, state and national governments of this country since the close of the civil war; and,

Whereas, During that time, through the criminal and negligent abuse of power intrusted to the leaders of said parties, our public domain has been alienated to corporations, wealth has been centralized in the hands of the few, and the masses proportionately impoverished; corporations have been created which oppress the people; unjust discriminations have been made in the distribution of taxes, so that the aggregate wealth of millionaires and corporations does not bear the same rate of burdens of taxation as that of the small holders; the ballot has been corrupted; our system of currency has been manipulated in the interest of the bond-holder; and,

Whereas, Rings and political tricksters control said parties so that the voice of the people has become powerless to correct abuses through the agency of said parties; and,

Whereas, The object of the various reform organizations is essentially the same, and the abuses to be removed are so alarming as to demand the laying aside of minor differences for the greater good; therefore we, citizens of Michigan, for the love of our country and our homes, in harmony with the general uprising of the reform elements throughout the country, and especially in the northwest, do under this constitution and declaration of principles merge ourselves into one united body for political action.

1. We demand the abolition of national banks and the substitution of legal-tender treasury notes in lieu of national-bank notes, issued in sufficient volume to do the business of the country on the cash system, regulating the amount needed on a per capita basis as the business interests of the country expand, and that all money issued by the government shall be a legal tender in payment of all debts, both public and private.

2. That we demand the free and unlimited coinage of silver.

3. We demand that taxation, national or state, shall not be used to build up one interest or class at the expense of another.

4. That means of communication and transportation shall be owned and operated in the interests of the people as is the United States postal system.

5. We demand that eight hours shall constitute a legal day's work in all factories, mines and workshops.

6. We demand a law permitting the farmer to deduct his mortgage from his assessment, similar to the law now in force in California.

7. We demand a graduated income tax, thereby placing the burden of taxation on those most able to bear it.

8. We demand a government loan to the people on real-estate security at the same rate money is now loaned to the banks.

9. We demand a strictly secret ballot, better known as the Australian ballot system.

10. We demand a homestead exemption of \$1,000 on improvements and personal property.

11. We demand the election of the president of the United States and United States senators by a direct vote of the people, and a reduction of the salaries of all public officers to a strict economical basis proportioned to the wages of labor.

12. We are opposed to any fusion.

Minnesota Republicans.

Adopted at St. Paul July 24, 1890.

The republican party of the state of Minnesota, in convention assembled, announces the following declaration of principles:

1. It heartily indorses both the national and state administrations in the conduct of the affairs respectively intrusted to them by the people; that it especially commends the sound business and financial principles, the strict regard for economy and fidelity to the pledges made by the last republican state convention, and emphatically ratified by the electors at the polls, which have distinguished the administration of Gov. William R. Merriam.

2. That having the requirements of the government in view, our tariff laws should be so adjusted as to best protect our American industries and bear fairly and equitably on all sections and interests of the country.

It cordially approves of the policy recommended by Mr. Blaine of such reciprocity treaties with the republics of Southern and Central America as will open closer commercial relations between the Northern and Southern Americas.

3. It claims that in its high-license policy in regard to the liquor traffic it has inaugurated

the best and most efficient method of dealing with the evils attendant upon such traffic which has yet been devised, as shown in the results which have followed.

It pledges itself to a continuance of this policy and a vigilant enforcement of such laws, and that in the future, as in the past, in its efforts to regulate and restrain such traffic it will take no backward step.

4. It favors wise and discriminating legislation by congress on the subject of immigration by which persons not in sympathy with our institutions, or opposed to republican or any government, may be excluded from our shores.

5. It favors a reduction of the legal rate of interest permitted by written contract and the vigilant enforcement of all enactments passed for the punishment of usury.

6. It indorses the introduction of the binding-twine industry into the state's prison and the supply thereof to the citizens of the state engaged in agriculture and other pursuits at the prime cost of manufacture and sale.

It denounces all monopolies, whether under the name of trusts or otherwise, and demands the passage of laws by the congress of the United States for placing on the free list any commodity which shall at any time become the subject thereof.

7. It favors the regulation of the tolls of common carriers in interstate-commerce laws, or if solely within the state, by the legislation of the state, in such a manner as to prevent the watering of stock with a view to illicit exactions of interest thereon or oppression or discrimination between different individuals or localities, and at the same time to secure the employe of such carriers a just return for his labor. It pledges itself to the endeavor to secure the passage of such laws as will guarantee to the people of the state the free disposition and transportation of their products, unimpeded by the vexatious exactions of rings and monopolies or the unjust exercise of corporate franchises, and particularly to secure the reduction of rates on grain, lumber and coal.

8. It approves of the Australian system of voting, and recommends its adoption by the next legislature for the entire state.

9. That the nation owes a debt of gratitude to the brave defenders of its flag, and that they and their widows and orphans should at all times be the subject of national recognition and protection.

That it indorses the disability pension bill passed by the present congress in fulfillment of the pledges made by the republican party to care for the ex-soldiers, their widows and orphans, and the republican party of Minnesota takes special pride in the fact that this just measure was prepared and championed by the Hon. C. K. Davis, senior senator from this state.

10. Resolved, That we favor relieving, as far as possible, the poorer classes of our people by providing free text-books in our common schools at the public expense.

Resolved, That we are firmly opposed to any federal legislation designed to restrict the competition of Canadian with domestic common carriers.

Minnesota Democrats.

Adopted at St. Paul Sept. 9, 1890.

The democracy of the state of Minnesota, in convention assembled, express anew their appreciation and approval of the broad statesmanship, the steadfast, unswerving devotion to right and principle, and the heroic self-sacrifice of Grover Cleveland in compelling the consideration by the people of the great and vital question of tariff reform. He forced

the republican party to remove the mask behind which its leaders had hidden their purpose to use the taxing power of the government to build up wealthy classes upon which they could rely for the money wherewith to corrupt voters and retain their control of the government. We send to him, in his honorable retirement as a simple citizen of the great republic, assurance of our profound respect and esteem.

We declare our uncompromising opposition to the policy of a protective tariff and we deny that the federal government has any right, legal or moral, to use its taxing power for any other purpose than to provide a revenue for the actual needs of the government when administered with strict economy. We oppose protection by taxation as un-American, as wrong in principle, false in promise and prolific in corruption. It is un-American in that it contravenes the fundamental principle on which the nation rests, that "all men are created equal," by singling out industries to be favored at the expense of all. It puts the American manufacturer before the world in the attitude of a weakling, unable to hold his own in the world's industrial contest, while it leaves the farmer and the laborer to a world-wide competition. It promised a home competition and it gives us trusts and combines. It promised protection to labor and it confounds its organization with Pinkertons and Winchester's. It promised a home market for our products and the margin of surplus keeps pace with the growth of consumption. It corrupts and demoralizes by its teachings that the government and not individual effort is the source of wealth. It takes from the earnings of all and enters wealth into the hands of a few from whom it can be "fried" for use in corrupting the voters at the polls.

We denounce the McKinley tariff bill as nothing less than a deed of conveyance by the republican party of the enormous power of federal taxation to a combination of manufacturers and trusts in consideration of money advanced by them with which the election of Benjamin Harrison was purchased. It is not designed to protect American labor or infant industries, nor to raise government revenue, but enable prosperous manufacturing concerns to increase their profits at the expense of the farming and laboring interests and to furnish future corruption funds to the republican party.

We charge upon each of the representatives in congress from this state the sole and individual responsibility for the increase of 120 per cent. in the tax on tin-plate and its manufactures. When the McKinley bill as on its final passage in the house the amendment making this increase was voted upon as a distinct proposition apart from the bill and was adopted by a majority of one. Each representative from this state voted for the amendment, thus assuming the sole responsibility of fastening upon the people this most useless, senseless and iniquitous tax on an article of universal and necessitous use.

We denounce the recent attempt of the republican majority in the federal congress to usurp power, to impose unjust taxation, to stifle proper discussion of public measures and to substitute the dictatorship of the speaker of the house of representatives for the considerate action of a deliberative assembly. We condemn the attempt to enact into law the monstrous proposal for overturning the election laws of the several states and substituting for the local supervisors of election the mercenary and unscrupulous agents of the republican party, and, in the language of Speaker Reed, to enable them to do their

own registering, their own counting and their own certifying.

We regret that the zeal which the republicans now profess for purity of elections in the south was not sufficient to secure for elections in this state the safeguards of the Australian ballot law for more than five of its cities, and we demand that its protection be extended to every precinct in this state. We demand, further, that that law be supplemented and strengthened by limiting the use of money in elections and compelling candidates to make, verify and file for public inspection itemized statements of all moneys so spent by or for them directly or indirectly.

Grave as are the questions affecting the nation which the voters of the states must solve in the congressional districts, there are others equally as important concerning the management of the state which it is their duty to decide at the polls. Chief of these is the growth of corruption in our legislature. We instance the infamous house bill 157, which, under the deceitful pretense of relieving settlers and others, remitted to a land-grant railroad company the taxes on its land, amounting to \$1,000,000. We instance the debauchery of legislators in the election of senators, which in the latest instance was so widespread that the investigation was quickly withdrawn and the testimony taken was suppressed "to save the party from the disgrace" which would follow its publication. We refer to the indubitable fact that there has grown up in the legislature a gang of professional strikers who introduce measures injurious to legitimate private and corporate interests, making them the basis of demands for money. It is well known that meritorious measures are hindered and obstructed by them until they ascertain "how much there is in it" for them, and we appeal to the conscience of the honest voters of the state to aid us in suppressing this venality, which is sapping the foundations of the state.

We again impeach the republican party for incapacity to deal with the problem of a "free and open" grain market. We repeat our denunciation of its grain-inspection law as "stupid if honest and malevolent if not," and we point to the fact that complaints continue of the evils it was to remedy, and that the chief inspector admits that all the redress it affords is limited to those farmers who are able to ship their grain directly to the terminals, leaving unprotected that great mass of farmers whose present necessity prevents this, compelling them to sell to the local elevator, and leaving the syndicates which now control most of the elevators of the state to reap the 20 or 30 per cent profit of which they boasted when promoting their schemes on the English market. We arraign it again for the reckless extravagance of the legislature, the latest session of which was only restrained from again exceeding the great revenues of the state by a fear of political defeat, and which met the deficit of \$325,000 bequeathed it by its predecessor by an issue of bonds, thus increasing the interest-bearing debt rather than curtailing its expenditures.

In view of the glaring inequality and manifest injustice of our present system of state taxation, under which it is notorious that the bulk of personal property of the rich escapes taxation, thus adding to the public burden of those of moderate possessions, we commend to the coming legislature an earnest consideration of the matter with a view of devising some method by which the taxes may be justly and equitably distributed and borne. And the democrats of the state covenant with the people, if intrusted with the management

of affairs, that the offices of the state shall be administered on the rule that a "public office is a public trust;" that strict economy shall be enforced in all departments; that needless offices shall be either abolished or consolidated; that every grain market in the state shall be made "free and open;" that corruption when discovered shall be exposed, not sheltered, and to this end we again appeal to all voters who set good government above party.

Minnesota Prohibitionists.

Adopted at St. Paul June 24, 1889.

1. We, the delegates of the prohibition party, in the state convention assembled, do declare in favor of the total annihilation of the manufacture, sale and use of intoxicating liquors in the state and nation.

2. The question of prohibition is both a political and national one, and demands for its success the efficient action of a political party organized for that purpose.

3. High or low license as a means for removing the evils of the saloon curse is, and has always been, a delusion and a fraud, unrighteous in principle and vicious in execution.

4. Since the late decision of the United States Supreme court has made it impossible for any state to prevent the importation of intoxicating liquors into its bounds, we do demand of congress the speedy enactment of a law preventing the importation of such liquors into any state having a prohibitory law.

5. We extend hearty sympathy and co-operation to our sister state of Nebraska in her fight to prohibit the ravages of the rum demon among her people and their homes.

6. We further declare in favor of the election of United States senators and of the president and vice-president of the United States by direct vote of the people; for the Australian system of ballot reform for the whole state; for the reduction of the tariff to revenue basis, and against the political trickstering of the McKinley tariff bill now pending in congress.

7. We also favor and will work for the taxation of all railroad property on an equal basis with all other property of the state; the complete control of these railroads and other public carriers by the state fixing rates of transportation for the shipment of grain without impediment; giving private parties the right to construct warehouses, without restraint, contiguous to railway tracks at all local stations; in fixing rates for transportation let the rates be such as will give fair remuneration for labor and capital but nothing for interest on watered stock.

8. The absolute abolishment of option gambling on boards of trade and the enactment of such laws as shall make all such transactions a criminal offense.

9. For an increase in the volume of money equal to the requirements of an ever-increasing trade and business.

10. We are in favor of settling all strikes by arbitration, and for equal pay for equal work, irrespective of sex; also for shorter hours for labor in factories, stores, manufacturing institutions and on public works.

11. That all pools, trusts and combinations whose aim and effect are to control prices and prevent competition in the open market should be declared conspiracy and made punishable by fine and imprisonment.

12. We demand of our legislators the enactment of laws to carry out the above principles and protect our laboring classes against the oppressive greed of capitalists.

Whereas, Only by an amendment to our constitution can such right be granted; therefore,

Resolved, That we are heartily in favor of such an amendment being submitted to the legal voters of Minnesota at a general election.

Minnesota Farmers' Alliance.

Adopted at St. Paul July 17, 1890.

The Farmers' alliance and Industrial unions of the state of Minnesota, in convention assembled, hereby ordain and establish the following declaration of principles:

1. We demand that the "war tariff," which has too long survived the object of its creation, shall be radically revised, giving very material reduction on the necessities of life and placing raw material upon the free list, to the end that we may compete with the world for a market; and that such luxuries as whisky and tobacco shall in no manner be relieved from internal taxation till the high protective tariff has been wholly divested of its extortions; and we especially denounce the McKinley bill as the crowning infamy of protection.

2. We demand governmental control of railways, both by state and nation, to the end that all discrimination shall cease; that reasonable rates shall be established; that watered stock shall not receive the rewards of honest capital; and the pooling of rates is such an element of monopoly as should be absolutely prohibited. We anticipate the ultimate governmental ownership of railroads as the solution of the question.

3. As producers we demand free and open markets for our grain, and that the railways shall receive and ship grain, as they receive and ship other commodities, for the owner to its destination. That the grading of wheat at country stations be abolished; that the right to establish side-tracks to connect grain warehouses and the equal use of cars shall in no manner be abridged.

4. That in the adjustment of a schedule of rates for this state we believe the railroad commissioners should be guided mainly by the schedule of rates now in force in Iowa. But if the interstate railways leading to Chicago shall make a less rate than the Iowa rates we demand that the rates to Duluth shall be no greater per ton per mile than the rate per ton per mile to Chicago, reasonable terminal and transfer charges being added to the mileage charges as provided for by the freedom-of-traffic law now in our statutes.

5. That we demand the maintenance of the present freedom-of-traffic law, the present grain laws and the law for the distribution of cars, and the erection by the state of public warehouses where the producer shall store his grain unmixed in a special car, at actual cost, at Duluth and the agricultural fairgrounds.

6. That we hold that mortgage indebtedness should be deducted from the tax upon realty, whether such mortgage is held at home or abroad; and we ask such laws as will make the hidden property pay equal taxes with the visible property.

7. That we favor a material reduction of interest on money and demand that severe penalties be attached to the practice of usury.

8. That we favor an increase in the volume of money equal to the requirements of an ever-increasing trade and business, without the intervention of banks, which shall be made full legal tender, and we demand the free coinage of silver.

9. That our public lands, the sacred heritage of the people, shall be reserved in small quantities, without cost, to actual settlers only, and we favor laws for the protection of our forests.

10. We are opposed to the giving away of

valuable franchises by the state and municipalities.

11. That we are in favor of the improvement of our great waterways, so that our produce may go in unbroken bulk to the markets of the world.

12. That we ask the next legislature to establish the Australian system of voting for the whole state.

13. That all public offices which directly affect the interests of the people should be made elective, and for this reason we hold that United States senators and railroad commissioners should be made elective by popular vote.

14. We demand the prohibition of the employment of children under 15 years of age in the mills, factories and workshops of the country; and we also favor the adoption of a factory and mine-inspection law and an employers' liability act; and we favor the publishing of free text-books.

15. We favor the settlement of all strikes by arbitration, and for equal pay for equal work, irrespective of sex; also for shorter hours of labor in factories, stores and on public works, and we also favor a lien law that will give labor a first lien on its product.

16. The assumption of the power by the Supreme Court of the United States in recent decisions denying accepted constitutional rights of the several states is a direct menace to the privileges and liberties of the people, and is fraught with danger to our institutions and form of government.

17. When so demanded, the right of the people to vote upon constitutional amendments should not be denied, as it involves the right of petition.

18. Labor everywhere has a common bond of sympathy and a common cause. We cordially welcome every association having for its purpose the amelioration of the condition of all who toil "in the sweat of their face." In such a union, now imperatively demanded, there will come that strength which will yet bring justice with victory. And for the support of these principles we invite the co-operation of all good citizens in the state of Minnesota without regard to previous party affiliation.

Nebraska Republicans.

Adopted at Lincoln July 24, 1890.

The republicans of Nebraska reiterate and cordially indorse the fundamental principles of the republican party as enunciated by successive national republican conventions from 1856 to 1888 and believe the republican party capable of dealing with every vital issue that concerns the American people wherever the rank and file of the republican party are untrammelled in the exercise of their political rights.

We heartily indorse the wise and conservative administration of President Harrison. We also fully approve the wise action of the republican members of both houses of congress in fulfilling the pledges of the party in legislation upon the coinage of silver and other measures of national importance and congratulate the country upon the continued reduction of the national debt.

We most heartily indorse the action of the republican congress in passing the disability pension bill and a republican president who approved the same and regard it as an act of justice too long delayed because of the opposition to all just pension legislation by a democratic president and a democratic congress; yet we do not regard it as the full recognition of the great debt of obligation which the government and the people owe to those heroic men by reason of whose sacri-

fiice and devotion the union was saved and the government restored. We do further repeat our declaration in favor of just and fair service pensions, graded according to length of service, for every soldier and sailor who fought in behalf of the union, and by reason of whose services and devotion the government now exists.

We hold an honest, popular ballot and equal representation of all the people to be the foundation of our republican government and demand effective legislation to secure the integrity and purity of elections, which are the foundation of all public authority.

We favor such revision of the election laws of the state as will guarantee to every voter the greatest possible secrecy in the casting of his ballot and secure the punishment of any who attempt the corruption or intimidation of voters, and we favor the Australian ballot system for incorporated towns and cities, applicable both to primary and regular elections so far as it can conform to our organic law.

We oppose land monopoly in every form, demand the forfeiture of unearned land grants and the reservation of the public domain for homesteaders only.

We recognize the right of labor to organize for its protection and by all lawful and peaceful means to secure to itself the greatest reward for thrift and industry. We are in favor of laws compelling railroads and manufacturers to use all appliances which science supplies for the protection of laborers against accidents. We demand the enactment of a law defining the liability of employers for injuries sustained by employes in cases where proper safeguards have not been used in occupations dangerous to life, limb or health; railway and other public corporations should be subject to control through the legislative power that created them. Their undue influence in legislation and imposition of unnecessary burdens upon the people and illegitimate increase of stock or capital should be prohibited by stringent laws.

We demand of the state that the property of corporations shall be taxed the same as that of individuals; that the provisions of our constitution, requiring the assessment of franchises shall be enforced by suitable legislation.

We demand the reduction of freight and passenger rates on railroads to correspond with rates now prevailing in adjacent states in the Mississippi valley, and we further demand that the next legislature shall abolish all passes or free transportation on railroads excepting for employes of the railroad companies.

We demand the establishment of the system of postal telegraphy, and request our members in congress to vote and work for government ownership or control of the telegraph.

We indorse the action of the inter-state commission in ordering a reduction of the grain rates between the Missouri river and lake ports.

We favor the modification of the statutes of our state in such manner as shall prevent the staying of judgments secured for work and labor and the enactment of such laws as shall provide for the speedy collection of the wages of our laborers.

We favor a revision of the tariff in the interest of the producer and laborer. The import duties on articles of common use should be placed as low as is consistent with the protection of American industries.

We denounce all organizations of capitalists to limit production, control supplies of the necessities of life and advance prices as detrimental to the best interests of society and

as unjustifiable interference with the natural laws of competition and trade and ask their prompt suppression.

The republican party has given the people an elastic currency of gold, silver and paper and has raised the credit of the nation to one of the highest of any country in the world, and its efforts to fully remonetize silver should be continued until it is on a perfect equality as a money metal with gold.

Owners of public elevators that receive and handle grain for storage should be declared public warehousemen and compelled under penalty to receive, store, ship and handle the grain of all persons alike, without discrimination, the state regulating charge for storage and inspection. All railroad companies should be required to switch, haul, receive and ship the grain of all persons alike, without discrimination.

We favor the enactment of more stringent usury laws and their rigid enforcement under severe penalties.

We condemn the practice that has grown up in this state of removing causes from the state to the federal courts upon the pretense of local prejudice, but in reality for the sole purpose of enabling the parties asking the removal to receive attorney's fees which could not be recovered in the state courts, and we urge upon congress the enactment of such amendments to the present law as will prevent such abuses.

Nebraska Democrats.

Adopted at Omaha Aug. 14, 1890.

The democratic party of Nebraska, in state convention assembled, declares its fealty to the century-old principles of its founders, and emphatically indorses and reaffirms the platform of the national democratic party at St. Louis in 1888, upon which were nominated Grover Cleveland of New York for president and Allen G. Thurman of Ohio for vice-president. The party takes occasion to express its admiration for the honesty, courage and good faith of Grover Cleveland in his manly and straightforward fight against those principles enunciated by the republican party which democrats believe to be subversive of liberty and cruelly injurious to the agricultural interests of the country.

The democracy of Nebraska does not believe in tariffs upon the necessities of life and scouts as delusive and hypocritical the plan of aiding the farmer to pay off the ever-increasing burden of his mortgage by increasing the tax upon clothing, wool, tin-plates and crockery, and denounces the hypocrisy of the republican platform of this state in saying that "we favor a revision of the tariff in the interests of the producer and laborer" while the majority in the national house of representatives is gagging free speech in the interests of the manufacturers out of whom the "fat was fried" in 1888 and for the purpose of passing a measure which fosters trusts, combinations and monopolies; which strangles commerce and destroys ship-building; which increases taxes while it reduces the revenue; imposes additional burdens upon the laborer and farmer, while it confessedly fails to open a market for a single bushel of wheat or a single barrel of pork.

The democratic party has ever been the friend of the farmer and laborer and pledges itself on all questions of mortgages, usury, railroad discriminations, extortionate freight-rates and kindred subjects to lift, as far as has constitutional power, the burdens from the wretched shoulders of the men who toil, and we are particularly in favor of a stronger usury law. The republican party graciously recognizes in this state, by its platform, "the

right of labor to organize for its protection;" the democratic party, standing upon its whole history, does more: it encourages the masses to organize and, under the law, to fight capitalistic encroachment by widespread organization and patient sacrifice.

The democratic party denounces the republican party for its gifts of more than 195,000,000 acres of the public domain to railroad corporations and sends greeting to Allen G. Thurman and his patriotic associates who are deemed 70,000,000 acres of it for the people. The public domain should be sacredly held for the actual settler and intending citizen, and this party protests against alien land-holding in the United States.

The war was ended twenty-five years since, and, as patriotic citizens, glad that the curse and blight of slavery has been banished from the land, we cannot but deplore the attempt to revive sectional issues by the introduction and passage of a force bill, by which it is intended to place the ballot under control of partisan officers appointed for life.

We thank God for the preservation of the union and glory in the achievements of our citizen soldiery and express ourselves as heartily in favor of pensioning every wounded, needy and deserving veteran and giving him such a pension as shall secure him against want for the remainder of his days and of making like provision for the widow and the orphan.

We favor the Australian or some similar system of balloting which will insure to every citizen the right to cast his vote according to his own judgment, free from corruption or intimidation.

We are opposed to all trusts formed for the purpose of increasing the cost of the commodities of life, and believe the reduction and revision of the present iniquitous tariff to be the best means to destroy and impede their growth.

We favor an amendment to the federal constitution which will take the election of United States senators from the state legislatures and place it in the hands of the people, where it belongs.

We favor the placing of the silver dollar on its former footing with gold coin in our coinage laws, with equal legal-tender qualities, and we denounce as unjust and dishonest the law recently enacted as a discrimination in favor of gold coin for the benefit of the money power. And we further declare ourselves in favor of the free coinage of silver. We roundly denounce the maintenance of the state militia as an expensive republican luxury, of no benefit in any respect, and demand its immediate repeal by the next legislature.

The democratic party has a record of opposition to all sumptuary legislation and does not believe that the social habits of a people are proper subjects for constitutional provisions. High license and local option, however, have been tried in Nebraska and have given satisfaction to a majority of the people. As between them and prohibition the democratic party is unreservedly in favor of the former, and attention is hereby called to the hypocrisy of the republican party, which, having caused the question to be submitted to a popular vote, thereby creating uncertainty, injuring business, unsettling values and depressing trade, purposely dodged the issue in its last convention and neglected to say where it would be found, as a party, on these questions in the coming contest.

Nebraska Prohibitionists,

Adopted at Lincoln Aug. 27, 1890.

The prohibition party of Nebraska, in convention assembled, acknowledging Almighty

God as the source from which the just powers of government are derived and to whose laws human enactments should conform as an absolute condition to peace, prosperity and happiness, adopt the following platform:

1. We declare adherence to the principles enunciated by the national prohibition convention at Indianapolis in 1888.

2. Constitutional and statutory prohibition in state and nation of the manufacture and sale of alcoholic liquors as a beverage is the most vital issue before the American people and the first step toward securing all other needed reforms.

3. We are unalterably opposed to any law, by whatever name called, that in any way legalizes the traffic in intoxicating liquors as a beverage.

4. We invite the attention of the people of Nebraska to the fact that the prohibition party stands to-day in the midst of the greatest crisis in the history of our state as the only champion of the homes in their contest with the organized liquor monopoly of state and nation, and we hereby pledge our votes and earnest efforts of our party organization to its adoption.

5. No citizen should be deprived of the franchise by reason of sex.

6. The general government should own and operate the railroad and telegraph systems of the nation and furnish transportation at cost.

7. Every union soldier, sailor and marine of the late civil war merits and should receive a just service pension.

8. The election of the president, vice-president and United States senators should be by direct vote of the people.

9. The Australian system of voting should be adopted in Nebraska.

10. We favor such reduction in the hours of labor as will give the toiler, whatever his occupation, opportunity to embrace the social and educational advantages to which he is entitled.

11. All trusts and combinations organized to restrain and improperly control commerce should be prohibited, and all corporations should be controlled by the government in the interest of the whole people.

12. Recognizing that the liquor traffic, in itself a soulless monopoly, is the greatest foe to the laboring classes and an ever-present menace to their homes, we earnestly and cordially invite all laboring men to join us in the attempt to throttle their most malignant enemy.

Supplementary resolutions:

1. We heartily approve the "plan of canvass" inaugurated by the National Woman's Christian Temperance union superintendent of legislation and petitions for securing national constitutional prohibition.

2. Recognizing the Woman's Christian Temperance union as powerful allies in the grand fight against the liquor traffic, we pledge them assistance and bid them goodspeed.

3. To the many friends of prohibition throughout the country who have so kindly rendered material assistance to Nebraska in her effort to secure constitutional prohibition we express our profound gratitude.

4. We recommend a general temperance revival in all the churches in Nebraska as a most efficient means to unify the vote in the interest of the pending prohibitory amendment, and recommend it to the immediate consideration of conferences, synods and assemblies.

5. We urge upon our state central committee the inauguration of a school-district campaign, conducted by local talent and home volunteer speakers, in the interest of the pending prohibitory amendment.

6. We, the prohibitionists of Nebraska, in convention assembled, do respectfully peti-

tion the board of directors of the Columbian fair to be held in Chicago in 1893 to prohibit the sale and use of all intoxicating liquors as a beverage on the grounds of the exposition.

Nebraska Independents.

Adopted at Lincoln July 29, 1890.

We declare our adhesion to the following fundamental principles and demand that they be enacted into law, viz.:

Our financial system should be so reformed by the restoration of silver to its old-time place in the currency and its free and unlimited coinage on an equality with gold, and by the increase of our money circulation until it reaches the sum of \$50 per capita, and all paper issues to secure that amount should be made by the government alone, and be a full legal tender for all debts, public and private.

That land monopoly should be abolished either by limitation of ownership or by graded taxation of excessive holdings, so that all the competent should have an opportunity to labor, secure homes and become good citizens, and alien ownership should be prohibited.

That the railroad system as at present managed is a system of spoliation and robbery, and that its enormous bonded debt at fictitious valuations is absorbing the substance of the people in the interest of millionaires.

That the general government should own and operate the railways and telegraphs and furnish transportation at cost, the same as mail facilities are now furnished, and that our legislature shall enact a freight law which shall fix rates no higher than those now in force in Iowa.

We demand that our state and national systems of taxation, including the tariff, shall be so adjusted that our laboring interests will be fostered and wealth bear its just burdens, instead of our farmers, laborers, merchants and mechanics being compelled to pay, as at present, by far the largest portion of the public expense.

We further declare that the political machinery in this state has been controlled by the corporate power for the plunder of the people and the enrichment of itself, and we have entirely lost confidence in the efficacy of that machinery for the enactment of just and the repeal of unjust laws.

We demand that the next legislature of this state shall give the people the Australian ballot system.

That the soldiers of the late war shall receive a liberal service pension.

That eight hours' labor shall constitute a day's work except on the farms.

We hereby invite all men, without regard to past or present political affiliations, to join us in this our effort for pure government, for relief from the shackles of party politics and the domination of corporate power in our public affairs.

North Dakota Republicans.

Adopted at Grand Forks July 31, 1890.

Resolved, first—That the republicans of North Dakota, in convention assembled, reaffirm the declaration of the republican national convention of 1888; we heartily indorse the wise and conservative administration of President Harrison; we also fully approve the wise action of the republican members of both branches of congress in fulfilling the pledges of the party in legislating upon the coinage of silver, the revision of the tariff, the passage of the federal election law, the disability pension bill, and other measures of national importance. That the thanks of the nation are due the republican congress and Speaker Reed for amending the rules of the

house so that business of the country can be done by the people's representatives. We denounce the action of the democratic party in their claims that members of congress may be absent in a parliamentary sense for the purpose of defeating a quorum to do business, and at the same time be physically present to further obstruct the public business, as revolutionary, and a wanton disregard of the duties for which congressmen are elected and paid by the people. We earnestly insist that it is the duty of congress to faithfully carry out the declaration of the national convention of 1888 of the republican party, that it will provide by a fair and impartial election law for a free and honest popular ballot in every congressional district of the United States, so far as to secure to every citizen, rich or poor, white or black, native or foreign born, the right to cast one free ballot and to have that ballot duly counted. No rule or custom of either house should be allowed to stand in the way of prompt and effective legislation to secure the integrity and purity of the election of members of congress; to use the language of President Harrison, every constitutional power should be exercised to make this right secure and to punish fraud upon the ballot. We demand protection for the wool industry equal to that accorded to the most favorable manufactures of wool, so that in time American wool-growers will supply all wool of every kind required for consumption in this country.

Resolved, That we favor such legislation by congress and in this state as will in every particular way encourage, protect and promote the interest of agriculture in all its departments.

Protection of labor and the rights of laborers, such as will grant toll its full and just rewards, is among the first obligations of the government.

Resolved, That we commend the action of the 11st congress in reducing the duty on sugar and reducing the duty on binding twine from 34 to 14 cents, believing such reduction to be in the interests of the northwestern farmers.

Resolved, That we indorse the record made in congress by our fellow-citizen the Hon. H. C. Hansbrough and, resolved, that we heartily indorse the action of the republican congress in passing the disability pension bill and of a republican president who approved the same and regard it as an act of justice too long delayed because of the opposition to all just pension legislation by a democratic president and a democratic congress, yet we do not regard it as the full recognition of the great debt of obligation which the government and the people owe to those heroic men by reason of whose sacrifice and devotion the union was saved and the government restored.

Resolved, That the republican party is opposed to all monopolies or trusts and favors the regulation of the tolls of common carriers by interstate-commerce laws, or, if solely within the state, by the legislation of the state in such a manner as to prevent the watering of stock with a view to illegitimate exactions of interest thereon or oppression or discriminations between different individuals or localities, and at the same time secure the employes of carriers a just return for their labor. Further, the republican party pledges itself to the endeavor to secure the passage of such laws as will guarantee to the people of the state the free disposition and transportation of their productions, unimpeded by the vexatious action of rings and monopolies and unjust exercise of corporate franchises, and especially to secure the reduction of rates on lumber, coal and grain.

Resolved, That the republican party of North Dakota heartily indorses the reciprocity policy outlined by Mr. James G. Blaine, and

approves of the amendment of the McKinley bill offered by Senator Pierce, the gist of which was that after one year from the passage of the bill the president might in his discretion direct that the duties on sugar imposed under the existing tariff be imposed as against any nation or country failing to enter into adequate reciprocal relations with the United States regarding the agricultural products of this country, and that the president be directed to pursue such negotiations as may be deemed necessary to secure by treaty or otherwise the unrestricted entry into any such country of the agricultural produce of the United States.

Resolved, That we approve of the wise and conservative administration of Gov. John Miller, and especially do we, the people of North Dakota, owe him a lasting debt of gratitude for the courage he displayed in opposing lottery legislation during the session of the first legislature of the state of North Dakota, and we believe that his name will go down in the history of the state as that of Honest John Miller.

Resolved, That we, as republicans of the state of North Dakota, are emphatically opposed to legalizing in our state, and that we favor an amendment to the state constitution forever prohibiting the licensing of, lotteries; further, we urge upon our delegation in congress to secure, if possible, the passage of an act forbidding the use of the United States mails or national banks by lottery companies.

The people of North Dakota have declared for the complete extermination of the saloon. The republican party in this struggle renews its pledges of the past and joins the friends of the home in insisting upon a fair test and a vigorous enforcement of the present prohibitory law.

We favor such legislation on the part of congress as shall protect the police powers of the state in their efforts to regulate and prohibit the public bar and to empower every state to enforce its local laws relating to the manufacture and sale of intoxicating liquors in accordance with the intent and purpose with which they were enacted.

North Dakota Democrats.

Adopted at Grand Forks Aug. 6, 1890.

The democratic party of North Dakota enunciates the following principles and invites all patriotic men to support its nominees with their suffrages:

1. We affirm the principles of the party as laid down in the national platform of 1884 and 1888.

2. We arraign the republican party for a profligate expenditure of the surplus, and favor an economical administration of national and state governments.

3. We favor a free, fair, intelligent and secret ballot, and urge our legislators to carry out the constitution on the elective franchise.

4. That as the prohibition vote was short of a majority of the whole vote at the constitutional election, we declare in favor of a re-submission to the people of the prohibition question.

5. That we are opposed to the passage of the federal elections bill now through the lower house in any form whatever, and condemn it as centralizing, revolutionary and contrary to the spirit of a free country.

6. We are in favor of the free, unrestricted coinage of silver and an increase of currency and a volume of money equal to the requirements of the ever-increasing business and trade, to facilitate the payment of debts of all debtors.

7. That we urge upon our representatives in congress to labor for an amendment to the

constitution providing that the people shall vote directly for the office of president and vice-president, and also elect United States senators by popular vote of states.

8. That we denounce the McKinley bill now through the lower house as a travesty on tariff legislation calculated to enormously increase the burdens of the people, and that we declare for a reduction of tariff to a basis of "revenue only," and favor reciprocity or free trade between the United States and foreign nations when it can be shown that such a policy will open up to us a market for another bushel of wheat or another barrel of pork.

North Dakota Prohibitionists and Farmers.

Adopted at Grand Forks Sept. 26, 1890.

1. We demand the free coinage of gold and of silver, and that the silver dollar, or silver certificate issued by the government upon silver bullion, shall be legal tender for the payment of all debts, both public and private, thereby restoring silver to its time-honored place in our monetary system under the constitution.

2. We demand that the government loan money direct to the people upon demand at a low rate of interest and take as security thereof real estate, said amount loaned not to exceed one-half of the assessed value of said real estate when free from all incumbrance. We believe American lands are the best security for American money.

3. We demand that the government establish sub-treasuries for the use of the agricultural districts for the storage of grain, cotton or tobacco, and loan the owners 80 per cent of the value of all produce that they have in store at 2 per cent, per annum, under rules and regulations established by the United States treasurer.

4. We demand the repeal of the war-tariff tax, which has been and is a grievous burden upon the producers of the wealth of the nation, and that we favor a tariff upon all articles of luxury only, to be imposed to pay the current expenses of the government honestly administered, and that a graduated tax be levied upon all incomes in excess of \$2,000 per annum.

5. We demand the continuance of prohibition in the state, and favor the abolition of the liquor traffic.

6. We demand government ownership and control of all railroads, telegraph lines and coal mines in the interest of the people.

7. We demand equal suffrage.

8. We demand that our state adopt the Australian system of conducting elections.

9. We demand that the constitution of the United States be so amended that the United States senators, president and vice-president can be elected by the direct vote of the people of each state.

Resolved, That we call upon our legislature to submit to the people an article in our state constitution forever prohibiting the chartering of any lottery in the state of North Dakota.

South Dakota Republicans.

Adopted at Mitchell Aug. 28, 1890.

We, the republicans of South Dakota, in convention assembled, reaffirm the principles enunciated in the platform of the national republican party in 1888 and most heartily endorse the administrations of President Harrison and Gov. Mellette.

We recognize with pleasure the services rendered our state by our United States senators and representatives in congress.

We favor an amendment to the constitution of the state so that the legislature will be

authorized to enact such laws as will enable our state, counties and townships therein to maintain a thorough system of irrigation where needed, and, the republican party now as heretofore being in sympathy with every material development of our commonwealth, hereby pledge our hearty support to all measures that will tend to the development of our agricultural resources; and we urge upon the general government to extend prompt and liberal aid to the practical establishment of a system of irrigation by means of artesian wells within the artesian basin of this state, and urge upon our senators and representatives in congress to continue to use their best efforts to secure such aid.

We favor such expansion of our currency as will meet the growing demand of our increasing population and wants and offset the contraction resulting from the withdrawal of national-bank circulation. To this end we favor such legislation as will utilize the entire product of our silver mines as money.

We favor such a tariff on all importations, manufactured or produced, as will fully protect our laborers, manufacturers, farmers and miners from the ruinous competition of pauper labor of other countries, and so create and sustain a home market for the products of our farms, giving to each a living margin of profit.

We also favor the Hon. James G. Blaine's recommendations of reciprocal treaties with Central and South American republics, with a view to open in them a wider market for the products of American farms.

We most heartily endorse the action of the republican party in the passage of the disability pension bill, and we urge the passage of such a service law as will in some measure reward each of our honorably discharged soldiers for the years of health and life lost to them by the hard service rendered our country.

We most heartily invite and welcome all people from foreign lands who come to our state to secure homes and to become good and law-abiding citizens of the commonwealth.

We recognize the right of labor to organize for its protection and by all lawful means to secure to itself the greatest reward for its thrift, industry and skill.

We denounce all combinations of capitalists to limit production or control the necessities of life and advance prices as detrimental to the best interests of society, and we ask laws for their suppression and punishment.

We favor the Australian ballot system, or such election laws as will guarantee to every voter the greatest secrecy in the casting of his ballot, and we demand laws for the severest punishment of any attempt to corrupt the ballot. We also favor the passage of the national election law now pending before the United States senate.

We view with great gratification the prosperous condition of our public schools, and higher institutions of learning, and demand that our school lands shall be jealously guarded.

Prohibition being adopted by a vote of the people as a part of the fundamental law of the state, we pledge the party to its faithful and honest enforcement.

South Dakota Democrats.

Adopted at Aberdeen June 11, 1890.

The democracy of South Dakota, in convention assembled, reaffirm the principles of the party as laid down in the platform, and in the language of our ex-president and next president, Grover Cleveland, adopted by the national convention in St. Louis in 1888, we de-

clare that unnecessary taxation is unjust taxation. We are therefore opposed to the present system of tariff taxation and demand a readjustment of existing laws, so that the necessary revenues for the support of the government shall be derived from articles of luxury and that articles of necessity required for common use among the people be cheapened by being relieved of the burdensome exactions now imposed upon them, and which burdens the present republican congress proposes to further increase by the passage of the McKinley bill. In conformity with these principles we declare that all raw materials consumed by our manufacturers should be placed on the free list.

2. We hold as undeniable that taxation is not a blessing nor an element of national prosperity. That while sufficient revenue should be at all times collected for the support of an economical government in the discharge of its legitimate functions, for the payment of the public debt and liberal pensions to deserving veterans of the union armies, not one dollar of superfluous tax should be imposed for the purpose of enhancing the prices of commodities consumed by the people and as a tribute to the private business of a favored few.

3. We demand a graduated income tax, it being the most equitable system of taxation, placing the burden on those who can best afford to bear it, instead of laying it on the farmer and producer and exempting millionaires and bondholders.

We denounce the McKinley bill now pending before congress as the consummation of a conspiracy between the millionaire manufacturers and the republican managers, entered into during the last national campaign to raise a corruption fund to enslave the laborers of America. We denounce the provisions of the bill as a crime against labor and the products of the farm and arraign the promoters of said bill as conspirators to impoverish the masses and benefit a few individuals already millionaires.

We are opposed to all sumptuary legislation, either by the state or national government.

We are in favor of a resubmission to a vote of the people of article 24 of the constitution relating to prohibition. Until constitutional prohibition is repealed we advocate such a modification of the present prohibitory law as will best promote the welfare and good morals of our people.

We are opposed to the proposed amendment to our state constitution striking the word "male" from the article on suffrage.

We arraign and denounce the republican party for its injustice to the defenders of our country wherein the bondholders were paid in gold, while the soldiers were paid in a depreciated currency.

We are in favor of a service pension to all deserving veterans of the union army, based upon the term of service.

We favor the Australian system of voting, to the end that we may have an honest ballot, uncontrolled by bribery or by employers.

We recognize the doctrine of state and national control of railroads and other corporations, and approve the same as an efficient means of protecting the people against unjust, discriminating and oppressive rates.

We recognize the dignity of labor and the necessity of proper legislation to protect its interests, and we pledge ourselves to the passage of just and wholesome laws for its protection and relief, and shall unswervingly oppose every attempt to lessen the fruits of toil or to place honest workmen in competition with paupers and convicts.

We demand the most rigid economy, consistent with the safety and dignity of our state

and nation, in the administration of every branch of our government.

We view with satisfaction the wide-spread interest of our people in education; that we advocate the maintenance of the common schools at the highest point of excellence as a prime safeguard and necessity of the republic; and that, recognizing the value of education to good citizenship, we favor the cordial support of our other public educational institutions through such adequate legislative appropriations as shall enable them to continue the rapid advancement already made, thus placing our state on the highest educational plane and affording our people educational facilities second to none.

We arraign Gov. Mellette for having disgraced the state by organizing and heading bands of beggars and roving the country over advertising it as an arid waste peopled by paupers, thereby deprecating property values, checking immigration and bringing dishonor to our good name.

That we are in favor of the full remonetization of silver, the free and unlimited coinage thereof, and the issuance of coin certificates based thereon which shall be a full legal tender.

South Dakota Independents (Farmers' Alliance).

Adopted at Huron July 9, 1890.

1. We demand currency to be issued by the general government, to be full legal tender, to increase in volume with increase in business, to be issued directly to productive industries, without intervention of banks of issue.

2. We demand railway transportation, telegraph and telephone service at actual cost; and that the government shall own and operate the same.

3. We demand the free and unlimited coinage of silver.

4. We demand the adoption of an absolutely secret voting system, both state and national.

5. We demand the most rigid economy, consistent with the safety and dignity of our state and nation, in the administration of every branch of our government.

6. We demand the passage of laws prohibiting the alien ownership of land, and that congress take steps to obtain land owned by aliens and foreign syndicates, and that lands now held by corporations in excess of such as is actually used and needed by them be reclaimed by the government and held for actual settlers only.

Therefore, we appeal to you, the people of South Dakota, to rally around our standard.

Wisconsin Republicans.

Adopted at Milwaukee Aug. 20, 1890.

The republican party, in convention assembled, declares its devotion to the common school as the chief factor in the education of the people and pledges itself to support, strengthen and defend it. It recognizes as valuable auxiliaries in the work of popular education the private and parochial schools, supported without aid from public funds, and disclaims absolutely any purpose whatever to interfere in any manner with such schools, either as to their terms, government, or branches to be taught therein.

We affirm the right and duty of the state to enact laws that will guarantee to all children sufficient instruction in the legal language of the state to enable them to read and write the same.

We believe that the compulsory education law passed by the last legislature is wise and humane in all its essential purposes, and we are opposed to its repeal; but at the same time we assert that the parent or guardian

has the right to select the time of the year and the place, whether public or private and wherever located, in which his child or ward shall receive instruction, and we pledge ourselves to modify the existing law so that it shall conform to the foregoing declarations.

We further believe that all children between the ages of 7 and 14 years should be protected by appropriate legislation from the evils, physical and mental, arising from their employment in factories and similar places of work, and that adequate provision should be made for the care of children incorrigibly truant.

We are unalterably opposed to any union of church and state, and will resist any attempt upon the part of either to invade the domain of the other. We repudiate as a gross misrepresentation of our purposes the suggestion, come whence it may, that we will in any manner invade the domain of conscience, trample upon parental rights or religious liberty. Our only purpose in respect to the educational policy of the state is to secure to all children within its borders, at the earliest practical age, proper equipment for the discharge of the ordinary duties of citizenship, and to this end, alike important to the state, to the children and to the parents of the children, we invite the co-operation and aid of all broad-minded and patriotic people.

The republican party of the state, while intrusted with power, pledges itself to maintain a faithful and economical administration of the state government and will demand the passage by the next legislature of such amendments to the existing laws as will provide, under proper guaranty for the security of the state, for the deposit in banks, subject to the order of the state treasurer, of such parts of the general fund of the state not required for immediate use and of the trust funds temporarily awaiting investment, all interest allowed on such deposits to go to the respective funds, the state treasurer to be relieved from any liability for such deposits while they remain in the banks.

The principle of the public regulation of railway corporations is a wise and salutary one for the protection of all classes of people. The republican party further commends the new election law of this state, enacted by a republican legislature and signed by a republican governor, by which new safeguards are placed around the ballot-box to assure the independence of voters and honest elections accurately reflecting the will of the people. It recognizes and heartily commends the faithful and efficient management of the affairs of this commonwealth under the present state officers. The general demand from all parts of the state for the renomination of Gov. Hoard furnishes the highest and most conclusive evidence of popular approval of his administration and of the warm place he holds in the confidence and esteem of the people as an able, firm and conscientious executive, and signifies his triumphant re-election to the highest office in the gift of our great and prosperous commonwealth.

This convention declares its adherence to the general principles of national policy set forth in the platform adopted by the national republican convention of 1888, and maintains that the best interests of the American people are promoted by the continuance of a system which protects American enterprise and American labor against competition with the capital and cheap labor of Europe, a system under which our country has enjoyed a measure of prosperity and development without precedent.

We protest against the violent and fraudulent schemes of the democratic party to sup-

press the republican vote in the southern states as unjust, unconstitutional, and utterly indefensible; as a standing menace to the experiment of an elective government; as grossly unfair to the northern states, inasmuch as it results in counting the republican voters as the basis of representation in congress and in the electoral college and then excluding them from taking part in the elections; as breeding contempt for the ballot-box and as manifestly tending to the most serious and alarming consequences.

This convention declares its confidence in the national administration, in the integrity, patriotism, and earnest purpose to promote the public welfare which directs its action, and commends the efforts it is making to establish reciprocal trade relations with the several nations of this continent upon such a basis as will be mutually advantageous.

It further warmly approves the course of our senators and republican representatives in the present congress. They have zealously and consistently upheld the best interests of the state and nation and proved themselves worthy of the trust reposed in them.

We recognize and emphasize the importance of returning a legislature which shall insure the continuance in the public service of Senator John C. Spooner. The commanding position which he has already acquired in the councils of the nation is the strongest vindication of his eminent qualifications for the important station to which he has been called and of his right to rank with the distinguished statesmen the republican party of Wisconsin has heretofore placed in the senate of the United States.

Wisconsin Democrats.

Adopted at Milwaukee Aug. 27, 1890.

We, the democrats of Wisconsin, in convention assembled, declare our continued opposition to all forms of paternalism and centralization. The republican party is the exponent of these dangerous principles. By the McKinley bill it seeks to burden the masses with additional high protective charges for the benefit of the favored few. By lavish expenditure of an immense levy of unnecessary taxes it strives to corrupt the voters.

By the force bill it endeavors to make its political power self-perpetuating in placing congressional elections directly under its control. By its lavish support of the speaker of the present house of representatives in his arbitrary assumption of authority it attempts to disfranchise its political opponents. By these and other acts it manifests its disregard of just principles of government, its distrust of the people, and its determination to override every right in its efforts to maintain its supremacy.

Extravagance everywhere marks republican rule. The present national administration has already exhausted the large surplus received from its democratic predecessor, and now, with constantly growing revenues, is threatened with a deficit. The whole country is burdened by oppressive war taxes, enhancing the cost of the necessities of life. The people, and especially the agricultural and laboring classes, ask relief from these unjust burdens imposed in the interest of monopolies. The republican party answers this request by legislation increasing the tariff. The democratic party insists that the present tariff be reduced and taxation lowered to meet the just requirements of necessary public expenses.

In state as in national affairs the republican party exhibits extravagance, corruption

and unjustifiable interference with individual and constitutional rights.

The great increase in state expenses and the creation of an army of needless officers, paid out of the state treasury to perform republican party service, show that the same disposition to impose on the people and squander their money for party gains prevails in Madison as in Washington. The appropriation by state treasurers of the interest on state funds for their own gain is an example of republican mismanagement. The interest on these funds is the money of the people, and the interest on a private trust fund is a recognized portion of the fund by which it is earned; yet for years the republican party has permitted state treasurers of its creation to appropriate such interest to their own uses.

We pledge that the democratic party, if intrusted with the state government, will reduce state expenses to the point necessary for an economical administration of state affairs; that it will cover into the treasury all interest on state funds, and vigorously prosecute legal proceedings to recover interest moneys heretofore taken by state treasurers.

We oppose sumptuary laws as unnecessary and unwise interference with individual liberty.

We oppose the employment in shops, factories or other places of business of children under 14 years of age and favor stringent laws prohibiting such employment.

We oppose any division or diversion of public-school funds to sectarian uses. The democratic party created the public-school system of this state and will always jealously guard and maintain it.

The Bennett law is a local manifestation of the settled republican policy of paternalism. Favoring laws providing for the compulsory attendance at school of all children, we believe that the school law in force prior to the passage of the Bennett law guaranteed to all children of the state opportunity for education, and in this essential feature was stronger than the Bennett law. The "underlying principle" of the Bennett law is needless interference with parental rights and liberty of conscience. The provisions for its enforcement place the accused at the mercy of the school directors and deny his right to trial by jury and according to the law of the land. To mask this tyrannical invasion of individual and constitutional rights the shallow plea of defense of the English language is advanced. The history of this state, peopled largely with foreign-born citizens, demonstrates the fact that natural causes and the necessities of the situation are advancing the growth of the English language to the greatest possible extent. We therefore denounce that law as unnecessary, unwise, unconstitutional, un-American and undemocratic, and demand its repeal.

Wisconsin Prohibitionists.

Adopted at Madison July 22, 1890.

1. The prohibition party, in state convention assembled, acknowledging Almighty God as the source of all just power in government, does hereby adopt the following platform:

2. We declare the traffic in intoxicating liquors as a beverage to be the great and constant source of crime, pauperism, insanity, municipal misrule, political corruption, the enemy of labor and agriculture and the greatest cause of danger to American institutions.

3. We insist on state and national prohibition and the enforcement thereof through a party thoroughly in sympathy with the same.

4. We regard all forms of license as a com-

promise with and legal recognition and protection of the liquor traffic.

5. We favor legislation that will insure to the laborer and farmer a fair share of the profits of their labor and check the tendency to divert the wealth of the many into the hands of the few.

6. We favor a liberal public education in the English language, enforced and supervised by the state.

7. We favor a more careful and just imposition of taxes, a vigilant supervision of corporations, prevention of combinations to op-

press the people and increase the price of the necessaries of life, the arbitration of differences between capital and labor and a careful execution of the new ballot law of the state.

8. We declare that no citizen should be denied the right of suffrage on account of sex.

9. We recognize the Woman's Christian Temperance union and other temperance organizations as powerful allies in the suppression of the liquor traffic and bid them godspeed.

Single-Tax League Platform.

Adopted at New York Sept. 3, 1890.

We assert as our fundamental principle the self-evident truth enunciated in the declaration of American independence, that all men are created equal and are endowed by their Creator with certain inalienable rights.

We hold that all men are equally entitled to the use and enjoyment of what God has created and of what is gained by the general growth and improvement of the community of which they are a part. Therefore, no one should be permitted to hold natural opportunities without a fair return to all for any special privilege thus accorded to him, and that value which the growth and improvement of the community attach to land should be taken for the use of the community.

We hold that each man is entitled to all that his labor produces; therefore no tax should be levied on the products of labor.

To carry out these principles we are in favor of raising all public revenues for national, state, county and municipal purposes by a single tax upon land values, irrespective of improvements, and of the abolition of all forms of direct and indirect taxation.

Since in all our states we now levy some tax on the value of land, the single tax can be instituted by the simple and easy way of abolishing, one after another, all other taxes now

levied and commensurately increasing the tax on land values until we draw upon that one source for all expenses of government; the revenue being divided between local governments, state governments and the general government, as the revenue from direct tax is now divided between the local and state governments, or a direct assessment being made by the general government upon the states and paid by them from revenues collected in this manner.

The single tax we propose is not a tax on land, and therefore would not fall on the use of land and become a tax on labor.

It is a tax not on land but on the value of land. Thus it would not fall on all land, but only on valuable land, and on that not in proportion to the use made of it but in proportion to its value—the premium which the user of land must pay to the owner, either in purchase money or rent, for permission to use valuable land. It would thus be a tax, not on the use or improvement of land, but on the ownership of land, taking what would otherwise go to the owner as owner and not as user.

In assessments under the single tax all values created by individual use or improvement would be excluded and the only value taken into consideration would be the value attaching to the bare land by reason of neighborhood, etc. to be determined by impartial

periodical assessments. Thus the farmer would have no more taxes to pay than a speculator who held a similar piece of land idle, and the man who on a city lot erected a valuable building would be taxed no more than the man who held a similar lot vacant.

The single tax, in short, will call upon men to contribute to the public revenues, not in proportion to what they produce or accumulate, but in proportion to the value of the natural opportunities they hold. It would compel them to pay just as much for holding land idle as for putting it to its full use.

The single tax, therefore, would—

1. Take the weight of taxation off of the agricultural districts, where land has little or no value irrespective of improvements and put it on towns and cities, where bare land rises to a value of millions of dollars per acre.

2. Dispense with a multiplicity of taxes and a horde of tax-gatherers, simplify government and greatly reduce its cost.

3. Do away with the fraud, corruption and gross inequality inseparable from our present methods of taxation, which allow the rich to escape while they grind the poor. Land cannot be hid or carried off, and its value can be ascertained with greater ease and certainty than any other.

4. Give us with all the world as perfect freedom of trade as now exists between the states of our union, thus enabling our people to share, through free exchanges, in all the advantages which nature has given to other countries, or which the peculiar skill of other peoples has enabled them to attain. It would destroy the trusts, monopolies and corruptions which are the outgrowths of the tariff.

It would do away with the fines and penalties now levied on any one who improves a farm, erects a house, builds a machine or in any way adds to the general stock of wealth. It would leave every one free to apply labor or expend capital in production or exchange without fine or restriction, and would leave to each the full product of his exertion.

5. It would, on the other hand, by taking for public use that value which attaches to land by reason of the growth and improvement of the community, make the holding of land unprofitable to the mere owner, and profitable only to the user. It would thus make it impossible for speculators and monopolists to hold natural opportunities unused or only half used, and would throw open to labor the illimitable field of employment which the earth offers to man. It would thus solve the labor problem, do away with involuntary poverty, raise wages in all occupations to the full earnings of labor, make over-production impossible until all human wants are satisfied, render labor-saving inventions a blessing to all, and cause such an enormous production and such an equitable distribution of wealth as would give to all comfort, leisure and participation in the advantages of an advancing civilization.

With respect to monopolies other than monopoly of land we hold that where free competition becomes impossible, as in telegraphs, railroads, water and gas supplies, etc., such business becomes a proper social function, which should be controlled and managed by and for the whole people concerned, through their proper government, local, state or national, as may be.

Dahoney, Pro., in 1886 received 19,186 votes for Governor.

PRESENT STATE OFFICERS, 1890-2.

- Governor—J. S. Hogg, Dem.
- Lieut. Gov.—G. C. Pendleton, Dem.
- Att'y Gen.—C. A. Culberson, Dem.
- Comptroller—John D. McCall, Dem.
- Treasurer—W. B. Wortham, Dem.
- Com. Gen. Land Office—W. L. McGaughey, Dem.
- Supt. Pub. Inst.—H. C. Pritchett, Dem.
- Sec. of State—To be appointed by governor.
- Com. Insurance—To be appointed by governor.
- Chief Justice—John W. Stoyton, Dem.
- Associate Judges—R. Gaines and J. L. Henry, Dem.

The vote for governor and lieutenant-governor will be canvassed by the legislature in January, about the 15th. It is thought that Hogg's (democratic candidate for governor) vote will be from 5,000 to 10,000 more than that for state officers.

AFRICAN EXPLORATIONS.

The return of Henry M. Stanley from the rescue of Emin Pasha, during the summer of 1890, has excited a good deal of interest in the country, especially so since last year about 6,000,000 square miles of African territory has been taken and divided among the nations of Europe. The object of Mr. Stanley's last trip through Africa was for the relief of Emin Pasha, who had been appointed governor of Equatoria by Gen. Gordon previous to his own fall in Khartoum. This was in 1878. Emin at once entered upon his duties, which involved him in constant warfare with the Arab slave traders and the Mahdi. Up to 1886 he was entirely cut off from the outside world and nothing could be heard of him. It was known that he had ten fortified stations on the Nile and 1,500 soldiers. Dr. Junker, the Russian explorer, left Emin Jan. 1, 1886, and after many dangers reached Europe. His account of the perilous position of Emin created a profound impression in Europe and plans were formed to rescue him. Money was raised and the relief expedition was placed under the command of Mr. Stanley. He left London for Zanzibar Feb. 3, 1887, which he reached on the 21st and started at

once for the mouth of the Congo, arriving there March 18, 1887. The next day he started up the Congo river and on the 28th of June reached the Aruwimi river, which is about one hundred miles north of the equator and about two-fifths of the way across, near longitude 25 east from Greenwich. From this point Stanley started across an unknown wilderness with 889 officers and men. Of the indescribable horrors encountered in fights with the natives, sickness and death of his men, hunger and sufferings of every conceivable kind, there is not space to speak. It was not until the last of February, 1889, that Stanley met Emin. To his dismay he found Emin not willing to leave the country, although he was a prisoner. At last, being influenced by the offer of a commission from the king of Belgium, he decided to unite his forces with those of Stanley and go to Bagamoyo on the Indian ocean, where they arrived Dec. 4, 1889. The distance to the mouth of the Congo was about six thousand miles and the time occupied in the journey was nearly three years. Mr. Stanley's subsequent movements are given in chronology of the year 1890.

THE SALVATION ARMY.

The Salvation Army owes its origin to Gen. William Booth, who in 1865 established a mission at Mile End Green, in London. From this the present organization was gradually developed. The army now has 2,864 stations in thirty-two countries. It includes 9,349 officers, who are assisted by about 13,000 volunteer lieutenants. Its revenues are estimated at about \$1,000,000 a year and it owns property valued at nearly \$3,500,000. The first salvationists to arrive in the United States landed at Castle Garden March 15, 1880. Seven ladies led by Commissioner George C. Railton formed the party. Now, according to recent statistics, the Salvation Army has in the United States 400 corps, 1,125 officers and 10,000 soldiers. Marshal Ballington Booth, whose

headquarters are in New York, is the commander of the forces in this country. The army has training schools in Chicago, New York, Brooklyn, Boston, Detroit and San Francisco where officers are given instruction in their work. This is of various kinds, not being confined to parading the streets and conducting meetings. Rescue homes are provided for outcast men and women, aid is given to convicts upon their discharge from prison, and relief is afforded the poor. The army is increasing in numbers and influence in the United States, but it has not yet met with as much success here as in England. Its best work has been done in the large cities of the east, though there are companies in all the chief cities and towns of the union from Maine to California.

THE MOST DESTRUCTIVE TORNADES SINCE 1872.

A great many rather imperfect lists have been published from time to time, which have not had sufficient care manifested in their collation. This list comprises all the most destructive storms that have been reported, so far as a definite locality was mentioned. It has been found exceedingly difficult to determine the loss in many cases, because an estimate has evidently been made of the loss to crops, orchards, etc., from the rain, hail and floods that accompanied the tornado, and not from the wind itself. The utmost pains have been taken to make it reliable, and if there has been any error it has been in the line of allowing too much loss rather than too little in any individual case.

(1) Nov. 22, 1874. Tusculumbia, Colbert county, Ala.—Struck the town at 6 p. m.; nearly half the town of 1 400 inhabitants destroyed; 10 persons killed and 10 wounded; 100 buildings damaged or destroyed; loss, \$100,000 (estimated).

(2) May 6, 1876. Chicago, Cook county, Ill.—Moved from southwest to northeast, accompanied by rain, thunder and lightning; bounding like a ball, it apparently reached the ground but two or three times; loss, \$250,000.

(3) June 4, 1877. Mount Carmel, Wabash county, Ill.—From 200 to 400 feet wide; great destruction of property; 16 killed, 100 wounded; loss, \$400,000.

(4) July 7, 1877. Pensaukee, Oconto county, Wis.—Moved from northwest to southeast, lasting about 2 minutes; 8 killed, many wounded; loss, \$300,000.

(5) June 1, 1878. Richmond, Ray county, Mo.—Entered the town at 4:05 p. m. from the south, sweeping everything clean; heavy sills 18 inches square and 16 feet long were swept away; path through the city 750 feet wide and 1 mile long, in which space not a single house was left; 13 killed, 70 wounded; 100 buildings damaged or destroyed; loss, \$100,000 (estimated).

(6) Aug. 9, 1878. Wallingford, New Haven county, Conn.—At 5:45 p. m. a dark cloud approached from the west; "electricity of the most terrific kind filled the air;" "straight rods of fire came down from the sides of the cloud to the earth; the debris of houses was scattered along in parallel lines, as though a mighty river had passed; the greatest destruction occurred in a path 400 feet wide and half a mile long; 34 killed, 70 wounded; 40 dwellings, 50 barns, 1 church and 1 school-house were destroyed or badly damaged;" loss, \$200,000.

(7) April 14, 1879. Collinsville, Madison county, Ill.—Struck town at 2:45 p. m.; nearly every gravestone in cemetery was leveled; 1 killed, several wounded; 60 buildings destroyed; loss, \$50,000.

(8) April 16, 1879. Walterboro, Colleton county, S.C.—Rainfall after tornado, which struck at 3:45 p. m., was unprecedented; wind on north side had a downward crushing tendency, on the south side an upward lifting action; 4 people saw balls of lightning running along the ground; 16 killed; 50 buildings destroyed; loss, \$200,000.

(9) March 4, 1880. Indianapolis, Marion county, Ind.—Moved from southwest to northeast with a zigzag course through the city; loss, \$100,000.

(10) April 18, 1880. Fayetteville, Washington county, Ark.—Struck town at 8:30 p. m.; not a building escaped in its path, 50 feet wide, through the town; 2 killed, 20 to 30 injured; 100 buildings destroyed; loss, \$100,000.

(11) April 18, 1880. Marshfield, Webster county, Mo.—Struck at 5 p. m.; near town trees 3 feet in diameter, for a space several

hundred yards wide, were lifted entirely out of the ground; every house in the town of 2,000 people was destroyed or badly damaged; 65 killed, 200 wounded; loss, \$110,000.

(12) April 18, 1880. Licking, Texas county, Mo.—Struck at 8:15 p. m.; entire town of 388 people destroyed except 3 houses; 300 left homeless; 1 killed, 17 wounded; 65 houses destroyed; loss, \$50,000.

(13) April 18, 1880. Beloit, Rock county, Wis.—Struck at 5 p. m.; moved from southwest to northeast; several killed, many injured; many houses destroyed; loss, \$75,000.

(14) April 24, 1880. Taylorville, Christian county, Ill.—Struck at 7 p. m.; 6 killed; 25 houses destroyed; loss, \$60,000.

(15) April 25, 1880. Macon, Noxubee county, Miss.—Struck at 8:30 p. m.; 22 killed, 72 injured; 55 buildings destroyed; loss, \$100,000.

(16) May 10, 1880. Arrowsmith, McLean county, Ill.—Loss, \$100,000.

(17) May 28, 1880. Savoy, Fannin county, Tex.—Time, 10 p. m.; town almost destroyed; 15 killed, 60 wounded; 48 buildings razed; loss, \$50,000.

(18) June 14, 1880. Glendale, Hamilton county, O.—Time, 8 p. m.; loss, \$80,000.

(19) April 12, 1881.—Hernando, De Soto county, Miss.—In some spots hallstones as large as hens' eggs fell; electricity and thunder not observed; 10 killed; 25 buildings demolished; loss, \$50,000 (estimated).

(20) June 12, 1881. Jackson, Andrew county, Mo.—A great deal of destruction occurred at King City, De Kalb county; in county and vicinity 5 killed; 80 buildings razed; loss, \$250,000.

(21) July 15, 1881. New Ulm, Brown county, Minn.—Killed, 11; wounded, 53; nearly 300 buildings destroyed or seriously damaged; loss in town, \$400,000.

(22) Sept. 24, 1881. Quincy, Adams county, Ill.—Time, 5 p. m.; storm accompanied by terrific lightning and thunder; 9 killed; 21 buildings razed; loss, \$100,000.

(23) April 18, 1882. Brownsville, Sabine county, Mo.—Time, 4:20 p. m.; 8 killed; 10 brick houses, 40 others, and 1 school razed; loss, \$150,000.

TRADE, COMMERCE AND MANUFACTURES IN 1890.

Below will be found a record of the general business conditions prevailing in this country during the year ended Dec. 31, 1890. The reports have been received for the DAILY NEWS ALMANAC from the most trustworthy sources. Necessarily many of the minor branches of trade and manufacture have been omitted.

PIG-IRON AND STEEL.

The year 1890 has been without precedent in this country in the production of iron ore, pig-iron and steel. The output of iron ore in the Lake Superior district far exceeds that of previous years and brings that section far to the front as the source of supply. A comparison of tonnage from that district for the last ten years would be one of the most interesting object lessons in the iron industry. The production of pig-iron in the southern states, Pennsylvania and Ohio has kept pace with the usual average in those sections, but Chicago and its immediate vicinity has made more rapid strides, and this district is now taking the leading place, without much doubt of a large increase now from year to year, as without question it is to-day one of the best centers in the country for the purpose; its connection with Lake Superior by water, reasonable proximity to the coal and coke fields, large and increasing manufactures and closeness to consuming points attracting the attention of capital from many directions.

In the manufacture of steel rails Chicago is now at the head of the list and men interested in that industry are turning their attention to other products of steel that will in a few years add very largely to the tonnage. Preparations are already under way for a large increase in structural shapes, building material, nails, spikes, material for ships, and the ship building company started here this year will call for a large quantity of material of this class. The production of cheap grades of pig-iron is bringing to this section a large number of manufacturers in the various lines of iron, such as stoves, locomotives, water and gas pipe, electrical machinery, and the year will close with very material additions in this way from new concerns and old ones from eastern points establishing large branches here.

In prices for pig-iron the markets at the opening of the year were fairly active and kept so until the end of August, when there commenced a decline in price but with continued activity in consumption, and the year closes with prices \$2.50 to \$3 per ton lower than at its opening.

MACHINERY.

The largest manufacturers of machinery in the country report that the volume of their business in 1890 was larger than ever before. Prices ruled fair and collections were good. The demand for machinery in all parts of the United States was brisk, both for the enlargement of existing plants and for the building of new ones. Western machine shops are constantly increasing in number and importance and supply territory that was formerly supposed to belong exclusively to the eastern trade. Chicago, Milwaukee, Denver and other large cities in the west and northwest are rapidly becoming centers for the manufacture of all kinds of machinery.

STOVES.

The year in the stove business was not as good as usual, except for some of the leading manufacturers. The mildness of last winter, and also of this in its opening months, no doubt contributed a great deal toward lessening the demand and keeping prices down to the lowest possible percentage of profit above the cost of manufacturing. There were no other features of interest in the industry to be noted.

COAL.

The coal business was better than in 1889. Prices rose gradually until in November, when \$7 a ton for nut and range coal was reached. It was generally expected that the winter would be a severe one and hence people laid in unusually large supplies, so that the stocks in the principal cities fell considerably short. Occasional cold "snaps" in the west and northwest and heavy snowstorms in the south and east combined to keep prices up, though the weather up to the close of the year did not prove so severe as had been anticipated.

LUMBER.

The year in the lumber trade was a fairly good one, prices for the season averaging somewhat higher than in 1889. The Chicago market, which is the greatest in the country, had some serious obstacles to contend with, the most serious being the carpenters' strike in April and May. This put a stop to building operations and restricted the local demand for lumber. The season as a whole, says the Northwestern Lumberman, was marked by peculiarities in sharp contrast with those of previous years. As usual, the yard dealers started out as bears, and began to pound lumber in May. This operation did not have the usual effect. Unexpectedly there was less piece stuff put on the market than usual. In June, when the yard men anticipated a drop in the price of that variety of product, it was stronger than in May, and the price advanced toward the month's end. In July there was a slight weakness at one time, but prices soon recovered. From June to November \$10 was the price for short-piece stuff, the market bulging in the last half of the last-named month to \$10.50. Thus the market closed with piece stuff worth \$1 more than at the close in 1889. A corresponding advance was made in the value of all lumber from and including good common and upward. The carpenters' strike in the spring somewhat discouraged the yard dealers, and they mostly pursued a conservative course about buying. They were determined to buy at low figures, but, in a measure, failed of their object. Dimension came upon the market slowly. There was not as much as usual sawed, while coarse inch was in superabundance. At the close of the season the dealers had less piece stuff in pile than they desired. Hence the advance of price.

The shipping trade out of the yards was heavier than was expected, and that helped to sustain prices on the market. At the same time, despite the carpenters' spring strike, there was a large local requirement for lumber.

The shingle market opened dull. Product in 1889 had exceeded the demand. The last season Muskegon standards have been at a discount, while the better makes have sold fairly well. Product of standards has fallen off, and receipts show a remarkable decline in the total. Late in the fall the market rallied somewhat, and the prospect is that the demand will be more active next season. But low-grade shingles have got a black eye from which they are never likely to recover.

Lath have been in especially active demand all season, with prices steady at \$2 a thousand. The product seems to have been scarcely adequate to the requirement.

Selects and uppers have not been sold freely

on the market. Such stock has been mostly bought at the mills at an advance of \$1 to \$1.50 on prices that prevailed last year.

SHELF-HARDWARE.

The shelf-hardware trade of the country for 1890 showed a handsome percentage of increase over 1889. Prices on many articles advanced toward the end of the year. In the case of tin plates, guns, cutlery, and similar articles the cost was increased by the changes in the tariff under the operation of the McKinley law, while the prices of axes, saws, shot, etc., went up on account of the formation of combinations or trusts by manufacturers. The year closed with steel and wire nails, barbed fence, sheet iron and nearly all staples somewhat lower than at the opening. The trade is at the present time in good condition, and the prospects for the future are considered promising.

BARBED FENCE WIRE.

The demand for barbed fence wire showed no diminution during the year. Like all other articles in use by the farming community, its consumption is affected by local conditions. If, for instance, there has been a partial failure of the crop, or prices of farm products are ruinously low, the farmers in such sections will defer new fencing, or fence repairs, until another season. Owing to excessive competition the prices have been forced down to the lowest figure in the history of the trade, thereby necessitating the closing up of some of the smaller factories. The tendency, therefore, is to concentrate its production in the hands of the larger wire mills. About 150,000 tons of barbed wire were used in 1890 and the same figures represent the amount which it is estimated will be required in 1891. There is no diminution in the favor with which this style of fencing is regarded by the farming community.

JEWELRY AND SILVERWARE.

The last year has been one of marked prosperity for the jewelry, silverware and kindred trades. The volume of business during the fall and winter months is estimated as about 33 1/2 per cent above that of any former year.

The new tariff law has caused a slight increase in the prices of optical goods, onyx clock cases and a few other articles of foreign manufacture. Silverware and silver-plated goods have advanced about 15 per cent and there has been a slight advance in the prices of diamonds and other precious stones. The enormous increase in the value of platinum has been severely felt in the trade, but is partially compensated for by a reduction in the cost of aluminum, which is gradually being more generally employed in some branches of the jeweler's art. It is used in making opera glasses and eyeglass and spectacle frames quite free y.

Silver-plated ware has taken its legitimate place as a household necessity rather than a luxury during the year.

The principal inventions affecting the trade are processes for making seamless plated wire and appliances for securing greater accuracy in timepieces. The number of patented designs for jewelry is unusually large.

CLOTHING AND FURNISHING GOODS.

The condition of the manufacturing and retail clothing trade at the close of the year 1890 is more satisfactory than it has been for some years. This is owing primarily to the fact that the business transacted has run above the average, and to the caution which has characterized the methods of both manufacturers and retailers. The former have not

produced an excessive stock, nor have retailers bought too heavily for the demands of their trade. The year has been noteworthy for a steady demand and a supply not greatly in excess of this demand. The tariff agitation had little effect on this branch of trade, as the provisions of the McKinley law were anticipated and prepared for in advance. This law will have comparatively little effect on the price of clothing until the fall of 1891, when an advance of about 15 per cent on garments made of imported materials may be looked for. It will have very little effect on the price of ready-made clothing generally, as at least 80 per cent of this class of apparel is made of domestic material on which there has been, and will be, no advance. During the year there have been but few failures, nor has the business been disturbed to any appreciable extent by other causes.

The clothing industry is one of the most important in the country. New York leads the list of cities engaged in the manufacture of clothing, with a product of about \$75,000,000. Chicago is a good second with nearly half that amount, while Baltimore, Rochester, Cincinnati, Boston and other cities follow in the order named, manufacturing about \$50,000,000 worth.

The furnishing trade, which embraces all branches of men's wear except outer garments, has also had a satisfactory year. The energy and originality of American manufacturers has created a broader field for their wares, and established a desire in a much larger portion of the inhabitants of the country to dress better. The shirt trade in flannel, negligé and white materials has been very large, while the neckwear business has increased to a remarkable degree, causing the extension of manufacturing facilities. A similar state of affairs is reported throughout the country in other branches. The hat trade likewise records a very profitable year.

The tariff law has been very agreeable to manufacturers in these branches, as it increased the duties on imported goods from 10 to 25 per cent. This increase, however, will not be felt to any great extent by the consumer, except by the limited number of buyers of imported goods, as the improvements in manufacture and the general effect of competition constantly tend toward a reduction in prices.

CLOAKS AND FURS.

The manufacture of outer garments for ladies and children is one of the growing industries of the country, and in the past decade has increased from a product of a few millions to about \$50,000,000 annually. The year 1890 has shown a natural increase, and the condition of the trade at the close of the year is satisfactory. It has not been a year of large profits to the manufacturers, owing to the mildness of the weather, calling for garments of small sizes, such as capes and jackets, to the exclusion of the heavier and longer goods. The tariff will have the effect of raising the prices somewhat on these goods, but this increase cannot be measured by the raised duty of about 25 per cent, owing to the slight ratio of foreign goods sold here. On some special fabrics, such as plush, which is mostly imported, the duty will raise the price 15 to 25 per cent, for as yet the supply made in this country is not equal to the demand. The fur trade has experienced a remarkable year, and the advance in the price of seal-skins of about 60 per cent, owing to the falling off of the catch, has put thousands of dollars into the pockets of manufacturers having a stock. The trade in nearly all kinds of furs has been unusually good, owing to the increased use of the material which fashion has caused.

MILLINERY AND STRAW GOODS.

The business in straw goods and millinery was generally good and showed a considerable gain over last year. There were no marked changes in prices except a little advance in some lines. Collections during the season were satisfactory, showing a healthy condition of the trade all over the northwest. The sales in Chicago aggregated about \$6,000,000. Manufacturers are increasing in number and enlarging their facilities. The placing of imported straw braids upon the free list will undoubtedly stimulate the manufacture of straw goods and may somewhat reduce the cost of the manufactured article, although the labor is the principal cost in the low-priced goods, of which there are by far the greatest sales.

DRY GOODS.

In most lines of textile fabrics the volume of trade for the year has shown a wholesome increase over the preceding year's business. The large lines of woolens and heavy goods generally left in the hands of retailers at the close of last winter have since that date entered into consumption more freely than the trade had reason to hope for, and the current season's demands have been all that could be expected. Hosiery and knit underwear, which in the early part of the season were very sluggish, rallied in the later months, and the total volume of sales will show a handsome aggregate. Imported goods of this description were entered in such vast quantities in anticipation of the new tariff law that domestic manufacturers will not be able for many months to get the full benefit of that act, and indeed this remark applies to many other lines of textile manufactures. Heavy clothing woolens have been in irregular movement. Trousersings, cloakings, overcoatings, etc., have been in their usual demand, with few changes from last year's standards. Rough-faced overcoatings, as chinchillas, elysians, etc., have been in more moderate inquiry. Flannels and blankets have shown more activity in the west than last year. Carpets, which had been unremunerative in price and of slow movement for many years, suddenly became very active on the passage of the tariff law, and prices show a marked increase in all departments. Brussels, ingrain, moquettes, three-ply and extra supers are severally in good demand at the present time.

Much interest has been manifested in the dress-goods departments the last year, and a large number of serviceable fabrics in a variety of artistic designs and effects competed for popularity. For warm weather and outing purposes large quantities were sold of zephyrs, seersuckers, fancy ginghams, chambrays, and staple and fancy wash-fabrics, particularly those in ombre effects. Flannel-ettes and soft wool, worsted and napped fabrics were also popular. For the fall and winter trade the demand for dress fabrics has embraced checks, stripes and plaids, also such novelties as the bourrette effects. A good trade has also been done in plain and colored stuffs, such as tricots, honriettas and cashmeres. All through the year a remarkable demand has been extended to black goods of every description. Silk dress fabrics have not been in so good a demand as usual in the east the last year, but in the Chicago market and in all western jobbing centers they have fully held their own. Black silks have led in surahs, gros grain, rhadamés, etc., but in Chinese, Japanese and light summer silks, a variety of handsome designs have been in favor. Silk ribbons, such as moire, satin-edge gros grains, etc., have been in phenom-

enal movement, being used lavishly for dress trimmings.

Domestic cotton goods have remained fairly steady during the year, there being none of the slaughtering of prices which were observed a year ago. The raw material, however, has been subject to wide fluctuations, but so well in hand have manufacturers kept stocks, as a rule, that quotations are practically what they were a year ago. Print-cloths have shown a steady decline throughout the year and on Dec. 15 were quoted at 3 cents for 64-squares and 2½ cents asked for 56 by 60's. The stock on hand then was 574,000 pieces, which was greater than at any time within six years. The year's business in fancy prints, shirtings, etc., has been large, with the demand for indigo blues, turkey reds, robes, furnitures, greys, solids, staples and mournings fully up to the average. Drills have been largely sold up, while chevots, domets, denims, cottonades, camlets, sateens, corset jeans, etc., have as a rule been strong and larger sales than in previous years.

WOOL.

The wool industry enjoyed more prosperity in 1890 than either in 1888 or 1889, though it did not come up to 1885 and 1886. There was an increased demand for wool and sales were easier. Prices were advanced from 1 to 2 per cent by the new tariff law. They opened firm and steady a year ago but became dull in July. They rose again in August and dropped back after the November election. St. Louis is taking the lead over Chicago as a market for wool. The receipts for the year in Chicago amounted to 21,608,463 pounds—a decrease of 6,550,827 pounds from 1889; the shipments were 37,282,608 pounds, or 3,682,980 pounds less than in 1889.

COTTON.

Cotton spinners in the United States did not have a very good season, comparatively speaking. The price of cotton goods and yarns did not keep pace with the advance in the raw material during the last half of the season, and in some cases there was no profit to the manufacturers of coarse yarns and heavy goods. Fall River mills, representing an aggregate capital of \$19,000,000, declared average dividends for the season of about 7½ per cent against 10 per cent the previous year. It is not unlikely that the result at Fall River may fairly represent the outcome for the season of the spinning industry of the entire country. The total cotton crop of the United States in 1889-90 was 7,297,117 bales.

LEATHER AND HIDES.

Since about a year ago the leather trade has been through a notable season of variations. In 1889 hides and skins reached a lower range of prices than had existed in twenty-five years. About March 1 prices began advancing and gradually increased 25 per cent on hides and 50 to 60 per cent on skins. Leather sympathized with hides until it advanced in price 25 and 30 per cent. This continued until about the 1st of August, when the market changed on hides and began to recede until the close of the year, when the whole increase had been lost. Skins showed only a small decline. This affected the volume of sales very materially and the buyers bought very freely on an advancing market. There was no reason why the changes should have been so radical except that such very low prices as existed are sure to bring a reaction, and that when it came was too rapid to last. Collections for sales were uniformly good, but the high interest on money and the difficulty of borrowing have tended to make the recovery slower than would otherwise have been the

case. The prospects for the trade in the coming year are good.

BOOTS AND SHOES.

The boot and shoe market was quite active in 1890. In the course of the last four months of the year prices advanced from 10 to 15 per cent. There was a considerable increase in the amount of goods manufactured in all parts of the country, but especially in Chicago, where it is estimated by good authorities to have been about 25 per cent.

FURNITURE.

The volume of trade in furniture has exceeded that of any previous year. Manufacturers, well established and of good standing, have, as a rule, been pushed to their fullest capacity. As the manufacturer depends almost wholly on the retail dealers for custom, it follows that the latter must have been equally busy. While patterns and styles are constantly changing, there has been no material change in prices as compared with those of a year ago. The financial disturbances in the eastern cities have not apparently affected the trade in the west and collections are generally reported good.

GROCERIES.

So far as the grocery trade is concerned the year 1890 has been an exceptionally prosperous one. There has been a constantly advancing market for most kinds of staple commodities; a large and continuously increasing consumptive demand for goods; collections have been fair and failures have been rare among those engaged in legitimate business.

The most sensational feature of the grocery trade during the last year has been the growth, development and decline of the sugar trust, a combination including most of the great sugar refiners of this country. At one time this great combine seemed likely to carry matters pertaining to the sugar supply with a high and imperious hand. It was currently reported to be making fabulous amounts of money and men with wealth to invest were eager to put it into sugar-trust certificates. No one but the managers of this great combination were permitted to know anything about its inner workings. Holders of certificates had no voice in its management or control; having no legal status, its right to exist was questioned and it was brought into court by a suit against the North River Refining company of New York, to show cause why its charter should not be annulled for becoming a party to a combination. Judgment was rendered against the North River Refining company, and receivers were appointed by the court to wind up the affairs of the trust. The combination is now struggling to reorganize in such a manner that it can have legal existence, and by the aid of eminent legal counsel it may succeed in its undertaking. Meanwhile certificates have greatly depreciated in value, and while the original projectors of the combination are reported to have made vast profits the lambs upon whom the certificates were unloaded claim to have been badly shorn. Under the manipulations of the trust sugars for a time greatly advanced; later they declined. What effect the McKinley law will have upon this indispensable product is yet to be determined.

Another important feature in connection with the sugar trade during the last year has been the growth of the beet and sorghum sugar industry in Nebraska and Kansas. Hundreds of thousands of dollars have been invested in costly plants for the production of sugar, and the business has already passed the experimental stage, and many parties interested are likely to derive large profits from the manufacture of both beet and sorghum su-

gar during the present year. The probabilities are that next year will witness great development in this industry, which will be stimulated by the sugar bounty to be paid to domestic producers by the United States government.

In the coffee market fluctuations have occurred, but have been chiefly caused by the manipulating of the markets by shrewd speculators in New York. Generally speaking, the supply has kept pace with the increased demand. The principal part of the coffee consumed in this country at the present time comes from the Central and South American states. A disease is reported to have struck the plantations of Java, similar to that of several years ago which ruined the coffee-producing industry upon the island of Ceylon. It is thought to be only a question of time when genuine Java coffee will become a thing of the past, and that the world in the future must largely look to Central and South America for its supply.

The tea trade has been quiet. Low prices have prevailed as a rule. There has been but little speculation. Large stocks have been held with the expectation of realizing better prices. Japan and India teas are becoming more popular, owing to more careful methods of cultivation and curing them. Great efforts are being made in India and Ceylon to extend and push the tea industry.

The dried-fruit industry of the Pacific coast is becoming one of the most important commercial enterprises of the country. The vineyards of California are equal, if not superior, to anything of the kind in the old world. Their acreage has been vastly increased during the last season, and though in some sections unfavorable weather has prevailed for curing, the production of raisins, dried apricots and prunes has been enormous. California dried fruit products are fast supplanting the foreign article in our domestic markets, and it is only a question of time when they will be largely exported. In fact, during the season just passed a considerable quantity has been shipped to both Europe and Australia. Foreign producers will have to exercise greater care in both the cultivation and curing of their fruit in order to compete with California goods in the markets of the world.

The great evil which has most affected and annoyed the grocery trade has been the materialization of combinations which have sought to dictate prices to jobbers. Most conspicuous among these are the match trust, tobacco trust, starch trust, oil trust, sugar trust (to which we have already referred), cracker trust and other combinations of more or less importance. A scheme has been conceived in New York by a combination known as the Wholesale Grocers' association which has in view the formation of a wholesale grocers' trust, which proposes to include all the leading grocery houses of this country, who are expected to enter into an agreement to sell goods at specified prices as agreed upon. This scheme, if it could be successfully carried out, would do away with all competition and leave the retailers and consumers of this country at the mercy of a great combination, that would no doubt advance prices to the highest notch at the earliest available opportunity. Owing to the disinclination of several of our jobbing houses to enter into this combine, it has hitherto been impossible for this organization to successfully carry out its scheme. Whether it can or cannot acquire sufficient strength to whip all wholesale grocery houses into line is a question that no doubt the coming year will determine. Most of our Chicago jobbers believe in free and fair competition and are opposed to combination goods on general principles.

There have been few failures in the grocery trade, scarcely any of great importance, during the last year. Both jobbers and retailers have made money. Many in this city have enlarged and extended their business and have a good bank account to show as the result of their year's endeavors. The trade is apparently in a sound and healthy condition, and has not been seriously affected by the late stringency in the money market, which has been so fatal to many merchants engaged in the dry goods and clothing trade. The consumptive demand for groceries in this country is constantly increasing, and this branch of trade in our city fully keeps pace with the growth and development of the great west.

THE BAKING TRADE.

The record of 1890, so far as the general baking trade of the United States is concerned, furnishes little to distinguish it from that of former years. There has been, on the whole, a reasonable increase in the volume of business, a legitimate growth in the number of new bakeries, no more than the average number of failures, no radical fluctuations in prices, no wide-spread disturbance on account of strikes or lock-outs. It may be regarded as a fairly satisfactory year as to output and profits.

The most notable item in the year's history of the trade is the formation of the three great companies which now practically control the biscuit (or cracker) business of the country—the ostensible object being to prevent ruinous competition and to curtail operating expenses. These companies are: The New York Biscuit company, representing eighteen factories, with headquarters in New York city, capital stock \$10,000,000; the American Biscuit company, representing thirty factories, headquarters in Chicago, capital stock \$10,000,000; the United States Biscuit company, headquarters in Pittsburg, representing thirty-five factories, capital stock \$5,000,000. Nearly all the larger cracker concerns of the country have become affiliated with one or the other of these corporations, each of which has factories in all sections of the republic. Despite this concentration of interests and the intention to reduce operating expenses, the close of the year finds little, if any, abatement of active effort in the establishment of new cracker plants. Ground has been secured and plans made by the great companies for the erection of immense factories in New York, Chicago and Boston; while in these and other cities in different parts of the country new buildings and the enlargement of old ones indicate that both the combinations and individual firms anticipate a considerable growth in the business and are preparing to care for it.

The baking trade, in common with others, is experiencing the changes which accompany and result from the introduction of machinery and the application of scientific methods; and probably nothing in its general business the last year is more significant than the growing demand for and use of labor-saving appliances and instruments for obtaining exact knowledge. Bakers, as a class, are quite conservative in the matter of methods, and the adoption of modern devices for saving time and work and for making close examinations is not so rapid with them as with artisans in some other lines. But a sure and general change is being wrought in this particular, and the advance made of late is cause for congratulation. Never before were the thermometer and the pyrometer so generally called upon to determine temperature; never hitherto has the microscope been counted so important a factor in the selection of yeast. Results that until quite recently were deemed impossible except by hand are now reached

far more quickly and satisfactorily by the use of machines, and the inevitable gains in the matter of economy, as well as the improvement in the matter of cleanliness, tend to stimulate invention and multiply the baker's uses of mechanical power.

There is little probability that the bread trade of the country generally will soon, if ever, come under the control of a few large corporations, as cracker-making has. Our wide area, and the necessity for immediate use of the product, will always be a difficulty in the way of the centralization of American bread manufacture. Indications, however, are not wanting that the bread business of the larger cities will eventually be carried on chiefly by a few strong companies. The change in the cracker business has come first mainly because of the practically universal use of machinery in this branch of the trade. The introduction of bread-making machinery such as has been put into operation in Chicago within the last year and the practical demonstration of its success are sure to result in changes which will materially alter the conditions of this department of the baking business.

CARRIAGES.

The carriage trade during the year 1890 has made a fair advance in the volume of its business. It has been what is usually termed a good year. There are few lines of business which better indicate the general prosperity and its reverse than the carriage business. For instance, the carriage manufacturers of England are complaining of very dull times, and our general knowledge of the depression in trade in that country sustains the idea that the carriage industries are among the first to feel the pressure. It is one of the sensitive nerves of business. This is easily accounted for by the fact that carriages are to a great extent a luxury and come after the necessities have been served. The fact that 1890 has been a good year for carriage selling shows, therefore, a year of general prosperity, in which beyond the necessities the great bulk of people could indulge their taste or convenience in the use of vehicles.

There are some interesting features in the development of the carriage business each year which are worth notice. For instance, its fashions. For a few years past the road cart—a vehicle light, cheap and variously useful—has come into such multitudinous use that a single factory turns out as many as 100,000 in a year, and large factories making almost as many are scattered all over the west, until it would seem that every man, woman and child is provided with a road cart. They are the cheapest form which the purely passenger vehicle has ever descended to. But they are great educators in creating a taste for vehicular locomotion, and while in numbers they almost rival the sewing machines, yet it cannot be said that they have hindered the demand for finer carriages. Lately it is noted by as good an authority as S. D. Kimbark, who says in the October Carriage Journal: "There are evidences that the road-cart business has received a check, and accumulations of them are found in the hands of a majority of dealers. The road wagon seems to have the popular favor just now, and large additions to plants and machinery are being made for their production in large quantities; the prospect for a larger demand for them is apparent, but the supply will be ample. No vehicles have a permanent hold on the people except the very best; all others are simply educators of the public for the former, and manufacturers will make no mistake if they gradually improve their styles and workmanship. As the popular taste becomes elevated the demand for

the best grades will increase. Meanwhile the competition on the lower grades will increase and the business become unprofitable. But for the near future trade prospects are favorable for all grades of four-wheelers."

The Carriage-Builders' National association meets annually, having met in Chicago Oct. 14, 15 and 16. At these conventions general subjects of interest to the whole trade are considered. The executive committee reported on this occasion that there was great danger of overproduction in this industry and warned against so many new factories. Four hundred were started during the fiscal year and conservatism in this respect was urged as desirable. The discussions of this association of carriage-makers embrace subjects of national importance, and their recommendations in respect to good roads, timber preservation, amended patent laws, technical education (the association supports a New York city school of draughtsmen) are the more valuable because coming from practical business men.

RAILROADS.

According to the Engineering News the total addition to the railway mileage of the United States in 1890 was 5,800 miles, or 700 miles more than in 1889. The total amount of completed road in the country up to Jan. 1, 1891, was 167,172 miles, of which 36,912 miles were laid within the last five years. The principal items of interest in the railway world in 1890 were acquisition of the Union Pacific by Jay Gould, the new president's agreement not to cut rates, and the investigation by the inter-state commission of alleged violations of the law by some of the railroads entering Chicago. The strike on the New York Central road in August, which terminated in a victory for the railway company, was the most important of the year.

SALT.

There was little or no change in the salt business during the year except a greater consumption of domestic and a less consumption of foreign salts. The quality of American salt is constantly improving, while that of the higher grade of English salt has not kept pace with it. This is possibly due to the fact that the English salt works were all sold out to a syndicate which does not take as much pride in manufacturing a first-rate article as did the individual proprietors in former times. High-grade salt will be a little higher this year than last owing to the tariff law, which increases the cost of the linen bags in which it is packed. Genesee is still the leading brand for dairymen's use and is apparently better even than in former years. The prospects are that in a few years American fine salt will entirely displace that of English manufacture. In the west there has been no special changes except in the Kansas fields, which have made quite an advance in the common grades. Their brine is so full of alkali as to be unfit for the higher grades.

CONFECTIONERY.

The confectionery trade of the country in 1890 was in a flourishing condition. There were but few failures and those of small importance. The prices were good. The demand for fine lines of sweetmeats has largely increased and the factories of most manufacturers in Chicago and New York have been overtaxed to supply them. There has been a marked improvement in the manufacture of American chocolate goods.

FLOUR.

Millers, as a rule, did a better business during 1890 than in 1889, and some of them realized quite handsome profits. Those especially who happened to have large stocks on hand when the April bulge in wheat occurred made

considerable money. In Minneapolis, the center of the milling trade, the output was greater than the year before by 1,041,000 barrels. For the fifteen months ending Nov. 30 the output, according to the Northwestern Miller, was 1,213,000 barrels in excess of that of the corresponding period in 1889. The flour exports of the crop year were much improved over that of the year. Bakers' were chiefly in demand at the outset, prices of patents being too high for the foreigners to buy them to any great extent. In April low grades were more sought after and since then they have sold freely at good prices. Late in November the millers experienced the novelty of being able to sell patents freely at an actual margin, the result of wheat declining to a very low point.

LIVE STOCK.

Chicago being the greatest live-stock center in the world, the condition of the market here may be fairly taken to represent that of the rest of the country. The receipts for 1890 were greater than in 1889 by a considerable percentage. The figures are: Cattle, 3,023,281; calves, 175,297; hogs, 7,692,657; sheep, 2,178,823; horses, 102,941. The increase in the receipt of hogs was more than 2,000,000. Prices were also better than a year ago and the demand steadier. Altogether the live-stock interests of the country had a degree of prosperity somewhat above the average.

FISH.

The catch of all kinds of fish in 1890 was light; prices generally ruled high. The catch of Norway herring was about one-fourth as large as last year. The catch of mackerel on the New England shores was less and receipts of codfish were correspondingly light. The lake fisheries have also been light, especially as to salt fish. The facts are that the fresh-fish trade is absorbing the lake fish to such an extent that the stocks of salt fish are now lighter than known in many years past. This may be said of all classes of fish, and there is no chance for any increase of stock or decline in prices until the new catch of 1891 comes in.

TOBACCO.

Trade in the tobacco line was steady throughout the year. The market in raw materials, with the exception of imported goods, was without marked fluctuations. Under the McKinley law the tariff on leaf tobacco, cigars and cigarettes was very heavily increased, the result being that toward the close of the season the price of cigars advanced materially. Taking it altogether the year was one of average prosperity to those engaged in the tobacco trade.

SPORTING GOODS.

Generally speaking the trade in sporting goods during the last year was about the same as in 1889. There was, however, a marked change in the lines sold. For instance, the trade in tennis goods increased very largely, while that in base-ball goods fell off in something like the same proportion. The latter was plainly attributable to the great base-ball war of the year, the effect of which was to diminish the interest in the game even in the small interior towns where they never saw a league, association or brotherhood game. The trade in gymnasium and general athletic goods is naturally increasing, and men of all classes and walks in life are each year taking more and more recreation of one kind or another.

STATIONERY.

The stationery trade for the year has not been characterized by any very marked or unusual features. While there has been an increase in production and sales have been largely in excess of those of 1889, there has

been but little change in prices. The market has been generally steady without fluctuation in values. The most notable feature is that the character of the product has changed somewhat, and for the better. Finer paper and more artistic designs are in demand by the consumer, and manufacturers seem to have been careful to encourage a higher standard of elegance and designs and artists have taxed their ingenuity in the production of novelties. There has been a marked increase in the demand for tablets, and while the consumption of cheaper grades has not fallen off a better class of goods has found a ready sale. The same may be said of papeteries, which are now used for correspondence more than ever before. The richness and variety of these goods this season indicates a higher standard of taste among the people and a better appreciation of the beautiful. In fine papers of all kinds there has been a good trade and a fair profit.

The envelope trade has been unsatisfactory. Overproduction and competition has lowered the price and destroyed the profits in most cases. In novelties generally there has been a good demand with satisfactory prices. Taking the trade as a whole it may be said to have been very good, better than was anticipated at the beginning of the year. As there have been very few failures, as collections have been good and a tendency toward an advance in values is indicated, the outlook for the coming year is encouraging and dealers and manufacturers are feeling quite comfortable.

The price of copying books advanced 25 per cent, blank books 10 per cent, and all imported stationery from 10 to 50 per cent. This was the direct result of the passage of the McKinley law.

BOOKS.

Publishers report that the book trade during the year was fairly good, but not quite up to the mark of 1889. The number of buyers is constantly increasing, owing both to the growth of population and intelligence and to

the decrease in the cost of printed matter. There has not been so great a demand for the cheap "libraries" as formerly, but more bound volumes have been sold. Among the books of the year that had large sales were Stanley's "In Darkest Africa" and Gen. Booth's "In Darkest England." Purchasers of books on economic subjects were also numerous, though there was a slight falling off as compared with the preceding year. The quality of the literature produced was not above the average.

FINE ARTS.

Fine-art dealers report that etchings are still the fashion, but the overwhelming issue of so-called etchings by irresponsible American publishers which are placed for sale in cheap-department stores is rapidly heading off and destroying the cultivation of a taste and appreciation for the higher grades of painted etchings. There is an increasing demand for original water colors. This class of art has always been popular in Europe, but has languished in this country owing to a widespread belief among Americans that water colors will fade. This idea is being rapidly dissipated. There is little or no sale for oil paintings in Chicago or other western cities. Those who can afford to own high-class paintings seem to entertain the idea that anything exposed for sale in this part of the country must be the "culs" of eastern or European galleries, following the same line of thought that anything purchased abroad or bearing the foreign stamp must be beyond criticism. There is, however, an important growth in art knowledge in the west as well as the east. The average buyer pays less attention to the frame and more to the work of art it contains. Every one wishes to purchase an original of some sort, or an artist proof with signature. The results of the year have been very satisfactory to art dealers. They have observed no evidence of that financial stringency which would naturally affect their business before any other.

IRISH HOME-RULE MOVEMENT.

The Irish home-rule movement is the history of the dealings of the British government with the Irish people from the period of the invasion of Ireland by Strongbow, the lieutenant of Henry II., to the present time. At the same time this history most painfully illustrates the folly of attempting to govern by the same methods and institutions nations which totally differ in their characters and civilizations.

It may be—doubtless is—true that Ireland was not a nation, but a collection of separate tribes and kingdoms, perpetually at war with each other, when the English established themselves therein. At first the English conquerors attempted to ingraft the Norman feudal system upon a people whose habits and inclinations tended to make them altogether spurn and reject it. This was the cause of wars innumerable, long and terrible. At the same time, instead of the intended feudal lords, prepared offhand for their Irish serfs, holding the latter in subjection, the English legislators finally found that if they intended to hold the country in indefeasible possession they must make a perpetual separation and enmity between the English and Irish, with the intent, doubtless, that the former should in the end root out the latter.

Glancing at the pages of Irish history from the Norman conquest to the long and terrible wars of Henry VIII. and Elizabeth, which

latter broke the power and independence of the Celtic chiefs, and for a time created, at least on the surface, a political unity; thence to the revolution in England which drove the Stuarts from the throne and established the protestant succession to the crown in 1688, and it will be found that, in all her relations with Ireland, England considered the political and even commercial rights of the sister island wholly subordinate to her own.

It is true Ireland had her parliament, but it was made subordinate to the government of England by various imperial acts, so-called Poyning and other laws. It was only when it became necessary to cultivate the protestants of Ulster in order to raise a force to protect the nation from attack by France that the British government conceded any fair measure of home rule to Ireland. The power of the privy council over Irish legislation was at that period abolished. The appellate jurisdiction of the Irish house of lords was restored. Finally the sole competence of the king, lords and commons of Ireland to legislate for Ireland was recognized. Ireland's parliament was thus independent. Yet it was a protestant parliament, composed mainly of landlords and lawyers, in which the great mass of the people had no voice.

It was this parliament which Pitt found means to so cajole and corrupt that on Jan. 1, 1801, it passed the so-called act of legislative

union between England and Ireland which remains to this day.

Against this union O'Connell, under the cry of repeal, directed his eloquence from 1805 until his death in 1847. Against it Mitchell, Smith O'Brien, Thomas Davis and others both wrote and fought. Finally, under the leadership of Dr. Isaac Butt, the movement was inaugurated and organized under the comprehensive and elastic name of "home rule," to be taken up later on by Charles Stewart Parnell, who in 1874 also inaugurated that policy of obstruction in the British parliament which has since caused more than one British political party to come to a gulf.

At length, wearied by the interminable Anglo-Irish contention, which had for centuries embittered the people of both countries, Mr. Gladstone introduced his celebrated measures of home rule for Ireland in the parliament of 1886. His speech lasted nearly three hours and a half. It was considered a wonderful achievement and was listened to with rapt attention. The result of the division was announced amidst indescribable excitement, the second reading of the bill being rejected by a majority of 30. The figures were: For the second reading, 311; against, 341.

This, however, did not end this most remarkable political contention. Mr. Gladstone has been steadily looking for a reversal of the vote of 1886, so far without achieving it.

His original bill provided for the entire exclusion of the Irish members from Westminster.

For years the Irish cause has been steadily gaining friends and adherents at home and abroad. In the summer of 1890 Capt. O'Shea, a member of parliament and a home ruler, brought suit against his wife for a divorce in which Parnell was joined as co-defendant. To this suit and the charges made against his honor Mr. Parnell neither made nor attempted to make any defense. A sudden and violent revulsion of public sentiment against Mr. Parnell immediately followed and he was asked to resign the leadership of his party, which he refused to do. This intensified the feeling against him. Such men as Mr. Gladstone, Mr. McCarthy and many others revolted against Mr. Parnell's leadership. On the 6th of December a meeting of the members of parliament of the home-rule party was held, which resulted in the withdrawal of Mr. McCarthy and forty-four others, leaving Mr. Parnell with less than thirty adherents. The seceding faction elected Mr. McCarthy as leader. The strength of the two wings was tested at the Kilkenny election Dec. 22, when a member of parliament was chosen. The Parnell faction nominated Mr. Scully and the other wing Mr. Hennessy, who was elected by a very heavy majority. The year closed with conferences between the two factions in the interest of harmony.

THE AUDITORIUM BUILDING.

The Auditorium building includes.

The Auditorium—Permanent seating capacity over 4,000; for conventions, etc. (for which the stage will be utilized), about 8,000. Contains the most complete and costly stage and organ in the world.

Recital Hall—Seats over 500.

Business Portion—Consists of stores and 136 offices, part of which are in the tower.

Tower Observatory—To which the public are admitted. United States signal service occupies part of 17th, 18th and 19th floors of tower.

[Above four departments of the building are managed by Chicago Auditorium association.]

Auditorium Hotel—Has 400 guest-rooms. The grand dining-room (175 feet long) and the kitchen are on the top floor. The magnificent banquet hall is built of steel, on trusses, spanning 120 feet over the auditorium.

Ground broken for the building Jan., 1887.

The corner-stone was laid Oct. 6, 1887.

The copstone was laid on top of tower Oct. 2, 1889.

The Recital hall was dedicated Oct. 12, 1889.

The Auditorium was dedicated Dec. 9, 1889.

The hotel was dedicated Jan. 30, 1890.

The building was completed February, 1890.

Cost about \$3,200,000, not including land.

Area covered by building, about 1½ acres.

Total street frontage (fronting Congress street, Michigan and Wabash avenues), 710 ft.

Height of main building (10 stories), 145 feet.

Height of tower above main building (8 floors), 95 feet.

Height of lantern tower above main tower (2 floors), 30 feet.

Total height, 270 feet.

Size of tower, 70x41 feet; the foundations cover about two and one-half times larger area.

Weight of entire building, 110,000 tons.

Weight of tower, 15,000 tons.

Iron work cost about \$600,000.

Number of brick in building, 17,000,000.

Number of square feet of Italian marble mosaic floors, 50,000. (Containing about 50,000-600 pieces of marble, each put in by hand.)

Number of square feet of terra cotta (arches and partitions), 800,000.

Number of square feet of plate glass, 60,000.

Number of miles of gas and water pipes, 25.

Number of miles electric wire and cable, 230.

Number of miles of steel cable for moving scenes on stage, 11.

Number of electric lights, 10,000.

Number of dynamos, 11.

Number of electric motors for driving ventilating apparatus and other machinery, 13.

Number of hydraulic motors for driving machinery, 4.

Number of boilers, 11.

Number of pumping engines, 21.

Number of elevators, 13.

Number of hydraulic lifts for moving stage platforms, 25.

Following are brief descriptions of some of the more important buildings completed, begun or projected in Chicago in the course of 1890. Many old office buildings are having new stories added to them or are being entirely reconstructed, and there are scores of new ones costing from \$25,000 to \$100,000 in process of construction. Mention of these has necessarily been omitted:

MASONIC TEMPLE.

On the 6th of November last the cornerstone of the great Masonic temple, which is to stand on the northeast corner of State and Randolph streets, was laid with impressive ceremonies. The building when completed will be twenty stories, or 275 feet high. Its dimensions are 170 by 113 feet. There will be light on all sides. The four sides are to be finished the same as on the street fronts, so that the structure will appear as imposing from the north and east as from the west and south, the main street fronts. It will have a pitched roof of brown Spanish tile, extending two stories high. The main fronts will be of dressed granite extending to the sills of the fourth-story windows; above that the construction will be of brick and terra cotta of a gray and mottled color so as to be almost identical in appearance with the granite. The first ten stories are to be devoted to shops accessible from a ten-foot balcony continuing around on an inner court, and provided with show windows similar to those used on street fronts for display of goods. The floors between the tenth and seventeenth are to be used for offices, and those above will be occupied exclusively by the Masons. They will have four halls, each fifty feet wide, one hundred and eleven feet long, and twenty feet high, to be used for drill rooms. There will be a banquet hall, consistory, commandery rooms, parlors and small rooms in abundance. No interior columns will be used in the large halls, the floors being supported by trussed and latticed girders. The construction will be entirely of steel and brick. All the outside piers will contain steel columns, thus making it doubly secure. Lateral bracing, securely tied together by vertical supports, will extend from top to bottom. There will be fourteen passenger and two freight elevators, the former forming a curved face with a radius of forty feet. All the balconies are to have floors and soffits of marble a. d mosaic; all the columns showing in the court are to be of alabaster, and all the interior metal is to be of bronze

finish and highly ornamented. The inside courts to be lined with marble from top to bottom. Covering the entire roof will be a promenade deck, 100 by 120 feet in size, and covered by a skylight and glass inclosure, permitting a splendid view of the city to be had. The interior court continues up through this court it will require a battery of ten 150-horse power boilers to furnish light, heat and ventilation. The total cost of this magnificent building and the ground it occupies will be about \$3,000,000. May 1, 1892, is the date fixed for its completion.

W. C. T. U. TEMPLE.

On the southeast corner of LaSalle and Monroe streets the National Woman's Christian Temperance union is building a \$1,000,000 temple. The corner-stone was laid on the 1st of November last and it is expected that the structure will be completed May 1, 1892. It is to be twelve stories, or 200 feet high, 190 feet long and 96 wide, with an exterior court. The auditorium will be on the first floor, with passage ways, etc., complete in itself. The remainder of the building will be devoted to office purposes, there being room for about 300 offices. Rock-faced granite will extend around the building for two stories, the upper part being of buff brick and terra cotta. A French-pitched roof three stories high and covered with brown Spanish tile will surmount the building. The construction is to be entirely of steel, with brick piers doing their part of the work. A prominent feature will be a copper fleche or tower rising to a height of 285 feet. There will be eight elevators forming an ellipse. The main entrance is to be very elaborate, all the wall surfaces being covered with alabaster and marble.

CHICAGO HOTEL.

The Chicago hotel is a \$1,000,000 structure being erected by the Northern Hotel company, of which Mr. E. S. Pike is president and E. W. Johnson treasurer. It is located at 227 to 245 Dearborn street, is 165 feet by 100 feet in dimensions, and fourteen stories or 169 feet high. The interior court is 49 feet by 61. There will be a hotel rotunda under the court, with the main office in the rotunda. A feature is to be made of the skylight over the rotunda. The construction is entirely of steel, with all walls supported at each floor level and tied to steel construction. Lateral bracing extending from column to column to the full height of the building will make it per-

fectly rigid against all windstorms. A new feature in the erection of this building is a travelling crane or derrick by which the contractors are able to set a story of structural iron in three days. The hotel will be completed Oct. 1, 1891. It is to contain about 600 bedrooms arranged in suites, with bath-rooms. All the bath-rooms are to be finished in marble and supplied with hot and cold water and the best plumbing fixtures. Every room will contain a fireplace, and the building is to be ventilated throughout with exhaust ventilation. The basement is to have a large oyster house extending the full length of the building. There will be three passenger elevators and one freight. The main floor will be devoted to the hotel offices, cafe, barber and other shops. The second floor will contain the main dining-room, hotel parlors, and the billiard-room. There will be stations for bell boys or girls on each main corridor on every floor for prompt bell service. The building is to be thoroughly fire-proof.

MONADNOCK AND KEARSARGE BUILDING.

The Monadnock and Kearsarge building, in process of construction at the corner of Dearborn and Jackson streets, is the property of the Brooke's estate of Boston. Its height is to be sixteen stories, or 24 feet. The building is to have a large interior corridor, 68 by 102 feet in size, and will be provided with six passenger and two freight elevators. The construction is entirely of brick and steel, the outside piers being of solid masonry and forming part of the construction of the building. The exterior will be of brick of chocolate color, with no ornament of any description from top to bottom. The brick grow lighter in color as the building ascends in height. Though it is divided into two by a heavy party wall, the building can be operated as one if desired. It is to be used exclusively for office purposes. It will be completed May 1, 1892, at a cost of about \$1,000,000.

"THE FAIR" BUILDING.

Next to the Masonic temple the building to be occupied by "The Fair" will when completed be the most prominent edifice on State street. While covering about as much ground as the Leiter building it will be twice as high, having sixteen stories. The roof cornice will be 24 feet above the sidewalk. The building will occupy the south half of the block bounded by State, Adams, Dearborn and Monroe streets. Its frontage on State street will be 190 feet and that on Dearborn the same. According to the plans and specifications the structure is to be thoroughly fire-proof, steel and terra cotta being the chief materials used. It will be provided with a large number of elevators and all the appliances to be found in the best modern store structures. The building completed will cost no less than \$3,000,000 and will be occupied by "The Fair" as a general department store. It will have more floor space than any similar establishment in the world.

THE LEITER BUILDING.

The immense building which Mr. L. Z. Leiter is putting up on State street, between Van Buren and Congress streets, was placed under roof late in the fall. It will be completed by next spring. The structure occupies just half a block, the frontage being 402 feet on State street and 144 feet each on Van Buren and Congress streets. Its height is eight stories. The materials of which it is constructed are iron and Maine granite of a light gray color. The exterior is plain, but the general effect is

pleasing. Granite pillars break the monotony of the facade and tend to increase the impression of massiveness which the building produces on the observer. At either end are open courts affording plenty of light and sufficient room for a dozen elevators. The structure is designed to be fire-proof, and, while there are no inflammable materials in its construction, to guard against all contingencies the heating, lighting and other power boilers and machinery will be put into a building by themselves on Holden place. The land on which the building stands was bought piecemeal by Mr. Leiter and cost him in the neighborhood of \$500,000. The cost of the improvement upon it is placed at \$1,250,000. The building is so constructed that it may be leased to one tenant as a store, or may be divided off for other purposes.

CHICAGO COLD-STORAGE EXCHANGE.

The corner-stone of the Chicago Cold-Storage exchange, which when completed will be the largest cold-storage warehouse in the world, was laid November 13, 1890. It is located just west of the river between Lake and Randolph streets. It has a dock frontage of 385 feet and the same frontage on the alley between the river and Canal street. The building is to be in two parts with an arcade between the two. Under this arcade the St. Paul, Pennsylvania and other railroad tracks will run. A traffic-way is to be constructed over the tracks, and facing it and Lake and Randolph streets will be stores for produce merchants. The structure will be thoroughly fire-proof, being constructed of stone, iron, terra-cotta and brick, the frame being of steel. It is to be ten stories high, and will be furnished with all appliances for the handling of merchandise requiring cold storage. The land on which it is to stand is worth \$716,000, the building will cost \$1,120,000, and the refrigerator apparatus \$365,000. The total cost will therefore be more than \$2,000,000.

GRAND CENTRAL DEPOT.

Work on the Grand Central passenger station at Harrison street and Fifth avenue was begun in October, 1888, and the building was opened for business December 8, 1890. It is one of the finest buildings of the kind in the world. It covers three and one-half acres of ground, having a frontage of 680 feet on Fifth avenue and 236 feet on Harrison. Part of the structure is seven stories high and part four. The tower rises 212 1-2 feet above the sidewalk and contains the second largest bell in the country. Its hammer alone weighs 700 pounds. The dial of the tower clock is thirteen feet six inches in diameter. The main waiting-room is seventy-one feet wide, 207 feet long, and the ceiling, which is twenty-five feet from the floor, is supported by two rows of massive marble columns. Floors and wainscoting are of Champlain and Tennessee marbles. The station is provided with ladies' parlors, restaurants, bath-rooms and all modern conveniences. The train shed is a great arch of corrugated iron and glass, 140 feet wide and 500 feet long. A carriage court 146 feet wide and 117 feet deep is one of the features of the depot. Three great stone arches, each having a span of thirty-seven feet and a height of twenty-one feet, form the entrances to it. The track platforms are so arranged that incoming and outgoing passengers are kept apart from each other. The building is the property of the Chicago & Northern railroad company and is used conjointly by that road and the Wisconsin Central and the Chicago, St. Paul & Kansas City roads. It cost in round numbers \$1,000,000.

THE MANHATTAN.

The Manhattan building at 307 to 321 Dearborn street will be an imposing structure of no less than sixteen stories. On Dearborn street the frontage is 150 feet and on 3d avenue the same, the depth being sixty-eight feet. Steel, brick and terra cotta are the chief materials of construction. The first story will be of ornamental iron, the second and third carved gray granite, and the remainder light-colored brick and ornamental terra cotta. There are to be two large entrances, one on Dearborn street and one on 3d avenue, opening into a hallway twenty feet wide leading to the half dozen or more passenger elevators. The interior is to be finished in metal work and marble mosaics. All the window openings are to be capacious. From the third story to the tenth the Dearborn-street front will be varied by three tiers of projecting windows, octagonal in shape, placed over the front entrance over the twelfth story a broad band of terra cotta will extend across the entire front, forming a division or base for the remaining stories. The roof cornice will be 200 feet above the sidewalk, when the Manhattan will have cost Mr. C. C. Heisen, its owner, about \$700,000.

CHAMBER OF COMMERCE BUILDING.

The thirteen-story high Chamber of Commerce building on LaSalle and Washington streets was practically completed early in the year. Its total cost was in the neighborhood of \$2,000,000. The building is notable for its magnificent interior court, reaching from the main floor to the skylight. Around this court are the galleries upon which the offices open. The interior is finished in marble and iron work of ornamental designs. Half a dozen passenger and freight elevators are provided. Brick, stone of a light color and iron were used in the construction of this building, which towers over the lofty Tacoma in the same block. It is used exclusively for office purposes.

FIRST REGIMENT ARMORY.

The 1st regiment, I. N. G., will in May next occupy a new armory now being put up for it at the corner of Michigan avenue and 16th street. The building is to be three stories high and 164 by 172 feet in dimensions. It will contain an interior court, 68 by 100 feet, covered with a skylight at roof level. The floors will be hung from trusses. The main floor is to be a large drill hall, 158 by 166 feet, with a balcony extending entirely around the same and supported by the same trusses. The two floors above the balcony around the court are to contain twelve company rooms and the officers' quarters. The interior is to be finished in oak; the exterior is of Portage stone and culled red brick. An entrance arch, forty feet in diameter, wide enough to permit a platoon of troops to enter without breaking ranks, is the architectural feature of the building. The cost of the structure, exclusive of the ground, will exceed \$150,000. The corner-stone was laid July 12 last.

RAND-M'NALLY BUILDING.

The Rand-McNally building was completed about July 1, 1890. It is a ten-story, steel-constructed, fire-proof building, extending 149 feet on Adams street and 166 feet back to Quincy. Its height is 142 feet. The interior court is 60 by 60 feet. One of the main features of the building is its cantilever construction carrying the party walls, thereby avoiding all danger of settlement to the adjoining property-owners. The interior court is faced entirely with white glazed brick and terra cotta. The exterior is entirely of terra cotta of a dark brown shade. The structure is pro-

vided with four passenger and three freight elevators. Among its tenants are the Chicago, Milwaukee & St. Paul road, world's-fair management, and Rand, McNally & Co. It has been estimated that this contains a total of 3,700 tons of steel. There are fifteen miles of steel railway 65-pound rails in the foundation, twelve miles of steam pipe, twelve miles of fifteen-inch steel beams and 350,000 rivets and bolts. Its cost was about \$1,000,000.

THE PONTIAC.

Mr. P. C. Brooks of Boston is putting up a magnificent fourteen-story office building on Harrison street, between Dearborn street and 4th avenue. The material is brown pressed brick and steel. Upon both Dearborn street and 4th avenue, from the third story to the eleventh inclusive, there are three tiers of windows and a single tier in the same stories on the Harrison-street front. The first floor is so arranged that it can be divided into five stores. On Harrison street the frontage is 67 feet and on Dearborn and 4th avenue 100 each. Its cost will be \$350,000.

THE CAXTON.

The Caxton is a twelve-story building in process of construction at 356 Dearborn street. The lot on which it stands has a frontage of eighty feet on Dearborn street and a depth of sixty-seven running back to 4th avenue. It is owned by George B. Harris of Salem, Mass., and leased for ninety-nine years by Mr. Bryan Lathrop and Mr. W. C. Reynolds, who are putting up the building. This is of steel construction with brick walls. On the front will be two tiers of bay windows, each equidistant from the north and south ends of the building. The building, which will be completed next May, will cost about \$25,000.

HOTEL METROPOLE.

The Hotel Metropole, on 23d street and Michigan avenue, owned by Messrs. George Miller and Francis Kennett, will be completed about the 1st of next May. It will contain 350 rooms and will be seven stories in height. The exterior is to be of pressed brick and the interior will be finished in marbles, mosaics and plaster-relief work. It is to be fire-proof and when completed will cost about \$425,000.

NEWBERRY LIBRARY.

Work on the Newberry library building was begun Oct. 7. The structure, or that part of it now under way, will be five stories high and will have a storage capacity of 400,000 volumes. It will contain a large reading-room, an auditorium that will seat 500 or 600, rooms for receiving, collating and cataloguing books and an office for the Newberry estate. The building will be made as completely fire-proof as possible and every expedient for securing an abundance of natural light will be employed. The first part of the building to be erected will be on the south part of the Ogden block, between Clark street and Dearborn avenue, facing Washington square. According to the plans, extensions may be made in the future so that the building when completed will form a quadrangle. The first story will be sixteen feet in height, the second fifteen and the remaining stories fourteen. Each story will be divided into rooms separated by fire-proof walls and accessible from a corridor on the north side of the building. Every room will have light from two sides. There will be no galleries or upper tiers of book-cases as in most modern libraries. The capacity of the structure when full will be 1,000,000 volumes. All the details of the plans and specifications have not yet been determined upon and any estimate of the total cost of the building is therefore impossible.

THE VIRGINIA HOTEL.

The Virginia hotel on Ohio and Rush streets was opened about the middle of last summer. It is built of brick and iron, the interior being finished in hardwoods, marble and mosaics, the whole being strictly fire-proof. It is furnished with the largest individual electric-light plant in the city, and contains fifteen steam engines ranging from ten to two hundred and fifty horse-power each. The Virginia is ten stories high, contains 400 rooms, is owned by Mr. L. J. McCormick, and cost \$500,000.

FRANK ALDRICH'S HOTEL.

Plans and specifications have been completed for a fine hotel on Lake avenue and 42d street, near Kenwood station. It is to be put up by Mr. Frank Aldrich on an irregular lot measuring 200 feet on 42d street, seventy-five on Lake avenue, and 150 on Lake Michigan. The hotel will be seven stories high, will contain 350 rooms divided into suites of three, will be fire-proof and will cost \$300,000. Work will be commenced in the spring.

HENNING AND SPEED BUILDING.

Messrs. J. W. Henning and J. B. Speed own

the ten-story store and office building going up at 299 and 301 South Clark street. It is of steel and brick construction and fire-proof. It has a frontage of seventy feet on Clark street. When ready for occupancy it will have cost \$300,000.

FAIRBANK'S HOTEL.

The Fairbank hotel, work on which will be begun in the spring, will stand on the corner of 21st street and Michigan avenue. It will be ten stories high, and will have a frontage of seventy-five feet on Michigan avenue and 170 on 21st street. The first two stories will be of blue Bedford stone and the remainder buff brick and buff terra cotta. It will be fire-proof and cost \$450,000.

KERR'S APARTMENT HOUSE.

Plans have been drawn for a ten-story fire-proof apartment house for Alderman Kerr. It will be erected on the corner of Washington avenue and 61st street. The apartments, seventy-five in number, will contain eight rooms each. The building is to be so arranged that it may be used as a hotel if necessary. The estimated cost is \$400,000.

ADVERTISEMENTS OF SPECIAL WANTS.

THE CHICAGO DAILY NEWS is the principal medium of Chicago and the Northwest for the publication of small

“WANT” ADVERTISEMENTS.

THE DAILY NEWS publishes a larger number of advertisements of this character during the year than any other paper in the United States, the New York Herald and World alone excepted. It is therefore the well-recognized channel of communication in Chicago and throughout the tributary Northwest for the supplying of SPECIAL WANTS, such as Situations Wanted, Help Wanted, Agents Wanted, Boarding, Rooms to Rent, Real Estate for Sale or to Rent, Financial, Business Chances, to Exchange, Partners Wanted, Lost and Found, Information Wanted, Instruction, Personal Notices, to Buy or Sell Horses, Carriages, Machinery, Store and Office Fixtures, Household Furniture, etc.

MANUFACTURERS and all others throughout the Northwest employing labor will find the “Want” columns of THE DAILY NEWS especially efficient in supplying their needs. Those seeking employment will always find therein a large number and choice of offers from employers, while those who wish to make their own personal application for employment can through its columns most easily, cheaply and effectively address the largest possible number of employers. The “Want” columns of THE DAILY NEWS are, in fact, a BUREAU OF EXCHANGE where labor and capital most easily meet and execute their mutual exchange of value.

For ALL the various kinds of SPECIAL WANTS THE CHICAGO DAILY NEWS is the leading and recognized medium of communication.

Advertising rates will be mailed upon application.

Keeping
Everlastingly At It
Brings Success

Bright, persistent, thoughtful Newspaper Advertising PAYS.
Other kinds may—but probably will not.

DOES Newspaper Advertising pay is no longer an open question.

WHAT YOU want to know is how,
when and where to get the best returns
from such investment.

WE HAVE been able in many cases to give this information successfully.

WOULDN'T it be a good idea to find out what we know about it?

WE OUGHT to know something about it, for we admittedly do the largest business in our line in the world, and it has not come to us by accident.

Correspondence solicited.

THE CHICAGO
DAILY NEWS
ONE CENT.

It prints **ALL** the news. It is a member of the Associated Press, of which the other Chicago members are the *Tribune*, *Times*, *Inter Ocean* and *Journal*. Its facilities for news-gathering are unsurpassed by any other Chicago daily.

It is a short-and-to-the-point paper. Its matter of all kinds is closely edited with the view of giving the reader all the news of the day and eliminating the merely trivial and inconsequential. It is designed to be a daily paper for busy people.

It is an Independent newspaper. It aims to be fair and impartial in discussing men and measures and to give its readers all political news absolutely free from the taint of partisan bias.

It costs one cent a day, or six cents per week. This is **THREE DOLLARS A YEAR LESS** than any other Chicago morning paper is furnished for. The CHICAGO DAILY NEWS is within the reach of every man, woman and child in Chicago and the Northwest.

It is pre-eminently a family newspaper. It is clean throughout, and, in addition to "all the news" tersely told, every issue contains more or less entertaining matter of a literary and general character, which makes it especially welcome to all members of the family.

Sold everywhere by newsdealers at one cent per copy, six cents per week. Mailed to any address, postage paid, for Three Dollars per year, or Twenty-Five Cents per month.
